Pictured below are winners from the 4-H Achievement Days — Cindy Waltemyer, Montgomery County, high individual in dairy judging; Paul Myers, York County, high individual in vegetables; and Franklin County's Wayne Heilman, senior automotive contest winner.

Lancaster Farming Photo by Dieter Krieg

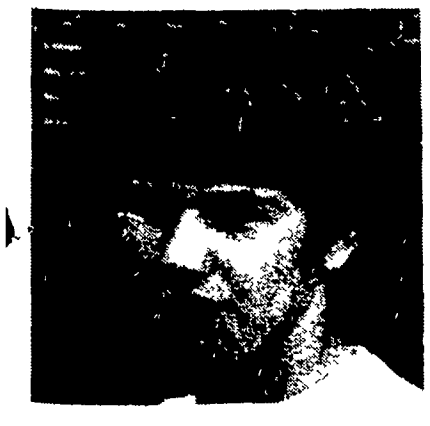
The first set of twins was born at the Lebanon Fair this year. The novelty, which attracted young and old visitors alike, belonged to Elaine Maulfair, who is shown embracing the first-calf heifer who went through the ordeal without assistance at 2:30 a.m. on August 10. The dam is a daughter of Oak Ridge Flashy Classic and weighs approximately 1100 pounds, according to Dale Maulfair, left. Helping to hold the spry twins in place is Dale's wife, Pat, who remembers how difficult it was to get the dam to walk around for practice for the show. No wonder.

Pictured below ...

State 4-H Leader Lee Jinx presents the high individual award to Joyce Aument of Lancaster County, who along with Tom Trone from Adams County broke a 30-year-old record in poultry and egg judging at the 4-H Achievement Days this week.

In the lower picture is the state's high individual in archery, Brook Palmer. A York County girl, Miss Palmer competed against approximately 400 other boys and girls in the contest.

Achievers honored



UNIVERSITY PARK — Approximately 1500 young adults representing Pennsylvania's 100,000 4-H members convened on Penn State University's main campus, here, this week for the annual State 4-H Achievement Days. When it was all over, 4-H members from counties within LANCASTER FARMING'S prime coverage area had won ribbons and medals in a spirit of competition and fun which might be likened to the recently completed Olympiad. Individuals competed against each other and traditional county rivalries flourished.

A 30 year record was broken in poultry and egg judging; several counties had more than a couple of first or second place teams, and winners were chosen to represent Pennsylvania's 4-H program in national competition.

Miss Joyce Aument, a 4-H member from Lancaster County and Tom Trone, a 4-H member from Adams County scored 1091 points out of a possible perfect score of 1200 in judging poultry and eggs.

In one 50 minute period each youngster made 1000 decisions judging 45 eggs on 10 characteristics each and 34 chickens on 20 characteristics each. In addition each took a written examination and gave oral reasons under examination for their decisions made to a post graduate 4-H member, Pam Martin of Beaver County.

These youngsters made

Confidence visible

By DIETER KRIEG

MT. AETNA — There's no doubt that Don Landis, Berks County dairyman, has faith in the dairy business. He has some huge investments hanging in the balance.

It is said that life begins at 40, and in a way that statement carries a lot of truth in reference to Don Landis. His investments and rather unique ideas represent a new twist in his life. Wanting to make things easier for himself and his family, he took the big step to overhaul and modernize his business. Key considerations were efficiency, dependability, and practicality.

Located just off Route 501, north of this Berks County village, the Landis farm sits quietly within sight of majestic Blue Mountain. Its buildings and spacious lawns are reflected in a huge pond near the entrance to the homestead. Beyond is an old barn which dates back to 1900, and to the right of it is its modern counterpart a free-stall barn for 124 head, complete with automatic "doors" in the roof, push-button feeding system, and carousel milking parlor.

Landis has been farming his 122-acre home farm for more than 20 years and rents an additional 82 acres nearby. All told he grows 160 acres of alfalfa and 20 acres of corn. In spite of the sizable hay stands, however, he bales very little - no more than he needs for his youngstock. The blue silos take the bulk of the crop. All

Omaha Cattle

Omaha
Aug. 12, 1976

Weekly - 51 - cattle - compared with the previous week's close -

Closing prices on slaughter steers and heifers were 1 00-1.25 higher, instances 1.50 up on steers, cows were 1.00-1.50 lower, the most decline on canner and cutter. Bulls were steady.

Four Day Receipts 13,800 compared 13,800 previous week and 15,400 a year ago. Fed cattle prices recorded the most substantial price upturn for a one-week period since early June with most of the advance coming on Monday, it was one of the few times over a ten week period that closing prices were higher than at the end of the previous week. The advance in live prices was supported by higher carcass quotations at the wholesale level and most buying interests were fairly aggressive for numbers, although some were a bit on the cautious side late.

STEERS: At the close, few loads and part loads Choice 3 1050-1150 lbs. 37.75-38.00. Load Choice and Prime 3-4 1159 lbs. 37.40. Choice 2-4, many consignments predominantly 3 975-1250 lbs. 36.25-37.50, some 3-4 at latter price with end Prime, Choice 3-5, predominantly 4 1225-1375 lbs. 35.50-36.00. Mixed Good and Choice 2-3 975-1225 lbs. 35.50-36.50. Good 2-3 32.50-35.75, two loads 1225 lb. holsteins 33.00. Standard and Good 2-3 31.00-32.00.

Average of LS-214, detailed quotations, for Choice 900-1100 lb. steers this week 37.08, Choice 1100-1300 lbs. 36.60. Average with steers this week 112 lbs. as compared 1114 lbs. previous week. Average weight heifers this week 950 lbs. as compared 957 lbs. previous week.

HEIFERS: Load Choice and Prime 3-4 938 lbs. 37.50. Moderate volume Choice and Prime 3-4 871-1034 lbs. 36.75-37.00. Choice 2-4 875-1075 lbs. 35.50-36.75, load predominantly 3 1155 lbs. 37.00, two loads mostly Choice 1200 lbs. 35.00. Mixed Good and Choice 2-3 800-1000 lbs. 34.50-35.50. Good 2-3 31.50-34.50. Small lots standard and good 30.00-31.00.

COWS: Utility and Commercial 2-4 closed mainly 24.00-26.00, few 26.50. Canner and Cutter 20.00-23.50, mixed Cutter and Utility 23.75-24.00.

BULLS: 1-2 1400-1800 lbs. 31.00-34.50, individual 1 35.00-35.50.

FEEDERS: Few Choice 930-1025 lb. steers 35.00-36.00 during week.

Weekly 51 - Sheep

Spring slaughter lambs closed steady, weights over 105 lbs. under improved demand. Not enough ewes to establish trend.

Spring Slaughter Lambs: Choice including Prime 90-110 lb. shorn No. 1 pelts closed 42.00, few with No. 2 pelts 41.00. Wooled mostly 41.00.

Oklahoma

Wednesday Feeder

THE OLD FARMER'S ALMANAC

AUG 16-22, 1976

Now, hideous thunder roars

Dog days end this week and cat nights begin Babe Ruth died Aug 16 1948 Third quarter of the moon Aug 17 Average length of days for the week 13 hours 44 minutes Land lease with Britain begin Aug 20 1940 Blondin crossed Niagara Falls on tightrope Aug 17 1859 Allies conquer Sicily Aug 17 1943

Unhappiness is not knowing what we want and killing ourselves to get it

Ask the Old Farmer When the old sailing vessels came in from long trips to the tropics their hulls were loaded with barnacles The ship was pulled on to one side to allow men to scrape the barnacles off The only name I ever heard for that procedure was to keelhaul a ship Now all dictionaries say that keelhaul was a punishment – dragging a man under the keel Have I got it all wrong? S H Green Bay Wisc

The process you describe was known as hauling down It was used a great deal Keelhauling was a wicked punishment -

Home Hints When you have a large batch of cookies to ice at one time speed up the process by painting them with a basting brush

OLD FARMER'S WEATHER FORECASTS

New England: Clearing in south to start, becoming warm and sunny by midweek, some showers in north latter part

Greater New York-New Jersey: Moderate to heavy thundershowers at beginning of week, then clearing and seasonable through latter part

Middle Atlantic Coastal Heavy showers early week, cloudy and cooler than normal latter part

Lancaster grain prices

formerly
LOCAL GRAIN
Thursday, July 29

These prices are made up of the average prices quoted by a number of participating area feed and grain concerns It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Thursday, July 29, are as follows:

	Bid+	Offered+
Ear Corn	86	——
Shelled Corn	3.07	3.28
Barley	2.15	2.37
Oats		
Local	1.60	1.75
Western	1.81	1.99
Wheat		
Millers	2.95	3.13
Soybeans	6.00	——
Soybean Meal		220

xxx

Coming home from work one evening, I could sense something was wrong. One look at my wife's face and I was sure of it. So I said flatly, "Okay, don't tell me any bad news - just tell me the good news."

"Well," she said, "you know our seven children - six of them did not break their arm today."

TAKE ONE MINUTE TO READ THIS

IM-PRUV-ALL PRODUCTS are feed balances for the lactic acid making bacteria. When added to the silage, it starts the ferment immediately, and in three days the total ferment is usually over. This means it made the total 1½% lactic acid in three days instead of the normal three weeks. The shorter and lower heat levels save your energy, vitamin A and digestable protein.

RECENT RESULTS FROM THE UNIVERSITY OF KENTUCKY SILAGE TEST showed that the IM–PRUV–ALL treated silage had 90 times more bacteria on the second day than the untreated.

Other studies have shown that the IM–PRUV–ALL silages many times have averaged 6-8% higher in T.D.N. It's just like feeding 6-8 pds. more grain, or you can feed 6-8 pds. less grain to achieve similar production.

WHY USE PRESERVATIVES WHEN YOU CAN GIVE NATURE A HELPING HAND WITH IM-PRUV-ALL ?

Lancaster Farming

EDITORIAL COMMENTS

BY DIETER KRIEG, EDITOR

Some fair information

With local fairs in Lancaster Farming's prime coverage area now underway, and many more getting ready to put up their tents, I find it necessary to comment on the importance of cooperation between the news media and fair chairmen or publicity directors

It is understandable that each event wants "prime" coverage, and it is our responsibility to give that kind of publicity as much as possible However, to do so is sometimes physically impossible.

We can't do everything ourselves, nor can we afford to spend hours of our time waiting for results or catering to special wishes of various persons As requests and notices and invitations come into our office, we must sift through them and try to follow through on as much as possible

I want to take this opportunity to advise fair chairmen to maintain records of their show results. Sure, they all do, but have you ever been a reporter trying to get them? That can be like pulling teeth from a shark's mouth. The records are somewhere, we've been told, but they can't be found Unfortunately, we can't wait for hours, and sometimes even a few minutes makes the difference between good and poor coverage So, please have records available A copy of the show catelog is most desirable Surprisingly, some fairs haven't been providing us with such simple tools for good, accurate reporting

If pictures are to be taken, make sure show winners and their animals are ready That is another prime ingredients for good publicity

When good coverage is obtainable, both in pictures and words, then chances are good for an attractive layout in the apper Not every event can receive the "big page" coverage, due to space limitations As editor it is my prerogative to decide which story has the most potential for an attractive layout That decision is based primarily on the story and pictures I have available. And as I've said throughout this commentary, it is up to a fair's management to see to it that good pictures can be taken and show results copied So, that hopefully answers a question that is asked from time to time: "How do we get coverage like so and so had?"

Doing it the hard way

A reader some time ago sent in an item which brings on a sense of appreciation for the big combines, and thoughts of wonder on how small grains used to be harvested.

The story allegedly took place on July 12, 1858 when a husky 30-year-old man took on the task of harvesting 12.5 acres of wheat in a single day. And he had to do it by hand. Even for him - standing 6 foot 3 inches tall, and weighing 230 pounds, this was a real challenge. A partial reprint of the account follows:

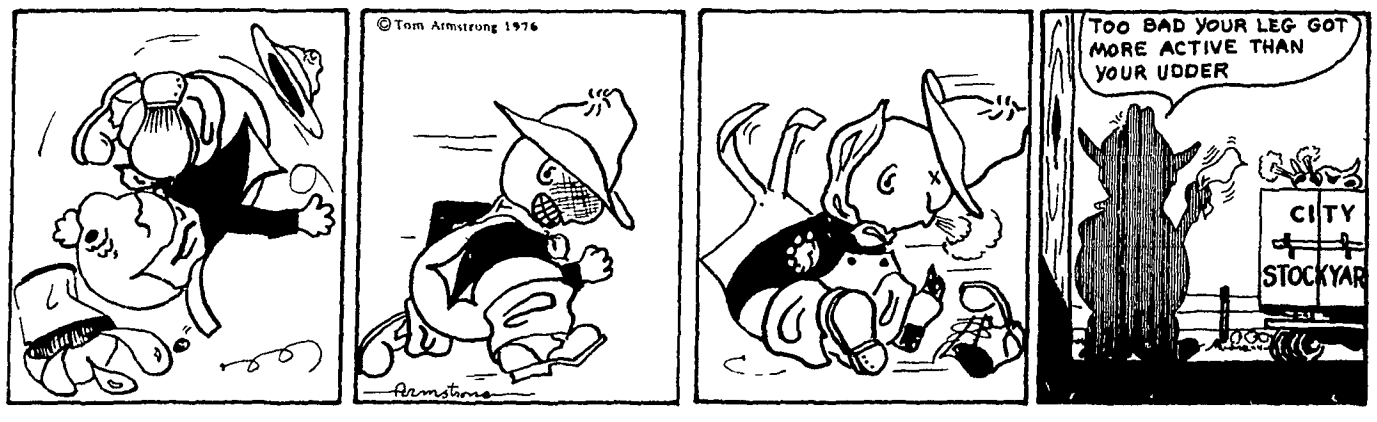
"The sun was peeping over the horizon when Michael Cromer entered the field that morning. This field was a part of the Adam Hoke farm east of Mercersburg in Franklin County. Cromer had a cradle especially designed and made for him by the Millard Scythe Company. Its silver-steel scythe was 65 inches long and five inches wide. For lightness it was constructed mostly of willow wood. He started in the center of the field clipping a swath 11 feet wide and five feet long.

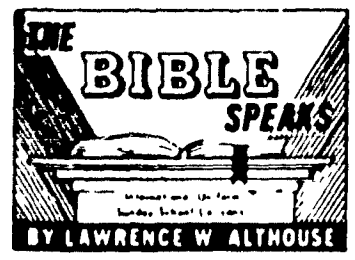
"Cromer ate nothing for dinner but took some broth every two hours as he halted to sharpen his scythe. A lightning and thunderstorm halted him for a short spell in mid afternoon. As the sun slid behind the west mountain he left that field with every blade of straw severed and laying down on nice swaths."

The field reportedly produced 262 bushels of wheat and the event was witnessed by 200 people.

RURAL ROUTE

By Tom Armstrong





BEYOND BELIEF

Lesson for August 15, 1976

Background Scripture: Exodus 5 through 6 9; Jeremiah 34:8-17; James 1.22 through 2·20.
Devotional Reading: Isaiah 58 6-12.

An aged Scotsman lay dying in his bed. Tiptoing to his bedside, his wife whispered: "The Minister is here to pray with you " His eyes blinking open, the man bellowed: "I dinna want to pray wi' him; I want to argue wi' him!"

The story is not really overdrawn for there are many like the dying Scotsman for whom the essence of religion is disputation. The role of the "true believer," as they see it, is to be the defender of the faith - "faith" being the doctrinal ideas and expressions which they believe to be authoritative for all who seek to follow Jesus Christ. I have known many who would much prefer to argue religion rather than to act out their faith in some tangible way.

Even Demons Believe

Recently I was interviewed on one of those talk-shows in which people call in their questions and comments. The radio station was a "religious broadcasting station" and the radio audience was composed primarily of church people. In responding to a question about the healing ministry of Jesus, I recommended the practices of prayer and meditation. Soon an irate caller challenged me: "I don't have any problem with prayer, but I don't find Jesus ever meditating in my Bible!" I tried to explain that "meditation" may be considered a kind of prayer that was certainly known to and practiced by Jesus. My caller seemed mollified for the moment and ended the call. It wasn't long, however, until he was calling back to argue the same point with great vehemence.

This gentleman was the most extreme of my callers that day, but he was not the only one who was intent on arguing with me. The purpose of the program was to witness to a wonderful healing that had been experienced by a woman in a class I was teaching. But some of the callers seemed to ignore what God had done for this woman and were more intent in determining whether she and I had the "right beliefs."

Works show our faith

I am always distressed when I find Christians putting so much stress upon "right beliefs." For one thing, they always assume their beliefs are "right" and yours are "wrong." For another, however, the word "belief" for these people focuses upon ideas and verbalizations of belief. This kind of "belief" is never enough ((in fact, it is often a substitute for real faith). The writer of James says: "Even the demons believe . . . " (1:19). Obviously, we must go beyond belief.

Real faith is belief that is made manifest in works of love. The faith is not really defended with argumentation and condemnations of "wrong doctrine", but with actions and deeds that witness to the love of God in Jesus Christ. It is never a matter of "faith or works?", for works are the fruit of real faith. If half the zeal that is put into disputation over religion were to be transformed into works of love, the Kingdom of God would be much more a reality in our midst.

NOW IS THE TIME...

TO WAIT FOR DENT STAGE IN CORN

Later this month no doubt many dairy and livestock producers will be starting to make silage from their corn crop. What we need now is some hot dry weather to mature and ripen the corn-no doubt it will soon be coming. The best time to ensile a stalk of corn for top quality silage is when the ear is in the dent stage of maturity. This is not different in relation to what we have been suggesting for the past several years. Since some of the corn in this part of the state was planted around the 20th of April, it will soon be getting into the dent stage with the right kind of weather. At this stage of maturity the feed nutrients are at a maximum level; this is the same regardless if the corn silage is to be fed to dairy cows or to fattening cattle. Cutting it earlier might get a bit higher protein content but less total feed value.

TO TOPDRESS ALFALFA THIS FALL

Many good alfalfa growers topdress their stands with a phosphorus-potash fertilizer in the fall after the last cutting has been made; this provides the needed elements for maximum growth this fall and next summer. The alfalfa plants remove large amounts of both phosphorus and potash that need to be replaced if the crop is to yield any tonnage. After the alfalfa stand has been established, it is doubtful if any nitrogen fertilizer will do much good; healthy alfalfa plants should be able to develop their own nitrogen from the root nodules. Applications of manure on alfalfa will tend to encourage faster growth of any grass or weeds that are present and crowd out the alfalfa. Manure will be more useful on straight grass pasture fields, or on cash crops.

TO TEST SOIL THIS FALL

It might be a bit early to talk about testing soil before the ground freezes this fall, but we suggest that producers make plans to do their major amount of testing before Christmas this year; this will permit time to place fertilizer orders early and get the analysis wanted. The soil needs for the 1977 cropping season will be just as accurate this fall as next spring; by testing in the fall the owner will avoid the spring rush and have more time to make definite plans for the soil needs. Also, wheat or barley fields that are to be seeded down to alfalfa or clover next year should be tested now and the lime worked into the topsoil before the winter grain is seeded this fall; don't broadcast the lime on top of the grain next winter and expect it to do as much good.

TO ENTER HAY SHOW

With all the good hay producers in this part of the state, we do not have very many who are interested in the Pennsylvania Hay Show. This event is held in connection with the Ag. Progress Days on August 25 and 26 and requires an 8" to 10" slice of hay wrapped for safe handling. There are many classes to enter which represent all kinds of hay. I'm sure that we have hay good enough in many of our barns to stand well in the state competition. We have a brochure available that gives all of the information. The big beneift from competing in the hay show will be to realize the requirements of top quality hay, and what it takes to get more feed nutrients from good hay rather than from more expensive grains.

Farm Calendar

Today, Aug. 14

Thomasville 4-H Club meeting, 12 noon, 4-H Center near Bair.

Lebanon County 4-H hog sale, fair grounds, 1 p.m.

Chester County 4-H hog sale, Vintage Sales Stables.

Monday, Aug. 16

Kutztown Fair begins at the Kutztown Fairgrounds.

Carlisle Fair begins in Carlisle.

Franklin County Fair begins in Chambersburg.

Huntingdon County Fair begins in Huntingdon.

Tuesday, Aug. 17

Ninth annual University of Maryland crops and soils field day on the Eastern Shore.

Wednesday, Aug. 18

Warren County Farmers Fair, Fairgrounds, Harmony, N.J.

Somerset County 4-H Fair, Somerville, N.J.

Friday, Aug. 20

Lancaster County Poultry Queen Contest, Farm and Home Center, 8 p.m.

There's a saying that toads around the house mean bad uck, but actually they're very helpful in a garden since hey feed on grubs, insects and slugs

FOR FULL MARKET REPORTS

Farmers want effort for mutual understanding

CHICAGO, Ill. - As less than five percent of the U.S. population, farmers today constitute a minority group And, as other minority groups, they are searching for ways to make their voices heard, to gain greater recognition. Many farmers feel that politicians, consumer groups and government officials are making decisions without the proper input from farmers themselves. Many believe that the rules and regulations being formulated today are not necessarily in the best interests of agriculture.

To examine ways in which this trend can be changed - so that farmers can speak out and give their voices more strength - International Harvester invited nine representative U.S. farmers to a farm forum discussion on this topic. They were from different parts of the country and had varying sizes and types of operations. They agreed that farmers are not speaking out as effectively as they might on behalf of agriculture.

Part of the reason for this lack of communication, according to Roger Hurst, 41, a Johnson, Kansas, wheat farmer, "is that now most city people are two and three generations removed from the farm. They don't have any idea what's going on in agriculture. We as farmers have lost touch with the city people."

A.W. (Dub) Anthony, 59, of Friona, Texas, cited another problem: "The farmer is at the bottom of the totem pole. Politically we don't carry the weight in Congress we did in years past. In other words, today there are not enough votes in agriculture to have a big impact."

This lack of political representation is, of course, a major obstacle for farmers. A partial solution was offered by farmer-legislator Wayne Mixson, 53, of Marianna, Florida, who is a member of the Florida State Legislature. "If we're going to get favorable decisions for agriculture, we've got to persuade a lot of city people to vote correctly," he stated. "And how do we do that? If we can get the facts out so the people will understand that the progress and the growth of agriculture is related to the value of the dollar, is related to employment in our country, is related to inflation, then I think we can make progress. Let's give the urban people truth on which to base their decisions and their votes."

The nine farmers agreed that a focus on world food shortages has placed American agriculture more in the public eye. "Most farmers have opened their eyes and learned that they have to look beyond their own farm gate," commented Herb Korthuis, 40, who raises vegetables in Custer, Washington. "We're no longer in a little corner all by ourselves. What we do as farmers affects not only America but the whole world. Now we've got to get together and go out and communicate with others."

Agreement came from Lloyd Mosdal, 47, who raises wheat, barley and cattle in Rapelje, Montana: "There's no question, we've got to quit talking to ourselves. And I think the new Agriculture Council of America (ACA) is working in this direction. For example, ACA has a telephone hotline where consumers can call and talk to farmers. They can actually get the facts from farmers themselves." ACA is an organization of farmers and agri-businessmen dedicated to telling agriculture's story to non-farm people.

In addition to the actions being taken by various organizations, the farmers discussed efforts that individual farmers can take to tell the farm story. "There really are lots of things you can do as individuals," said Steve Weber, 27, a Geneseo, Illinois, farmer who is a member of the Advisory Committee of ACA. "It may not be too hard to convince someone if you just take the time to yalk to him. For example, there's a cab driver in New York City who became a member of the Agriculture Council of America because I talked him into it on the way to the airport."

"I've spent considerable time with a slide set I've put together - showing it to schools, service clubs, state organizations and even several national organizations," added Charles Call. "I vary the dialogue, but the message stays pretty much the same."

Jim Tanner, 23, of Ivyland, Pennsylvania, explained how he communicates with consumers. Tanner and his father have their own retail dairy operation on their farm. "We deal directly with many city people at our dairy," he said. "Most of them are curious about the operation. So sometimes we let them come in and watch us milk the cows. With a little conversation, they begin to realize that we have our problems too. And I would guess that most of them feel we deserve the prices we're getting."

The nine farmers all agreed that farmers and consumers share many of the same concerns, and that it is important to maintain open lines of communication in order to foster a mutual understanding.

Dual crops possible

UNIVERSITY PARK - No-tillage corn can be grown simultaneously with perennial legumes such as birdsfoot trefoil or crownvetch by using herbicides to "slow down" the legumes, declared a weed scientist from Penn State University. The herbicides will suppress the legumes while allowing no-tillage corn to mature, stated Dr. Nathan L. Hartwig of the Agricultural Experiment Station at the University.

After recovering from suppression by herbicides, the legumes maintain a cover crop for pasture, silage, or mulch, the Penn State agronomist said. He indicated herbicides will suppress a legume sod or

smoothbrome grass at corn planting time, while allowing adequate recovery of the legume or grass by Fall.

Of 18 herbicide treatments in 1974 and 1975, corn stands and yields were better in birdsfoot trefoil than in crownvetch or smoothbrome grass. Hartwig found the trefoil was most easily suppressed and, in some cases, was completely killed by some herbicide treatments. Under ideal conditions, the sod recovers after suppression to provide winter cover and a living mulch for next year's crop. This system does not work with alfalfa, he claimed, since alfalfa is too competitive.

SILO HEAT LOSS

SILO HEATING CAUSES SEVERE ECONOMIC LOSSES IN CORN–SILAGE, GRASS–SILAGE, HAYLAGE AND HIGH MOISTURE CORN.

WHAT ARE THESE LOSSES?
+LOSS OF ENERGY (CALORIES) HEAT IS ENERGY!
+LOSS OF VITAMIN A-D-E-K AND OTHERS
MOST VITAMINS ARE DESTROYED IN TEMPERATURES ABOVE 110 DEGREES. UNTREATED SILAGE WILL RANGE FROM A MINIMUM 130 DEGREES TO A MAXIMUM OF OVER 200 DEGREES.
+LOSS OF DIGESTIBILITY OF PROTEIN. THE HOTTER THE SILAGE GETS, THE LOWER THE PROTEIN VALUE.
+LOSS OF PALATABILITY BY POOR FERMENTATION, CAN EASILY REDUCE RATE OF GAIN OR MILK PRODUCTION BY 25 PERCENT.
+LOSS OF SOLUBLE NUTRIENTS BY SEEPAGE
HEATING RELEASES JUICE IN THE SILO IN THE SAME WAY AS COOKING MEAT AND VEGETABLES.
+SILAGE UNLOADS HARDER AND SLOWER BECAUSE EXCESS JUICING MATS IT DOWN AND ALSO RESULTS IN HARDER FREEZING.

WHEN DO THESE LOSSES HAPPEN?
IMMEDIATELY AFTER FILLING THE SILO. THE FIRST 3 TO 7 DAYS ARE MOST CRITICAL DURING WHICH TIME THE HEATING REACHES ITS PEAK.

WHAT CAUSES THIS HEATING?
OXIDATION FROM THE AIR THAT IS BLOWN INTO THE SILAGE AND TRAPPED DURING FILLING AND THE OXYGEN CONTAINED IN THE PLANT. THE DRIER THE SILAGE, THE COARSER (AND HARDER) IT CHOPS, THE POORER IT PACKS, THE MORE AIR IS TRAPPED, AND THE HOTTER IT GETS.

WHY?
OXYGEN IS WHAT CAUSES ANY FOOD TO SPOIL AND IT MUST BE ELIMINATED FROM THE SILAGE BEFORE PRESERVATION CAN TAKE PLACE. IN THE NORMAL PROCESS OF ELIMINATION A CHEMICAL REACTION OCCURS IN WHICH OXYGEN COMBINES WITH READILY AVAILABLE STARCHES AND SUGARS TO LITERALLY BURN ITSELF OUT.

DOES OXYGEN FREE SEALED STORAGE PREVENT THIS?
OXYGEN FREE STORAGE IS NOT OXYGEN FREE UNTIL AFTER THIS OXIDATION PERIOD IS OVER. COMMON SENSE TELLS YOU THAT JUST AS MUCH AIR IS TRAPPED DURING THE FILLING PROCESS REGARDLESS OF TYPE OF STORAGE. THE SAME THING HAPPENS AS EXPLAINED ABOVE. THE DIFFERENCE IS THAT ONCE THE FILLER OPENING IS CLOSED AND THE SILO IS ACTUALLY SEALED, NO ADDITIONAL AIR CAN ENTER. SURFACE SPOILAGE AND SILO LEAKAGE IS NOT A PROBLEM.

STOP THESE LOSSES USE SILO KING

WHY DOES SILO-KING WORK?
SILO-KING CONTAINS A POTENT COMBINATION OF THE SAME ANTI-OXIDENTS USE TO PRESERVE HUNDREDS OF FOOD ITEMS IN OUR SUPER MARKETS. SILO-KING ALSO CONTAINS A POTENT COMBINATION OF FOOD GRADE EXZYMES AND FLAVORS.
THIS COMBINATION OF ANTI-OXIDANTS AND ENZYMES RESULTS IN A MUCH GREATER PRESERVATIVE EFFECT.
THEY ABSORB THE ATMOSPHERIC AND HYDROLYTIC OXYGEN ENERGY IN THE SILAGE TO PREVENT THE INITIAL OXIDATION WHICH CAUSES THE HEATING AND THE LOSSES.
THEY ALSO UTILIZE MOISTURE AVAILABLE IN THE SILAGE TO HELP SYNTHESIZE MORE SOLUBLE SUGARS WHICH HELP PRODUCE A HIGH QUALITY, SWEET SMELLING SILAGE WITH EXCEPTIONAL PALATABILITY.
BY REDUCING THE LEVEL OF OXIDATION, TEMPERATURE OF THE SILAGE IS MAINTAINED IN A RANGE OF 100 TO 110 DEGREES.
THIS IS THE IDEAL TEMPERATURE FOR FERMENTATION. THIS RESULTS IN A HIGHER PH (LOWER ACIDITY) AND A SILAGE OF VERY HIGH QUALITY.

Schedule of events set

FARMFEST '76 is mid-America's largest Bicentennial event

LAKE CRYSTAL, Minn - Country music and comedy king Roy Clark, followed by a star-spangled "Festival of Music," will lead off a solid week of top-name entertainment at FARMFEST 76, mid-America's largest Bicentennial event

Clark's show, with Buck Trent and the Oak Ridge Boys gospel group, caps the Monday, Sept 13, opening of this mammoth seven-day salute to American agriculture near Lake Crystal in southern Minnesota.

On Sept. 14, FARMFEST 76 will present saxophone master Boosts Randolph, joined by Danny Davis and the Nashville Brass and Rosemary Clooney. Guest stars on the special Tuesday "Festival of Music" program are the Statler Bros

Ed Hart, executive director of the 1400-acre exposition, announced recently the stage line-up for the first two days of FARMFEST 76 Word on other big stars appearing at FARMFEST's giant outdoor hillside ampitheater is expected soon, Hart said

Entertainment will be presented on a 12-foot high, 40-foot stage sponsored by DeKalb AgResearch. Admission to the stage shows is included in FARMFEST's "one-shot' daily gate charge, which also includes parking, historical displays, field demonstrations, commercial exhibits and ag contests. Entertainment begins each day at 4 p m.

Advance discount tickets are available nationwide through local FFA chapters and through the exposition office Tickets are good any day of the week. Children age six and under are free

More than a million rural and urban visitors are expected to pass through FARMFEST's 30-car gate, located on four-lane Minn. Highway 60 about two hours southwest of Minneapolis.

Among the major attractions will be the 20th World Championship Tractor Pull, sponsored by Midland Cooperatives and the Farm Credit Banks of St. Paul, from Sept. 13-16. More than 400 of the country's top competitors will be battling for a $40,000 purse in this giant contest of power and timing. Other ag competitions will include the World Horse Pull on Friday and Saturday, the National Horse Plowing Contest on Saturday and the Jacques Seed Bicentennial Invitational Horseshoe Pitching Contest all week.

Throughout the week, more than 700 organizations and businesses of all sizes will exhibit in the record-breaking 121-acre commercial display area. In addition, equipment will be at work each day in more than 1000 acres of machinery demonstration fields.

Close to 300 types of farm crops from all over the country will be included in an educational display on Constitution Mall, FARMFEST's main thoroughfare. A 55-acre walk-through outdoor museum will trace the development of agriculture in America.

As a special feature of the historical area, FARMFEST 76 will present a tribute to the contributions of Native American farmers, re-creating an Hidatsa Indian tribe farming village dating back to the 1500's.

Other features of the historical area will include a "living history" 1900's FFA farmstead, turn-of-the century Main Street crafts area and the world's largest display of working antique farm equipment, tracing the mechanization of agriculture in the U S

FARMFEST 76 also offers the world's only 40-horse hitch, the Antique Auto Club of America's auto and truck show, an education tent and women's activities area

Insects aid potatoes

UNIVERSITY PARK - Potatoes can be grown profitably by combining the action of beneficial insects with an insecticide to control aphids, research at The Pennsylvania State University indicates. The system is called "integrated pest management" and uses limited amounts of an insecticide, coupled with natural enemies of harmful insects.

The technique was tested last summer to control the green peach aphid, a major pest of potatoes.

The integrated pest management approach saved $24 per acre in insect control costs, and increased profits per acre by $218. Conventional control procedures applying a foliar insecticide, on the other hand, increased profits by $170. To determine profits per acre, the potatoes were valued at $4.00 per hundred pounds.

Where the systemic insecticide was used in conjunction with beneficial insects, 1-½ pounds of active ingredient per acre gave the highest return for the dollar spent. At the 1-½ pound rate, yields of potatoes averaged 365 hundred weight per acre. Higher rates of systemic insecticide did not increase yields further, showing that beneficial insects can help regulate pests and reduce the amount of insecticide needed.

Development of an integrated control system requires a broad base of information concerning the pest and beneficial insects, it was noted. Before a workable farm program can be put into practice, an understanding is needed on the population levels of the pest and beneficial insects. Growers must also know the impact the beneficial insects have on the pests, and the effect spray programs have on "beneficials."

xxx

A friend of mine who had her hands full with four young children was taken aback one day when her husband brought home a gift - a young, frisky puppy. Her children were all excited and asked her what they should name the pup. "Better call it Mother," she said, "because if that dog stays, I'm going!"

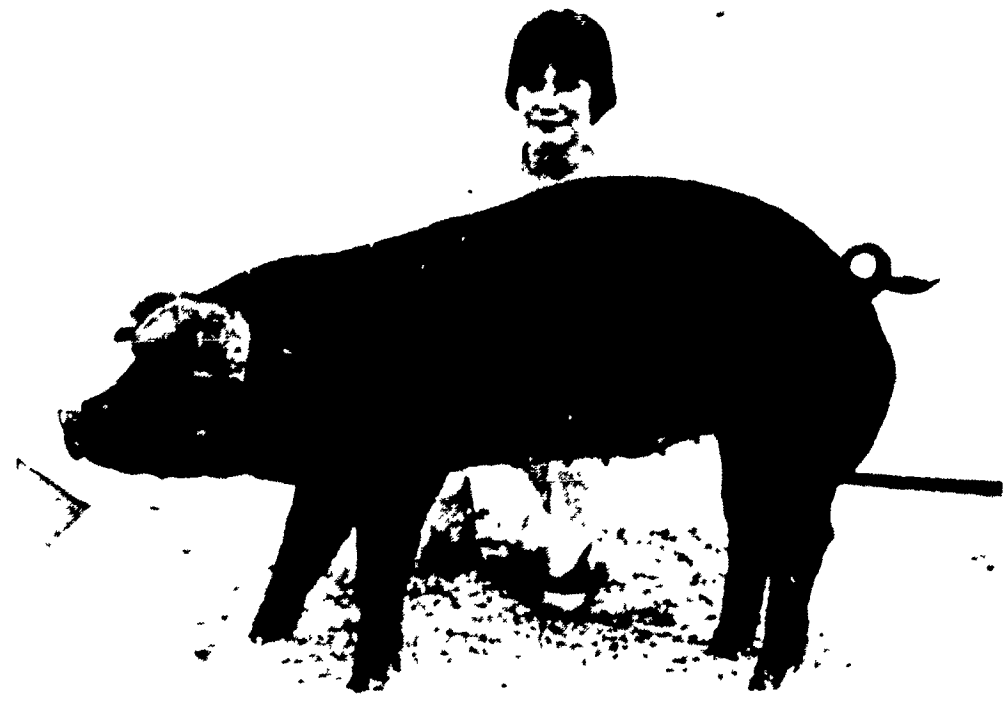
Lebanon Fair pictures



Bonnie Arnold won many ribbons with her hog entries at the Lebanon Area Fair. Here the 14-year-old is with her Duroc gilt which was reserve grand champion of the show. In addition, Bonnie was also reserve champion fitter.

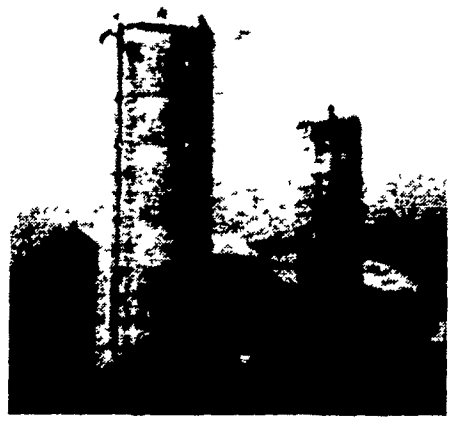
This grand champion hog of the Market Hog Show at the Lebanon Area Fair was exhibited by Todd Brajkovich. Holding the animal here is his brother, Mike, who also won a few ribbons at the show. The champion animal is a Hampshire-York-Duroc crossbred.

WHY CHOOSE

ALFA-ZYME

FOR CORN SILAGE?

RICHARD MAURER
HOMINEATA FARM
RD3
Newport, PA



We ask Richard why his choice is Alfa-Zyme? "First of all I found my silage keeps better, with less heating. I have tried other silage preservatives, but I use Alfa-Zyme, because the cows really milk better on it. Their appetites are really sharper, and they seem to be getting more out of their feed, because the manure is darker, and there is less corn going out in the droppings."

of the corn grown by Landis goes into the silo too. Any corn he needs for protein is purchased from other farmers and stored in another Harvestore in the high moisture and shelled state.

"We used to have a trench here, and I was so glad to get rid of that," Landis said with his characteristic smile and sparkling eyes. Also, he confessed to having a preference for mechanical labor savers, claiming that they are sometimes more dependable than hired help.

Milking in his rotary parlor, which was completed just several months ago, takes about two hours. Although it was something to get used to - and occasionally frustrating - Landis his well pleased with the way things are operating. In building the eight-stall carousel parlor, the enthusiastic dairyman incorporated a moving catwalk which he finds very handy during milking. Automatic detachers are also featured. The walls underneath the cows' platforms are sloped for easier cleaning - another customized feature of the Landis carousel.

Outside of the carousel is a unique holding area which doubles as facilities to prep incoming cows and hold any individuals which might need special attention. A system of gates does the trick.

The cows are housed in a long, four-year old free-stall barn which is just about the way Landis wants to except that it isn't equipped for long term manure handling. He plans on making that one of his next major moves. At present he hauls up to three loads per day.

The feeding system at this farm is just about fully automated. Feeds move in proper proportions from any of the three Harvestores via a system of conveyors and into the feed bunk. The cows are allowed to have all the haylage they want, and receive their high moisture shelled corn in amounts determined by their level of production. Landis has his herd grouped for this purpose. Producers of more than 60 pounds of milk per day receive at least 25 pounds of high moisture corn and have access to a magnet feeder which contains an 18 percent protein ration.

Large louvres in the roof of his new barn open and close according to weather conditions. Besides letting in abundant light, the openings also facilitate good air movement.

Another unique feature at the farm is the irrigation unit. Powered by a 50-horsepower electric motor, Landis has things fixed up so that he only has to move the lines once a day. There's even an automatic timer so that if the end of a cycle comes at an inconvenient time, the unit will shut itself off. When operating normally, it travels on a fixed path via a cable arrangement which is powered by the force of the water.

Landis handles all of his waste water from the barn, parlor and milk house with another "irrigation" system he had installed expressly for that purpose. Once a week a motor kicks on and pumps 6000 gallons of water to the top of a small hill from where it seeps into the surrounding area.

A member of Lehigh Valley Dairy Cooperative, Landis expressed faith in not just the dairy business as a whole, but also his cooperative. "I had an $8000 disaster a year or two ago," he recollected without losing his smile, "but I can understand that ... we all make mistakes sometimes." The friendly dairyman also believes in registered Holsteins, claiming that "I think you have a little more interest in 'em that way." Ron Kelchner is herdsman.

Other unique features which can be found on the Landis farm are calf hutches, a ventilation system in the carousel which keeps odors out and fresh air in, a work shop area, two sizes of free stalls, and sawdust beeding.

Ag economy conference slated

UNIVERSITY PARK — Approximately 2500 agricultural economists and members of their families from the United States and many foreign countries will arrive at The Pennsylvania State University August 15 for the first joint annual meeting of the American Agricultural Economics Association and the Northeastern Agricultural Economics Council.

Highlights of the three day conference, which runs through August 18, will include the presentation of more than 150 technical papers, association business meetings, special activities for family members, and the Association's annual awards program.

Dr. James S. Holt, professor of agricultural economics, is serving as general chairman for conference arrangements.

Sessions will get under way Monday morning, August 16, in University Auditorium. The presidential address will be presented by Dr. Kenneth R Farrell of the Economic Research Service, U S Department of Agriculture Dr Russell E Larson, Provost of Penn State, will present welcoming remarks

Special programs beginning the afternoon of August 16 will include sessions on the economics of the farm family, antitrust policy for agriculture, small farmer resources in rural development, land use policy issues, rural development, policy and regional growth, the demographic shift to rural areas, and others. The presentation of more than 100 contributed research papers will also begin August 16.

Heading the 1976 annual meetings are Dr. James T. Bonnen of Michigan State University, president of the American Agricultural Economics Association, and Dr. Frederic O. Sargent of the University of Vermont, president of the Northeastern Agricultural Economics Council.

Bicentennial program offered

"Bread basket of the colonies" is a name frequently given to colonial Pennsylvania.

The Commonwealth's fertile soil, nearness to the sea-coast, and its large population centers and navigable inland rivers all stimulated settlement and the opening of the land for farming.

Another factor contributing to Pennsylvania's role as "bread basket of the colonies" was the excellent farming techniques of the early German settlers. The Germans introduced the European practice of rotating crops to help maintain soil fertility.

You can learn more about Pennsylvania's unique history in "Heritage-Horizons '76" a Bicentennial program that focuses on the Pennsylvania family - past, present, and future.

"Heritage-Horizons '76" is available, free of charge, to civic and social groups, schools, youth organizations, historical societies, and church groups. The program includes a color filmstrip and audio tape cassette, richly illustrated commemorative booklets for program participants, and a leader's program manual. The program manual offers suggestions for setting up and presenting a Bicentennial program as well as discussion questions and activities.

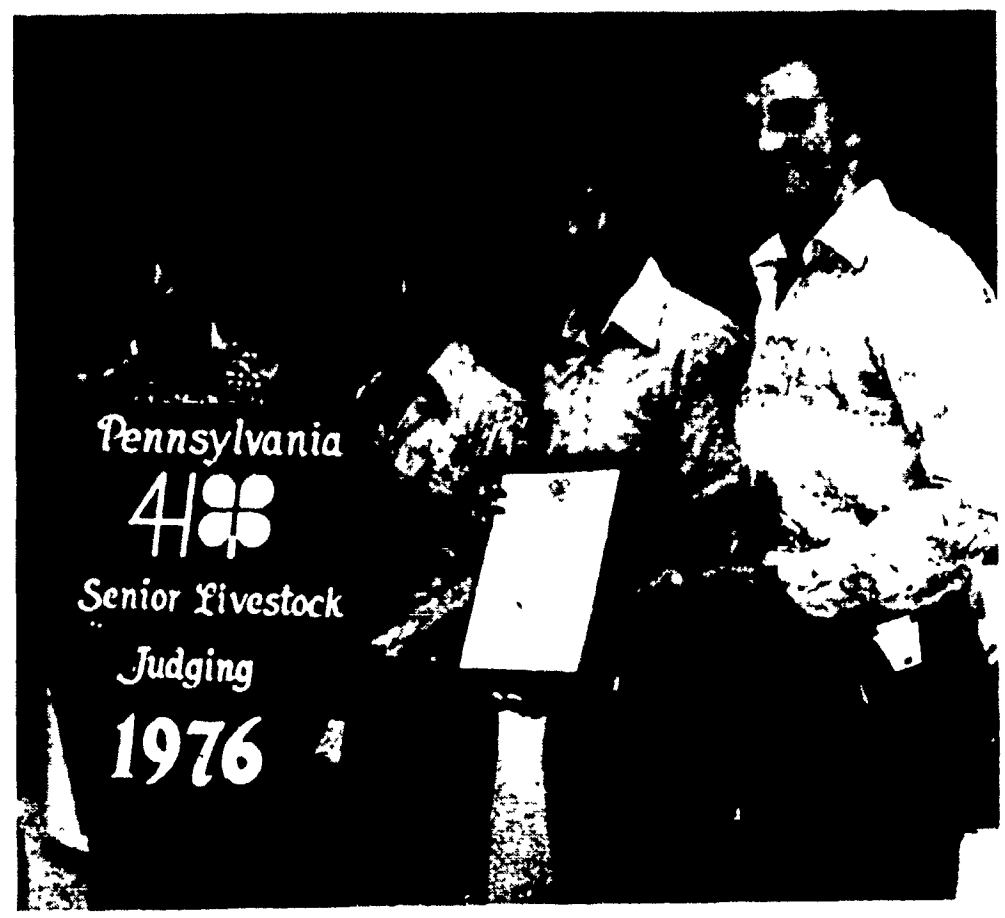
Lancaster County's junior livestock judging team, which placed first in the state, consisted of left to right, Linda Martin, (the state's high individual judge), Kim Weaver, Judy Zimmerman, and Tim Long.



The first-place senior livestock judging team from Lancaster County consisted of, left to right, Anthony Eberly, Kevin Rohrer, Robert Hess and Ken Brubaker.

Achievers

[Continued from Page 1]

more decisions in 50 minutes than many higher court judges make in a week.

The Adams County team edged out Lancaster County by 1-10 of one percent to win the right to represent Pennsylvania in regional and national competition. The Penn State 4-H poultry judging, one of the most comprehensive in America today, will be held again in August 1977.

Although Lancaster County was narrowly beat in poultry judging, Red Rose 4-H'ers excelled in junior and senior livestock judging - taking the top spot on both counts. The dairy judging team took third place.

Youngsters from the other side of the Susquehanna River also made good in their attempts to gain recognition for their skills and know-how. York County teams placed second in junior and senior livestock judging, vegetable judging, and archery. In addition, the meats judging team placed third, with members Kathy Sunday and Brenda Warner finishing second and third, respectively, on individual scoring. Tim Beck was third high individual in senior livestock judging. Brooke Palmer was top man in the state with the arrows. Rounding out the honors were five first-place medal awards and three blue ribbons awarded to demonstration teams.

Cumberland County 4-H'ers left the Penn State campus with a first place consumer education team, a second place meats judging team, and a third place horse judging team. Lebanon County 4-H'ers had the second place team in horticulture and physical education and came in third in vegetable judging. Robert Bensing placed second in that event, with team mate Ken Hoke filling the fifth slot.

A petite and pretty brunette from Chester County, Beverly Hershey, was one of eight girls in the state to receive high honors

Open and 4-H exhibit results listed

LEBANON - As usual, the main exhibit building at the Lebanon Fair was chock full of displays - vegatables, clothing, table top demonstrations, honey displays, etc., and the judges had a long, six-hour afternoon deciphering and deciding which entry out of each category was to take first place. Fair officials say that the amount of displays was close to last year, with the exception that rain lessened the flower entries

The judges' final dicisions for first place in each category were as follows·

Hybrid Field Corn - Eric Sweinhart; Open Pollinated Field Corn - Brett Eberly; Indian Corn; Dave Miller; Popcorn, Melvin Bollinger; Three Stalks Field Corn - Eckenrode Brothers; Silage Corn - Bryan Eberly; Stalk Sunflowers; Marlin Bollinger; Clintland Oats - Terry Donmoyer; Garry Oats - Donald Bollinger; Orbit Oats - Arthur Sweinhart; Any other oats - Donald Bollinger; Pennoll Wheat - Donald Bollinger; Red Coat Wheat - Brett Everly; any other wheat - Michael Kunkle; Wong Winter Barley - Michael Kunkle; Pennrad Winter Barley - Paul Bollinger; Sunflower Seeds - Walter Bucks ; Alfalfa or Mixed Hay, First Cutting - Paul Bollinger; Alfalfa or Mixed Hay, later - Donald Bollinger; Other Legumes - Donald Bollinger; Grass first cutting - Donald Bollinger; Grass, second cutting - Paul Bollinger; Mixed Hay - Arthur Sweinhart; Grand Champion Hay (alfalfa or mixed later cutting) - Donald Bollinger; Silage - perrenial crops - Paul Beckles; Corn Silage - Ray Sattazahn.

[Continued from Page 16]

in the 4-H Dress Revue Details on her achievements can be found on page 57 The flower judging and horse bowl teams from Chester County placed second. Berks County had the fifth place dairy judging team

The 4-H Achievement Days featured scores of demonstrations by both teams and individuals who recently won blue ribbons in county and regional competition.

Champion judging teams in the areas of dairy, entomology, vegetables, flower judging and identification, riflery, livestock, horse, poultry, archery and meat identification were selected. New this year was a clothing judging contest.

Two other events, an automotive contest and tractor operator's contest, tested participants on their driving skills and knowledge of vehicle safety.

County horse bowl teams competed with the winners eligible to enter the Northeast Regional 4-H Horse Bowl at the Keystone International Livestock Exposition in Harrisburg.

Initiated seven years ago, "Consumerama" presentations were geared to the teenage consumer. "Consumerama" consists of a series of three activities designed to help increase consumer competency. Activities include a consumer bowl game, planathon, and judging.

Also featured was the state 4-H public speaking contest where regional winners vied for a trip to National 4-H Congress in Chicago

Again this year, the State 4-H Dress Revue was held in conjunction with 4-H Achievement Days. Thirty-five 4-H members, receiving regional honors in dress revues, competed on August 11 in four categories - school outfits, spectator or active sports, street attire, and formal and informal party dress. One winner from each category and four winners at large were selected by professional judges and the participants. One of the eight top winners will represent Pennsylvania at the National 4-H Congress.

More details on the activities in words and pictures follow:

LANCASTER COUNTY

The consumerama team consisting of LuAnn Brenneman, Sandy Galbreath, Sandy Schmuck, and Tim Swarr won a blue ribbon. The horse bowl judges picked up seventh place in their team competition. Presidential citations were awarded to 4-H'ers excelling in physical fitness - Paul Reitzel, Andrea Gibson, Ted Gray, and Susan Sollenberger. The team was first in all-around competition.

In senior livestock judging, the team captured first place, with Ken Brubaker checking in with the top individual mark. Robert Hess was fifth in the individuals. Rounding out the team were Kevin Rohrer in 13th place and Anthony Eberly, 15th. Hess and Brubaker picked up blue ribbons for their work. Members of the second-place poultry judging team were Joyce Aument, Anita Augsburger, Mary DeLong and Pam Wivell.

Some very high marks were registered by girls on the Lancaster County junior livestock judging team, and naturally enough, it all added up to a first-place performance on a team basis. Hitting the top mark on individual scoring was Linda Martin followed in second place by Judy Zimmerman. Red Rose 4-H'ers missed out on third place, but two from the County tied for fourth. They were Tim Long and Kim Weaver.

Lancaster County's third place dairy judging team consisted of Kerry Boyd, Phil Crouse, Sandra Frey, and Robert Witmer. Crouse, finishing tenth in individual scoring, picked up a blue ribbon, while Witmer checked in with 15th place and a red cloth. The County's top clothing judge was Peg Shenk of Mount Joy who placed fifth in the statewide contest.

Cathy Brubaker and Maureen Doyle were both state winners in the dress revue. A separate feature on Miss Brubaker's achievements may be found on page 81.

In demonstrations, Martha Gregory of Lititz picked up a blue ribbon for her presentation, entitled "Hats Off to Tom Turkey." Red ribbons were presented to Carole Ebersole, Susan Martin, and Wanda Yoder.

CUMBERLAND COUNTY

Greg Williams, Wendy Mains and Sheree Mains made up the first-place team for consumer education. The third-place horse judging team consisted of Robert Otto, Judy Long, Leda Bellanca, and Betsy Nichols. High individual on the team

[Continued on Page 19]

The winning archery team at this year's 4-H Achievement Days was from Dauphin County. Members were, left to right, Julie Kuhn, Wayne Snyder, and Connie Adams. At right is Melinda Waybright, Extension agent.

Achievers honored

(Continued from Page 18)

...is Miss Long, who finished seventh in the state-wide field.

Although the senior livestock judging team did not place high, one member - Larry Yorlets of Carlisle R7 - checked in fourth The meat judging team placed second as a team Members were Paula Deitch, Karen Strock, and Cindy Brackbill

All members of the physical fitness team - Kevin Johnson, Tyron Hodge, Lisa Shenk, and Pam Coyle, received blue ribbons. In the demonstrations contests, Pattie Ocker and Ruth McCulloch were presented with a blue ribbon and medal Debbie Nehf received a blue ribbon

CHESTER COUNTY

Flower judges Carrie Bauman and Alison Sheib placed third and eighth, respectively, to lead the flower judging team to a second place finish The horse bowl team also walked off with the second place ribbon Team members were Ama Saha, Janet Nothstine, Dorcas Nothstine and Bonnie Shaw The vegetable judging team placed sixth, with Don Nafziger being 15th high individual John Weinstock was awarded a blue ribbon for his demonstration

LEBANON COUNTY

James Egnor's third place individual score in horticulture helped spark a second p ace victory for his team, which was rounded out by Maxine and Michael Noll The vegetable team placed third, team members were Robert Bensing and Ken Hoke. Two Presidential Physical Fitness Awards were presented to Lebanon Countians Kelly Louer and Jesse Heilman who was second-high individual. The team also placed second. In the girls' contest, Gail Stout was first in the state.

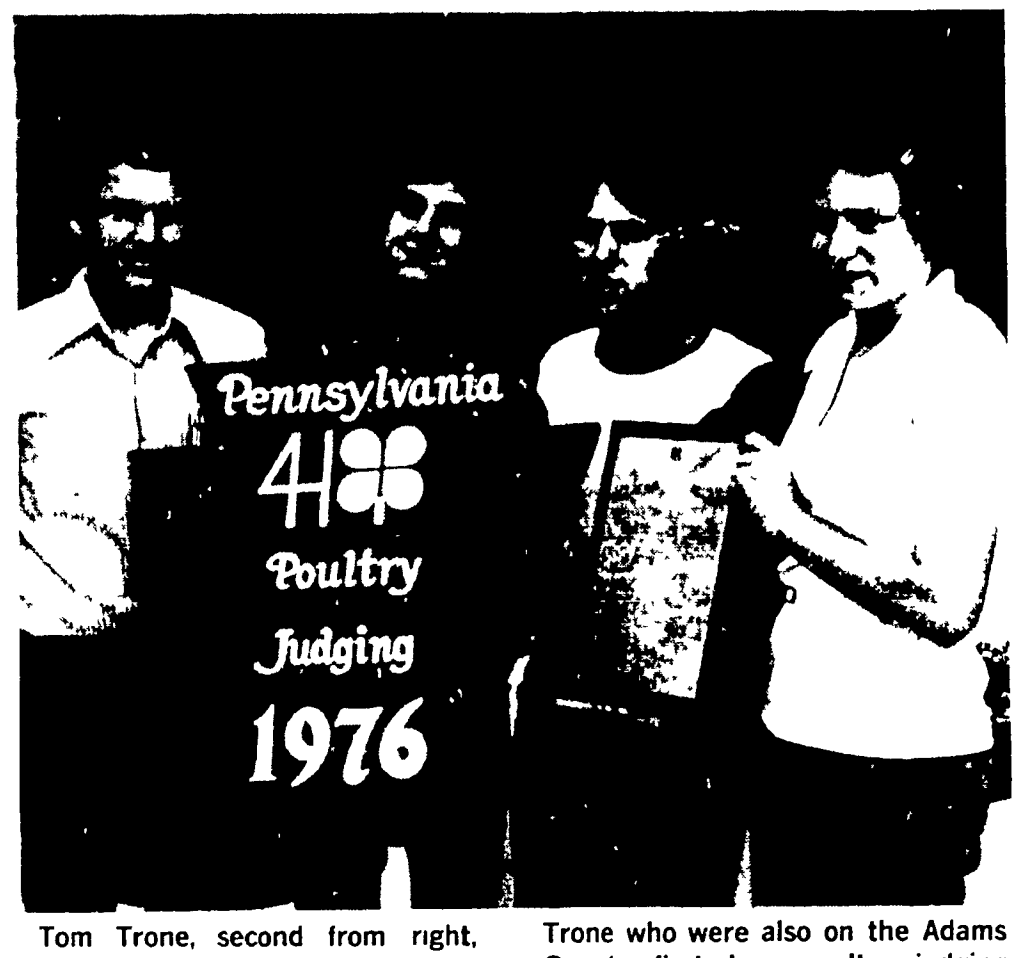
Blue ribbon demonstrations were put on by Sharon Brubaker, Beverly Hale, Tammy Smith, and Cynthia Woods. Gold medal demonstrations belonged to Dave Gundon and Melissa Weaver.

YORK COUNTY

Kathy Sunday and Brenda Warner, finishing second and third, respectively, paced the meats judging team to a third place finish. In dairy judging, the team placed tenth, with Paul Knight scoring the most points on the individual tally sheet for York Countians.

Tim Beck, David Wise and Donald Flory composed the second-place senior livestock judging team, while Christine Sunday, Dawn Musser and Brian Utz made up the second-place junior livestock judging team. Beck placed third in individual scoring for his group, and Miss Sunday was sixth in her state-wide category. The County's top vegetable judges were Paul Myers - who was cited for being tops in the state - and Megan Shaub. The team placed second.

York County's archery team also placed second, with Brooke Palmer being the high individual in the state. Blue ribbon demonstration winners were Karen Webb, Joyce Henminger, and Kathy Bortner. First place medal winners in that same contest were Jonathan Myers, Laurie Dobrosky, Tommy Welsh, Kay Swartz and Bonnie Wire.



Tom Trone, second from right, Adams County, was tied for first place in poultry judging, breaking a 30 year old record in that contest. Shown with him are Darlene Resh and Robert Trone who were also on the Adams County first-place poultry judging team At left is Adams County Extension agent Jared Tyson.

★★★★★★★★★★★★★★★★★★★★★★

The ins and outs of carpet cleaning

UNIVERSITY PARK — According to Extension Specialists at Penn State University, the consumer who wants a carpet cleaned is faced with three basic choices: do-it-yourself methods, professional in-home cleaning, and in-plant dry cleaning. Consumers with wall-to-wall carpeting must eliminate in-plant cleaning, reducing their choices to two.

Do-it-yourself methods include a range of options. Using a sponge to apply carpet shampoo, usually on hands and knees, is suitable for smaller, lightly soiled rugs. This method is slow and awkward for larger areas but certainly can be used.

Most other do-it-yourself methods involve rental of equipment. The least expensive machine you can rent is a two-brush upright rotary shampooer. This costs $1.00 or $2.00 a day plus a minimum purchase of shampoo. These machines will do the job of carpet cleaning fairly well, but can set off a vicious cycle by creating a sticky residue that clings to the carpet fibers attracting new dirt.

For between $12.00 and $15.00 for 24 hours the consumer can rent a soil extraction unit which cleans by injecting hot water vapor into the carpet under high pressure and then extracting most of this vapor along with the soil from the carpet with a wet pick up vacuum. This method is effective even with highly soiled carpets.

Another rental option in some areas is dry cleaning. The consumer scatters a special compound which consists of millions of tiny soft plastic sponges dampened with solvent, over a small area of the carpet to be cleaned. The area is then scrubbed with a double brushed upright machine. The total carpet is cleaned this way and then vacuumed when dry. Drying is the fastest with this method. Dry cleaning is especially effective in removing greasy soil.

The consumer who chooses to "hire-it-done" is also faced with an array of choices. In-plant dry cleaning is probably the most effective and is recommended when possible.

Most in-your-home professional cleaners produce very good results.

Steam cleaning and hot water extraction are probably the most common methods used by these dealers. Some offer the rotary brush method with wet shampoo and a few offer dry foam cleaning. Many dealers offer more than one method and decide which to use when they see a particular carpet.

In-home carpet cleaners charge around 12 cents a square foot. This charge may be higher in some areas, lower in others. In-plant cleaning may cost a few cents more per square foot then in-home cleaning.

Whichever method is chosen, cleaning should begin in a small inconspicuous area and the consumer should check results before proceeding.

As much furniture as possible should be removed from the area to be cleaned, and all draperies and curtains should be pinned up. Care must be taken to avoid soaking the carpet with shampoo. The carpet should be thoroughly dry before vacuuming. Home vacuum cleaners were not designed for wet pick up.

If furniture must be moved back into the newly cleaned area before the carpet is completely dry, aluminum foil or waxed paper should be placed under chair and table legs to prevent rust spots from forming and staining the carpet.

Lancaster Farming Photo by Dieter Kneg

This new building, just north of Lancaster along Route 72, and across from a corn field, is the new home for Central Tractor Parts, which has been a part of Lancaster County agribusiness for more than 15 years.

CT grows, moves

LANCASTER — A Lancaster County farm and home store — Central Tractor Supply — recently moved to a new location on the Manheim Pike, north of Lancaster. They had been located at 1590 Manheim Pike and are now at the 1570 address.

In making the move to a new building, the store doubled its sales floor space and is in a position to meet the growing needs of Pennsylvania agriculture. Manager Bob Lay, who joined the Iowa-based firm three years ago, noted that his store receives orders from from as far away as New England, Delaware, and western Pennsylvania. "We outgrew our old facilities," he explained. Among many other items, the store handles lawn and garden supplies, hand and power tools, clothing, toys, new and used tractor parts, paint, batteries, tires, electrical supplies, wagon boxes, wagon gears, and electrical fencing supplies.

Central Tractor Supply has 28 stores concentrated in the eastern, southern and central portions of the United States. The Lancaster store employs five men full time and one part time.

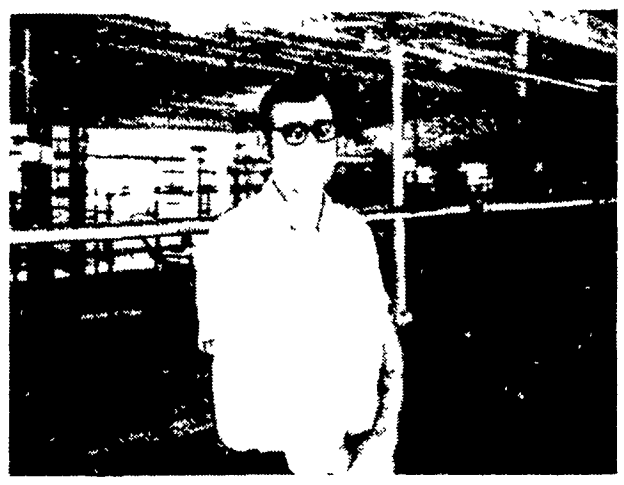
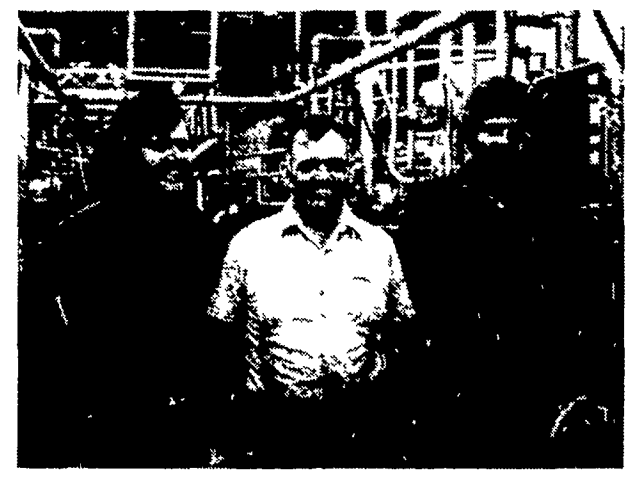
CUT FEED COSTS - MAXIMIZE PROFITS WITH PRO-SIL, THE SILAGE ACTIVATOR

HERE IS WHAT THE PRO-SIL USERS HAVE TO SAY ABOUT PRO-SIL



P. ROBERT WENGER
WENGDALES FARM
RD1, Quarryville, PA

Robert Says:
"I used Pro-Sil on all of my corn silage this past year. We are feeding 60 pounds corn silage, three pounds beet pulp and no hay. Our rolling herd average is 15,962 pounds milk, 615 pounds butterfat. I was well satisfied with Pro-Sil and I plan to use Pro-Sil again this fall."



MATTHEW, HENRY & DAVID YOUNG
RED KNOB FARM
RD2, Peach Bottom, PA

The Young's Say:
"We used Pro-Sil on approximately three-fourths of our corn silage crop in 1975. We fed 120 milking cows Pro-Sil treated silage for nine months and found it reduced our protein cost considerably. We intend to use Pro-Sil again this fall."

JAMES WEICKSEL
RD1, Christiana, PA

James Says:
"My cattle peaked four pounds milk better than before using Pro-Sil. Persistency level ran two percent higher than DHIA average figures. When I ran out of Pro-Silage this summer my milk production immediately dropped 75 pounds per day. I have now ordered my Pro-Sil for the third year."

Soybean loans revealed

WASHINGTON — The U.S. Department of Agriculture recently issued county loan and purchase rates for the 1976 crop of soybeans. The loan rates, which vary from county to county, are based on the national average loan rate of $2.50 per bushel announced Feb. 24, 1976. The $2.50 figure is an increase of 25 cents from the 1974 level; there was no soybean loan program in 1975.

Adjustments are made in individual county loan rates to reflect changes which have occurred in the historical average of soybean prices received by farmers and for shifts in production.

The announced loan rates are for soybeans of the classes "yellow" or "green" containing 12.8 to 13.0 percent moisture and which grade not lower than No. 2 on the factors of test weight, splits and heat damage, and not lower than No. 1 on all other factors.

Copies of the 1976-crop soybean county loan rates are being sent to the state offices of the Agricultural Stabilization and Conservation Service (ASCS) and will also be available from the Grains, Oilseeds and Cotton Division, ASCS, U.S. Department of Agriculture, Washington, D.C. 20250.

Combine 'screened'

NEW HOLLAND — "The Miracle Machine," an 18-minute color film that tells the story of how modern combines play a role in food production, has been released by Sperry New Holland.

The film takes the viewer on a round-the-world trip with a shopper who has volunteered to see how important the combine is to today's homemaker. She learns of the wide variety of crops the combine harvests, the investment a farmer makes in such a machine, and sees combines being built at plants in Europe and the United States.

In addition, the shopper visits with a custom combine operator and his family and gets a look at a new Twin Rotor Combine plant recently opened by Sperry New Holland at Lexington, Neb.

The film is available on a free loan basis through Sperry New Holland dealers or by writing to the public relations department at New Holland, Pa., 17557.

David Ketner of Hamburg showed an eight-year-old Swiss that took Grand Champion in the open contest for that breed. The animal is owned by Dr. Robert O. Snelling, Buttonwood Farms, Birchrunville, Chester County.

David Ketner also had the Supreme Champion Bull of the Allentown Fair.

Daryl Urmy, Coopersburg R1, is shown with his Brown Swiss. The animal took the Grand Champion award in the 4-H contest for that breed.

Allentown Fair pictures

Denise Andrien proudly shows her junior yearling that took Grand Champion in the 4-H Guernsey contest. Denise is from West Chester.

This champion ewe has something to make a little bit of noise about. Her owner, Julie Bow, exhibited her and a Dorset ram to high placings, and on top of that, the young lady came away with top ribbons for showing and fitting.

The champion pen of three market lambs belonged to Julie Bow of Annville, center. Helping her hold the winning trio in place are Melanie Bow, right, and Irene Brown. She exhibited her Suffolks at the Lebanon Area Fair.

Lebanon Fair pictures

Nicole Emrich with her champion ram, a horned Dorset. The young lady from North Annville also had the champion ewe in the show, which was held Wednesday at the Lebanon Area Fair.

Lickin' Good

Nutrena Controlled Release CLS—
so different, it's patented

Your cattle will like Nutrena Controlled Release CLS and you'll like the benefits behind this new development in liquid supplements. The patented process controls the release of protein-building ammonia nitrogen in the rumen compared with a conventional urea-based liquid supplement. This improves the feeding efficiency of the urea. And, the slow-down means an extra margin of safety from urea toxicity—that's important when self-feeding liquid supplement.

Nutrena Controlled Release CLS liquid supplement—a product of Cargill research. It's great for dairy herds as well as beef cattle on range, pasture, stalks, stubble or in the feedlot.

feeding programs you can believe in

Publicity strategy announced

LANCASTER - The Lancaster County Farmers Association met here at the Farm and Home Center on Monday night to continue making plans for the publicity effort to be staged at Park City in October.

"Telling the Farmer's Story" has been chosen as the theme for the PR program which will concentrate on eight prime areas of agriculture. The various displays, which include dairy, poultry, beef, swine, machinery, fruits, vegetables, crops, soils, rural family life, and PFA programs, will be set up throughout the eight malls which make up the huge Park City complex. In addition to display panels and still-life representations of American agriculture, the LCFA is also planning on having live animals on hand. The various categories of agriculture will be shown in separate areas of the Mall, with personnel on hand to explain each presentation. Some professionally produced placards will also be available. A central display will be erected around the main fountain.

Scheduled to take place during the third week of October, the PR effort is being spearheaded by Earl Newcomer, president of the LCFA, Helen Wivell and Ruth Shertzer.

WHAT OPEN DATES REALLY MEAN

To help you on your next shopping trip, here are some tips as to what the dates on open dating mean: Pack date is the date the product was finally processed or packed.

Pull date is the last recommended day of retail sale that allows you enough time to store and use the product safely at home. The pull date is, therefore, the date the item is to be pulled from the store shelf if unsold.

The quality assurance date is the date after which the product is not likely to be at peak quality. Examples of wordings are: "for maximum enjoyment, use before . . . ," or "best when used by . . . ," and the date.

The expiration date is the last day the product should be used if you want good quality. It's the end of the product's useful life and is generally expressed in the words, "do not use after . . . " and the date.

Read announces the birth of a new 20-year-old bin.

After 20 years, we've developed the most improved bin the industry has ever offered. Practically everything has been redesigned. The cutaway view below shows standard features as well as options. In addition, the best features of all our different previous models are now available in one, the single most flexible bulk feed bin anywhere.

Nowhere can you find the number and quality of components to put together such an economical standard bin. Nor as many options as for Read's automated system to fit your precise needs.

Get in touch with your Read dealer today or call us for a free brochure on this revolutionary new bin. Read reliability. The standard others follow.

Eastern Pork Producers celebrate pork day

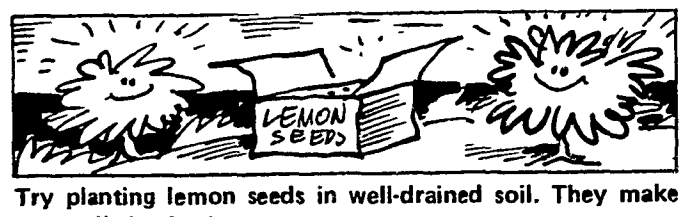
By JUDY MITCHELL
Berks Co. Reporter

KEMPTON - The 14th annual Pork Day celebration sponsored by the Eastern Pork Producers Association got under way at 5 p.m. at the Kempton Community Center on Aug. 8, with over 3000 pork chops on hand to feed an estimated crowd of 1000 persons. Although the attendance figure at the Association's major promotional event of the year was slightly depressed by the rains which continued throughout Saturday, by 7 p.m. the pork growers had served up close to 2600 chops to an approximate 900 diners.

The "all you can eat" meal was only one feature of the gala event which also included a sauerkraut-stuffed pig roast, dance music provided by "The Top Hats," and a diaper-the-pig event staged by Association members.

The public was invited to participate in several competitions including a ham raffle and guess-the-piglets-weight contest, but the major contest event was the barbecue pork competition won by Donald Singer of West Reading. Singer's preparation of his "Savory Pork Pinwheels" earned him the title of 1976 Barbecue King and a gas grill donated by the Agway Corporation.

Donald Singer of West Reading won the title of 1976 Barbecue King at the Pork Association's major promotional event of the year with his preparation of Savory Pork Pinwheels.



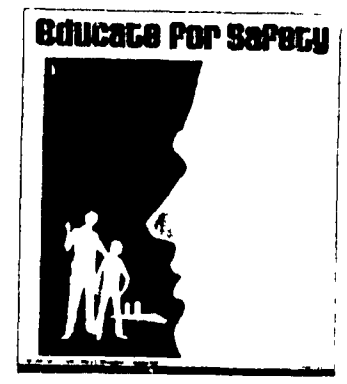
Try planting lemon seeds in well-drained soil. They make pretty little shrubs.

$33-billion loaned

WASHINGTON, D.C. - Loans made to farmers and farmer cooperatives totaled $33 billion during the year ending June 30, according to figures released last week by the Farm Credit Administration.

The $33 billion in loans made represents an 8.6 per cent increase from the $30.4 billion in loans made the previous year. Loans outstanding through the System totaled $34.9 billion at June 30, a 16.7 per cent increase from the $29.9 billion of a year earlier.

The lending institutions of the Farm Credit System include the Federal Land Banks, which make long-term loans through local Federal Land Bank Associations; Federal Intermediate Credit Banks, which provide loan funds for local Production Credit Associations, the System's short- and intermediate-term lenders; and the Banks for Cooperatives, which finance farmer cooperatives. The Farm Credit Administration is an independent Federal agency which supervises the System.



Declare Your Independence Guarantee Your Market

We at Producers Pride aren't trying to start any revolutions. But if you're an independent egg producer—or if you'd like to be—we can help you get the kind of freedom you want without jeopardizing your income.

Producers Pride is a cooperative. It's owned and controlled entirely by producers who want a voice in how their eggs are marketed. We've been in business since 1932. For over 34 years, Producers Pride members have been getting paid every week for their previous week's egg shipments. We have never, ever missed a week.

When you join Producers Pride, you become part owner of the business. And since we're not a giant co-op, your voice as an owner is important.

You'll be joining a small organization—fewer than 200 producers—but we have the volume to service a growing market. And our markets are growing, thanks to the dedicated efforts of a small but hard-working and very capable staff.

We are your friends and neighbors in the egg business. We enjoy being independent, and we enjoy having a guaranteed market for our eggs.

This is the year for independence, and Producers Pride is looking for a few more good members. If you'd like more information, put your John Hancock on the coupon below and mail it.

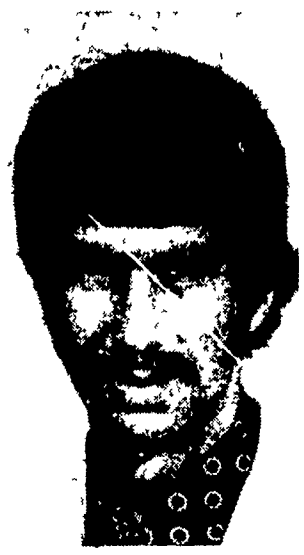
Agway names area farm consultant



David McCoy

LANCASTER - David McCoy, Carlisle, R2 has been named a farm consultant for Agway Inc., for the south-central Pennsylvania area, it was announced this week by Margaret Hill, farm planning manager.

McCoy's territory will include the counties of Perry, Lancaster, Adams, Franklin, and part of York.

As farm consultant, McCoy will assist Agway farmers with financial planning, accounting, tax matters, estate planning, and other management practices.

McCoy earned his M. S. in agriculture from Ohio State University, and this year was named an Outstanding Young Man of America by the Jaycees.

Agway Inc., a farm supply and food marketing cooperative owned by 118,000 member-stockholders, serves agriculture in 12 northeastern states. Its headquarters are in Syracuse, N. Y.

"A Good Credit Rating May Sound Old-Fashioned But We Think It's Something You Can Be Proud Of."

by H Glenn Nelson
Senior Vice President

If you're like most people, you probably think the only way you can get a personal loan is by proving you don't really need it.

But take it from me, a loan officer, it's not that way at all.

When you need a loan, we're here to help you get it. After all, if we can justify a loan to you it's good business for the bank.

Qualifying for a loan

Yes, we'll ask you to complete an application. Ask why you want the loan and make sure you'll be able to repay the loan in regular monthly installments. Because it's not the bank's money we lend. Our job is to lend our depositors' money at a profit.

Our experience can help you

Credit isn't hard to obtain. But knowing how to manage available credit is important. That's why Farmer's First has more than just money to lend. Our staff of qualified loan officers will help you obtain a loan tailored to your individual needs with a repayment schedule that best fits your income.

When to see us for a loan

Whenever you need some extra cash for any good reason, think of Farmers First Bank. We have nine locations with evening hours to fit your lifestyle and loan officers to personally serve you.

And remember, we're here to help you. We'll make getting a loan and repaying it as easy for you as possible.

If you want fancy type with good production, COMET and his son, HUBER, will fill the bill. COMET offspring have done well in showrings across the country and we expect the same will be true of HUBER's daughters. Siring tremendous udders is their trademark. Daughters have high, wide rear udders and smooth fore udder attachments. To take advantage of the fine type this father and son can sire, order semen from Select Sires today.

ANOTHER DEVELOPMENT FROM

MASTER MIX RESEARCH

NEW **Ensil-ate™**

The Silage Preservative With A Real Difference

$2 invested for ENSIL-ATE per ton of silage stored can return $6 per ton in added feeding value

WHAT IS IT?

ENSIL—ATE is a silage additive designed to

- Reduce Rancidity
- Prevent Oxidation and Over-Heating
- Inhibit Mold Growth
- *Increase Palatability of any Ensilage*

ENSIL—ATE has its own feed value!

Protein 11 percent - Fat 2 percent - Fiber 35 percent

ENSIL — ATE Adds Highly Digestible Protein and Fiber in the form of ground soybran flakes

ENSIL—ATE is perfectly safe to use and contains only all-natural proteins

ENSIL—ATE is backed by leading experimental stations as well as Master Mix Research

HOW IS IT USED?

ENSIL—ATE requires no additional equipment

It should be added to your silage at the rate of 10 lbs. per ton. Packaged in 50 lb. paper sacks, each bag will effectively treat 5 tons of silage. Simply spread the bag on the silage wagon before or during filling.

REMEMBER — You can mix 10 lbs./ton easier and more thoroughly than 1 lb./ton of silage that most additives require. ENSIL—ATE can also be added as the silo is being filled.

FOR MORE DETAILS ON HOW YOU CAN GET AN AVERAGE ADDED RETURN OF $6 FOR EVERY TON OF SILAGE YOU PUT UP THIS FALL, CALL OR VISIT YOUR MASTER MIX DEALER TODAY!

YOU'LL BE GLAD YOU DID!

Swedish girl dreams of buying a farm in the United States

By SALLY BAIR
Feature Writer

Gertrud Stiefler would like to buy a farm in the southern part of the United States and raise beef cattle With the advent of greater equality for women, this may not sound so unusual, but Gertrud is fourteen years old and is a Swedish citizen

Gertrud divulged her plans for the future as we visited in the kitchen of the Jesse G. Balmer home at 672 Millway Road, Lititz. The Balmers hosted Gertrud for two weeks through an exchange program worked out through People-to-People International.

The young, determined Swedish girl spent the past six weeks in this country, living first with the Dr Richard Smalley family in Meadowbrook, outside of Philadelphia. Gertrud and Barbara Smalley have been pen pals for a year and a half through another program sponsored by the People to People organization.

Gertrud has wanted to buy a farm in this country for some time, and she says it with such conviction that it does not seem like such an impossible dream. Before she decided on farming, she said, "I wanted to be a cowboy."

Gertrud shows her love of animals while fondling Connie Balmer's 4-H animal.

She said the United States is well-known in Sweden

"We talk very much about the United States and in school we learn American history, English, and American geography," she explained

She also added they read books about the United States and see American movies and television shows She has studied English for four years in school, and speaks it with great ease, since she really applied herself because she wanted so much to come here

In order to visit this country, she saved all the money necessary to finance the trip She earned it, not surprisingly, by working on a farm at her family's summer home in Denmark She said, "I picked potatoes, cherries, and vegetables, and I drove the tractor to bring in bales "

Gertrud acknowledges that she is a little different from her friends who "want to spend all their money."

She says, "I saved all my money and I had more than anyone else in my family." She explained that her mother bought her the few clothes she needs, and since she is thrifty, she saves everything she earns

'It was arranged for Gertrud to visit the Balmers because of her great interest in the farm, despite the fact that she does not live on a farm herself. Gertrud's father is a physicist who works for the government, and her mother is a head nurse at a clinic. She has a younger sister, age 11, at home and a sister, 24, who is studying in Denmark to be a nurse. The family lives outside the city of Lund.

The Balmer family received a "hospitality and hosting" award from People-to-People International for opening their home to Gertrud. The Balmer children include Jesse, 24, and Cindy, 23, both married, Cheryl, 19, Carol, 15, Connie, 14, and Jeffrey, 4 months.

In Lititz she has learned to farm, Lancaster county-style. She helped top tobacco and said, "I got dirty, but I don't mind that."

She has helped with the milking and helped clean the stable and has even driven the tractor. A favorite activity is just spending time with the Balmers' Guernseys, and

(Continued on Page 53)

Gertrud Stiefler, a visitor from Sweden, plays with one of the kittens at the Jesse G. Balmer farm.

Homestead Notes

Gertrud points out her home town in Sweden to Mrs. Balmer.

Carol, 15, Gertrud and Connie, 14, have a discussion on the porch steps at the Balmer home.

My Thoughts and Welcome to Them

(With apologies to James Thurber)

Well, it's fair season again. Actually, fairs started several weeks back, but with the advent of the Lebanon Fair last week, it really felt like they had come to stay.

Fair season is going to take on a new light this year. Other years it meant spending money on the ferris wheel, greasy french fries, cotton candy, and the games of chance. Now it is going to mean learning to know the names and personalities of top winners, the names and attributes of top animals, and the top quality aspects of every fruit and vegetable in the book!

Last week's fair was a great example Even through the rain in the beginning of the week, the main show building was full of people checking how their exhibits compared with the others, or for non-exhibitors, how their fruits and vegetables at home in the garden compared to the prize winners

And, there was the usual good cheer that goes along with fairs, even in the rain "Step high and look where you're walking," cautioned one well-meaning farmer as I entered the poultry tent to capture the top rooster there in a haughty pose for posterity

Family togetherness also was evident as parents and brothers and sisters rooted other family members on at the dairy shows

There's no doubt about it, fairs and farm exhibits are a real highlight of the summer and fall season, and I'm looking forward to viewing them from my new angle of farm reporter

Farm show activities scheduled

KUTZTOWN - At the Kutztown Fair, "the Biggest Little Fair in the State" the daily farm show activities rank high in farm showing across the Commonwealth

This year's activities begin on opening day, Monday, August 16 Then, the Eastern District Holstein Show takes place and on Tuesday, August 17, starting at 12 noon, sheep judging including sheep blocking and grooming will occur Later on that same day the judging of sheep fitting and showmanship as well as type judging will take place In the evening there will be a dairy fitting and showmanship contest

On Wednesday, August 18, in addition to a tractor pulling contest, there will be a judging of Holstein dairy cattle as well as the judging of colored dairy breeds

Thursday, August 19, sets the stage for the swine judging, the swine fitting and showmanship contest, and the judging of market swine Later that same day will be the beef fitting and showmanship contest as well as the judging of market beef cattle

Friday, August 20, will be the younger generation's day to perform Starting at 9 a m will be the FFA dairy and livestock judging contest and at 1 p m will be the FFA tractor pulling contest The evening will be devoted to the 4 H dairy judging events

In addition to these animal husbandry contests will be the agricultural displays where both the youngsters and their parents will be competing not only for cash prizes and ribbons, but also for trophies as well

Granges will be competing for prizes, and the judging will be based on quality, variety, and display The Junior Grangers competition for prizes will be judged on theme, display, and quality

People who are released from the land by an efficient agriculture do not make a nation wealthy automatically If all the people can do is weave baskets, the people and the nation will not become affluent They need education to become doctors, musicians, bankers, teachers, and computer technicians

Ida's Notebook

Ida Risser

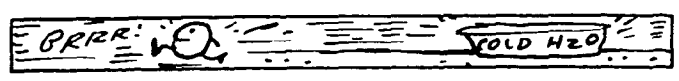
The middle of Summer and the fields of corn are very tall, and we are thankful that they shut out some of the noise of the highway which is one-half mile away Folks who come here to buy sweetcorn or beans find that it is very peaceful and quiet here compared to their surroundings

About a year ago, I had to climb a fire escape stairs to a photographic studio on the third floor of an old building in Lancaster. From that point, the view was one of roof tops and an occasional tree. I found the scene quite unsightly, even ugly. Also I am reminded of the day when my daughter came home from distributing pamphlets for her school club in town and told me that this experience made her realize the fact that she wouldn't want to live in a large town.

As I sit here, I can see and smell the new mown hay as Philip rakes it for baling He has just returned from his flight to Indianapolis and his first opportunity to sail on a lake He also saw the Cincinnati Reds play and visited a large amusement park He is glad to be back on the farm again

This summer, Judy is so busy that she barely has time to hear the locusts sing and watch the ducks and geese swim on the river You see, she works the night shift at a local plant and therefore must sleep during the day. And, in order to have spending money at Penn State this fall, she has a second job as a sandwich girl on the weekends.

But Sunday afternoon is that special time to relax and enjoy what we have right here at home.



To get more lemon juice, soak the lemon in cold water before squeezing

Sept. milk price set

ALEXANDRIA, Va Market Administrator Joseph D Shine today announced a Class I milk price of $11 49 per hundredweight for September 1976 and a July Class II price of $8 76 for the Middle Atlantic Marketing Area The Class I price is up 39 cents from August and $1 36 from last September The Class II price increased 53 cents from June and is also $1 36 above last year Order No 4 prices are announced for milk testing 3 5 percent butterfat, f o b plants located within 55 miles from Philadelphia, Pa and also within 75 miles from the nearer of Washington, D C , or Baltimore, Md There is a six-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia

Mr Shine stated that the September Class I price and the July Class II price are based on the July 1976 Minnesota - Wisconsin manufacturing milk price of $8 71 per hundredweight for milk testing 3 5 percent

The USDA reported July 1976 wholesale Grade A butter price at Chicago was $1 06 per pound while the nonfat dry milk price was $ 63 per pound, f o b Chicago

Swedish girl

(Continued from Page 50)

she helped Connie and Carol prepare their cows for 4-H Round-Up

Gertrud said she is having a "great time" in this country, and finds the people here "much more friendly."

It is easier to talk to them, and there are so many different kinds of people," she explained. "It is exciting to meet people and get to know them," she continued.

This is not the first time Gertrud has traveled. Her mother is Danish and her father is German, and every summer they vacation at their summer home in northern Denmark, where her grandmother lives. As a family they have traveled to Italy, Germany, Holland, Belgium, and have a trip to Greece planned for next summer.

Gertrud explained that Sweden is about half the size of Pennsylvania and has eight million people. It lays much further north than this state, and "is a bit cooler there than it is here. It is cool at night." With that, she said she has had trouble sleeping on these hot humid Lancaster County nights.

Central and eastern Pennsylvania remind her much of her native Sweden, with some distinct differences. "All your houses are different," she noted. "Where I live 80 houses will be exactly the same."

She also noticed that things are more expensive in Sweden than in this country. Food and clothing are expensive, she said, and Mrs. Balmer, who visited Sweden on a People to People trip, agreed that the high prices of food had been a surprise to them.

Food itself offered some surprises for Gertrud. "We never eat cookies!" she exclaimed.

She added later that perhaps other families eat sweets, but her family does not eat very many sweet things.

"We don't have corn and we don't have hamburgers, and we don't eat as much ice cream," she explained.

Nevertheless, food is almost the same. Her family eats three meals a day, Gertrud said, with the addition of a small meal at 4 o'clock. For breakfast they eat cold cereal or porridge or open-faced sandwiches. Lunch is eaten at school, where she gets a hot meal. The 4 o'clock meal is coffee, sandwiches or cookies, and in the evening the family has a simple meal of open-faced sandwiches.

Gertrud says her day starts around 7:00 a.m. and her school begins at 8:20. She goes by bus to her school. There is a lunch break at 11:00 a.m. and school ends at 3:40 p.m. She said there is not much homework given unless you don't accomplish enough work during school.

Typically, she said, "I don't like homework."

She gets home around 4:15 p.m. and eats a sandwich. Her mother returns from her job at 6 p.m. and after dinner the family watches television and talks. She said she usually retires about 9:30 at night.

Mrs. Balmer said Gertrud has shown an interest in old things, and Gertrud explains that in her home many things are old, because they were handed down. She said her family lives simply and likes to have comfortable things. Their home in Denmark, she said, is over 150 years old and has no electricity. It has very low ceilings, a thatched roof and an outdoor toilet. It is obvious that going without these amenities doesn't concern Gertrud at all.

Gertrud said wages were high, and explained that in Denmark, where she worked on the farm, she earned $4.00 per hour. None of this is taxable because she is under age. However, taxes in Sweden are very high, with many services being provided for the citizens at low cost.

Eighteen is the age of adulthood in Sweden. At that age young people learn to drive, they can vote and they can buy alcoholic beverages. Gertrud said, however, that her father has already taught her to drive a car and she knows how to drive a tractor.

There is no shaking her goal of buying a farm and living in this country eventually. She said she wants to live here because I like the people more. I like the country and the climate. I have always wanted to."

She knows that "it takes time to learn" to raise beef cattle. "It is much harder than it looks." But that does not matter. She is willing to learn. She said of her friends that all they are interested in are clothes and motorbikes. Of herself she said, "I want to learn everything."

In Sweden young people go to school for nine years and then make the decision regarding higher education or a career. Gertrud does not plan to attend college. Despite her zest for "learning everything," she said, "I can't see any sense to studying how to farm. You just need to go and learn it while working and doing it."

It is obvious that she is determined to make good as a farmer in this country. She has now returned to her country and has two years of school and many years of saving before she can make her dream into a reality.

Asked if she would consider marrying an American farmer she said frankly, "I would like to marry an American or a Dane." Not a Swede. "No," she replied, "Danish men are more like Americans, they are friendlier and easier to talk to. Americans are much more handsome."

This visit to the United States was not a trial run. She admitted that she had changed her mind somewhat about the United States, but not about her decided goal. For some reason, she said, she had expected to be more excited about being here - but she was not disappointed.

"I just thought it would be much more different," was her explanation.

Gertrud is a mature 14-year-old with a firm determination. It may take a while, but there is little doubt that sometime, somehow, she will be farming in the south - and will probably be a great success at it.

Health foods not so special

UNIVERSITY PARK - Valuable food money is being spent for so-called health foods. Extension foods and nutrition specialists at Penn State University point out that the so-called health foods usually are just ordinary foods.

No single food or a combination of foods have any health-giving properties other than the nutrients they provide. For example, wheat germ is a concentrated source of protein, iron, vitamin E and some B vitamin. It has no health-promoting qualities other than these nutrients.

Alfalfa leaves, like many other green leaves are rich in carotene and in some other nutrients. But alfalfa's high fiber content makes it more suitable for animal feeding than for human use, according to the extension specialists.

Rose hips, another so-called health food, are high in vitamin C but have no unusual properties. Sunflower, sesame, pumpkin, and squash seeds vary in nutritive value. They are relatively high in fat content and have more fiber than most foods. These seeds have no unique health-promoting properties.

There have been several requests lately from readers asking for help from the recipe exchange One reader would like to know a good, family-tested recipe for funnel cake Another would appreciate help with a pepper cabbage recipe Another reader has made a request for a candy recipe that takes crushed corn flakes, peanut butter, and butterscotch morsels that are dropped by teaspoonfuls onto a cookie sheet. She says when she tried making this candy without a recipe, she ended up with "a bowl of crumbs instead of pieces of candy." So if anybody has good recipes for any of these requests, send them into **Lancaster Farming** and they will be forwarded to the persons making the request.

Chocolate Cake

2 cups sugar
1 cup lard
2 eggs
1 cup sour milk
½ cup cocoa
2 ½ cups flour
2 teaspoons baking soda
½ teaspoon salt

Beat.

Boil one cup water and add. Beat again.

Bake at 375 F for 25 to 30 minutes.

Mrs. Esther Long
Lenhartsville, Pa.

Miniature Cheese Cake

1-½ package cream cheese
two-thirds cup sugar
3 large eggs
1 teaspoon vanilla
Vanilla wafers

Place first four ingredients in mixer bowl and beat until smooth Place vanilla wafers in small cupcake papers Fill to top with cream cheese mixture Bake at 350F for 20 minutes Cool Place cherry from pie filling on top of each Makes 32 - 40 cakes

Shoo-Fly Pie
With Wet Bottom

4 cups flour
1 cup lard -

Mix together. Take out two cups crumbs and add:

two-thirds cups flour
two-thirds cup granulated sugar
1 teaspoon baking powder

The balance of the top three ingredients makes the pie crust.

Bottom For Shoo-Fly:

1 egg
1-½ cups molasses
1-½ cups warm water - or good strong coffee
1 teaspoon baking soda

Pour into pie dough and then add crumbs. Bake at 375 F for 30 to 35 minutes or until done.

The coffee gives them a good taste and gives a darker bottom.

Mrs. Esther Long
Lenhartsville, Pa.

Fresh Peach Crumb Pie
(9 inch deep dish)

5 cups sliced peaches
1 cup sugar or less
4 tablespoons Minute Tapioca
3 tablespoons butter
1 tablespoon vanilla extract
2 tablespoons lemon juice
¼ teaspoon almond extract
½ teaspoon nutmeg
1 tablespoon cinnamon
½ teaspoon cloves

Mix all ingredients Place in unbaked pie shell Cover with crumbs.

CRUMBS

1-¼ cup flour
½ cup butter
½ cup sugar
½ teaspoon cinnamon

Mix with fork or pastry blender. Bake at 400F for 45 minutes.

Nancy Bilyk
Beluidere, N.J. 07823

No Bake Cookies

2 cups sugar (granulated)
4 tablespoon cocoa
1 stick butter
3 cups quick oatmeal
½ cup milk
1 cup peanut butter
1 tablespoon vanilla

Heat sugar, cocoa, butter and milk on medium heat and boil for one minute. Add peanut butter, vanilla. Take off stove. Add oatmeal, beat. Spread mixture out on waxed paper-lined cookie sheets to about one inch, and cut into squares. Coconut may also be added.

Mrs. Charles Biehl
Mertztown, Pa.

Blueberry Sugar Cake

1 cup sugar
½ cup shortening
½ teaspoon salt
3 eggs
2-¼ cup flour
2 teaspoon baking soda
1 cup milk
½ teaspoon cinnamon
1 cup blueberries

Mix shortening and sugar. Add salt, then eggs. Add flour, baking soda, and cinnamon. Beat in milk until satiny. Fold in blueberries. Fill muffin tins two-thirds full Bake at 400F for 20 - 25 minutes

Nancy Bilyk
Beluidere, N J. 07823

Shoo-Fly Pie Cupcakes

CRUMBS

3 cups flour
1 cup sugar
½ cup shortening
½ teaspoon salt

Mix and take out 1 cup for topping

BOTTOM

1 cup molasses
1 teaspoon baking soda
½ cup boiling water

Mix liquid with baking soda and combine with dry ingredients Fill cupcake paper two-third dull and top with crumbs Bake in 350F oven for 25 minutes or until done

Paul Eck
Mertztown, Pa.

Black Joe Cake

2 cups brown sugar
½ cup shortening (scant)
2 eggs
½ cup sour or buttermilk
2 cups flour (sifted)
4 teaspoon cocoa
1 teaspoon vanilla
1 teaspoon baking soda
½ cup of boiling soda
½ cup of boiling water

Cream sugar and shortening thoroughly Blend in beated eggs Add sour milk alernatley with flour and cocoa Stir in vanilla For the last step, add the baking soda dissolved in the boiling water Bake in two 8 in layer

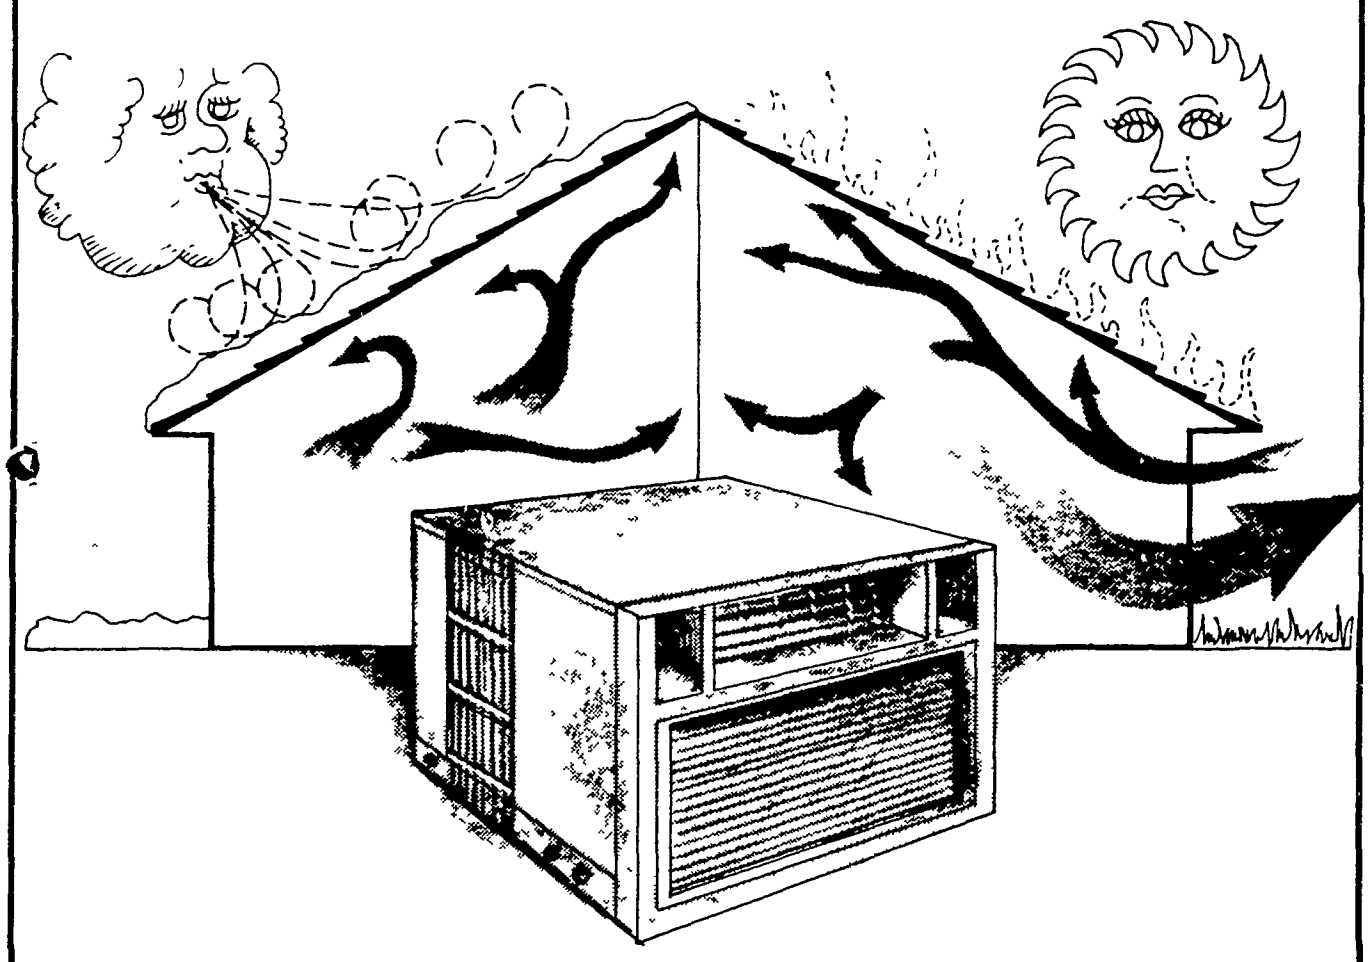
A New Concept In Home Building...

for people planning to purchase an electrically heated home

Saving energy and money is important these days and will be even more important in the future. That's why PP&L is introducing the "Energy Efficient Home Program." Working with participating builders, PP&L has established standards of home construction for such things as insulation and sheathing . . . windows and doors . . . water heating . . ventilation . . . plus home heating and cooling which includes the modern electric heat pump



Heating and Cooling in one efficient and compact unit

Chances are, you've heard about heat pumps lately. And for good reason. In cold weather this unique system actually "extracts heat" from outside air to heat your home. In summer, the process is reversed and heat is "pumped" from inside your home to cool it. The result? Clean, quiet and dependable comfort, year-round.

Installing a heat pump and air distribution system today will provide you with many options for the future, too. For example, solar energy equipment or a fuel-fired furnace can be combined with the heat pump to expand your future energy options and help keep your heating costs at a minimum.

That's why, if you're thinking of a new electrically heated home, it'll pay you to look for one that qualifies for the Energy-Efficient Home Award. It's your assurance that you'll be getting the most practical energy-saving features in home building today.

PP&L Award — Energy Efficient Home

If your builder is not familiar with the requirements of an Energy Efficient Home, call PP&L

Ask for a residential consultant who can supply you with materials and equipment specifications and builder information

Raw Fruit Pies

1 quart fruit or berries
1 cup sugar
1 cup water
4 level tablespoons clear jell
1 cup water
Pinch salt
1 level soup spoon gelatine
¼ cup water

Arrange berries or fruit in baked pie crusts Heat sugar, 1 cup water, and a few berries Thicken with 4 level tablespoons clear jell, 1 cup water, and pinch salt Take off stove and add 1 level soup spoon gelatine which has been soaked in ¼ cup water If prefered, beat ½ cup cream and add to above mixture when partly cooled and pour over the berries in the crust to make 1 large or 2 eight-inch pie plates

Maryland field days slated

COLLEGE PARK, Md. — "Weather-watchers" on the Delmarva Peninsula might well profit from attending two University of Maryland crops and soils field days scheduled in consecutive weeks this month on the Eastern Shore.

The double-barreled educational showcase of agricultural research should be of special interest to farmers on Maryland's lower Eastern Shore, notes Joseph L. Newcomer, Extension agronomist at the University of Maryland in College Park.

Newcomer is coordinator for the third biennial agronomy and horticulture field day scheduled Aug. 26 on the university's crops and soils research farm at the Maryland Correctional Institute's Poplar Hill camp. The farm is located 12 miles west of Salisbury along highway 349 (Quantico Road).

Next week, a similar field day has been announced for University of Maryland research plots at the Wye Institute in southern Queen Annes County. Both field days are being sponsored by the University's Maryland Agricultural Experiment Station, headquartered here.

Unique to the Poplar Hill field day will be herbicide studies with two horticultural crops — tomatoes and blackberries. The tomato research will be one of the tour stops, and the blackberry herbicide research can be observed as the tour wagons pass by.

Features which can be seen only at the Wye Institute field day include an observation plot depicting the history of corn, studies on potassium response in corn, forestry demonstration plots, a women's program, and variety plots of kenaf, a tall-growing fiber plant being tested as a possible substitute for paper pulp.

Two agricultural organizations will also be holding summer meetings and crab feasts in connection with the Wye Institute field day. They are the Maryland Agricultural Commission and the Mid-Atlantic Soybean Association.

The Wye Institute is located seven miles northeast of Queenstown, or 4¼ miles south of U.S. highway 50, on the Carmichael-Wye Neck Road. Format for the field day activities on Aug. 17 will be similar to the time schedule at Poplar Hill.

Junior Cooking Edition

Lancaster Farming is getting some really delicious-sounding vegetable recipes in now from the Junior Cooks. However, until a few more arrive, the late-coming picnic recipes from last month will be printed. They are still good and can be tried out at family reunions and other August picnics.

Looking ahead to September, some good recipe ideas would be those which have apples in them. If you get these recipes in early, you have a better chance of getting them printed, although recipes are appreciated any time.

Have a nice day.

Hamburger Casserole

2 lb. ground beef browned in butter
1 onion, chopped
Salt and pepper to taste
1 can cream of chicken soup
1 can cream of celery soup
2 soup cans of milk
6 slices bread, cubed

Mix together and put in 2 quart greased casserole. Bake at 350F for 50 minutes.

Ruth Elaine Burkholder
Cochranville, Pa.
Age 10

xxx

Vegetable Meat Dish

Peel and slice potatoes, onions, and carrots very thin. In a buttered casserole, place a layer of potatoes, a layer of onions, a layer of raw ground beef, and a layer of carrots. Over this, pour some tomato soup. (To get the mixture, combine one can of tomato soup with ¼ cup water.) Then, repeat the procedure until the casserole is full. Pour remaining soup mixture over the casserole and bake at 350F.

Rachel Fisher
Ronks, Pa.
Age 12

xxx

Chicken Salad

3 cups diced cooked chicken
1½ cups celery
3 hard boiled eggs
3 sweet pickles
1 teaspoon salt
⅛ teaspoon peper
two-thirds cup mayonnaise
3 tablespoons cream

Anna M. Nolt
Leola, Pa.

xxx

Frozen Cole Slaw

1 medium head cabbage
1 large carrot
1 green pepper
1 small onion

Shred together, then add one teaspoon salt and let stand for one hour.

SYRUP:
1 cup vinegar
¼ cup water
2 cups sugar
1 teaspoon celery seed
1 teaspoon mustard seed

Boil for one minute and cool. Drain off water from cabbage and add syrup. Mix all together. Mixture can be frozen and refrozen.

Pineapple Cream Cheese Salad

1 can crushed pineapples (drained)
2 boxes lime jello
2 packs instant whipped topping
1 (8 oz.) cream cheese
3 cups liquid (pineapple juice or water)
1 cup sugar
4 tablespoons flour
4 egg yolks

First combine pineapples and jello and let set. Next, combine whipped topping and cream cheese. Then cook until thick, liquid, sugar, flour, and egg yolks. Place three layers on top of each other and serve.

xxx

Quick Root Beer

2 cups white sugar
1 gallon luke warm water
4 teaspoons root beer extract
1 teaspoon dry yeast

Put in jars, cover, and set in sun for four hours. Chill before serving. Ready to drink next day.

Eggnog

4 eggs
4 tablespoons lemon juice or diluted vinegar
4 cups milk
½ cup cream
⅛ teaspoon nutmeg
⅛ teaspoon salt
one-third cup sugar

Beat eggs until thick and lemon colored. Add sugar, nutmeg, and lemon juice. Add ice cold milk and cream. Beat with a rotary beater until frothy. Makes 6 large glasses.

Mary Peachey
Newmanstown, Pa.

xxx

The United States is an excellent example of this direct relationship between agricultural productivity and affluence. We require only 4 percent of our population to grow our food; 96 percent of the people can use their time to produce something else. Only about 17 percent of our disposable income is spent for food; 83 percent of our income is available to spend on other things.

4-H members set drive for voter registration

COLLEGE PARK, Md. - August has been proclaimed as voter registration month by Governor Marvin Mandel on behalf of an ambitious "Get Maryland United" campaign being conducted by 4-H members throughout the Old Line State.

The 4-H program is the youth education arm of the statewide Cooperative Extension Service, headquartered on the University of Maryland campus at College Park.

Voter registration is the second major Bicentennial Year project resulting from the Maryland 4-H Continental Congress, which met one weekend last November at the State House in Annapolis.

Prelude to the voter registration project was a statewide horseback trail ride late last month from all corners of Maryland, which carried artifacts from every county and Baltimore city. These artifacts were placed in a time capsule on July 31 at the University of Maryland campus in College Park, with instructions that the capsule not be opened until the year 2000.

The voter registration campaign was selected because it permits 4-H members to do something patriotic and useful for their state and nation in this Bicentennial presidential election year, commented Richard R. Angus, state Extension 4-H and youth leader at the University of Maryland.

Carroll county 4-H members actually began their voter registration drive on July 4 during the county's Bicentennial celebration at the Farm Museum in Westminster. Their action plan is serving as a model for the rest of the state.

The Carroll county campaign has been under the direction of Jennifer L. Dashiell of Westminster, 4-H and youth agent in the county for the University of Maryland - Eastern Shore. Miss Dashiell is also serving as coordinator for the statewide 4-H voter registration project.

4-H voter information booths will be located at some 12 county fairs being held throughout the state during August and at the Maryland State Fair in Timonium, set for Aug. 29-Sept. 7.

These booths will offer information pamphlets on voter eligibility and post cards which can be sent to the State Board of Election Laws in Annapolis for a form that will permit voter registration by mail. These post cards must be mailed before Sept. 12 in order to assure completion of voter registration by the Oct. 4 deadline.

Angus heifer show held

PEORIA, Ill. - For cattlemen attending the National Junior Angus Heifer Show in Peoria, Ill., it will long be remembered as one of the outstanding junior Angus activities in recent years. Throughout the two-day event which also hosted the National Junior Angus Showmanship Contest, a total of 271 exhibitors paraded 394 head of some of the countries top heifers representing 22 states and Canada. Co-hosting the event at the Exposition Gardens, Peoria, was the American and Illinois Angus Associations.

In the classes judged by Bill Rishel, North Platte, Neb., grand champion honors went to a February yearling shown by young Murray Cornin III, Ada, Okla. The heifer, Emulous Lady 77, was selected yearling champion of the show before winning the final slap of approval for grand champion overall by Judge Rishel on the final day of competition.

Chester Co. sewer attends states

CHESTER - A Chester County 4-H member was selected during the 1976 Southeast Regional Dress Revue to compete in the state contest held at the Pennsylvania State University last week.

Miss Beverly Hershey, who belongs to the Glen Hi 4-H Club in Cochranville attended the regional program at the Plymouth Meeting Mall on Friday, July 30, with eight other 4-H'ers from Chester Co: Karen Martini, Lyndell; Jill McAllister, Oxford; Nadine Prange, Cochranville; Mary Windle, Coatesville; Betsy and Cathy Wollaston, Toughkenamon; Lynn Lafferty, Hockessin, Del.; and Lynda Thompson, Kennett Square.

In the senior division of the style show, 48 girls over 14 years of age from Chester, Bucks, Berks, Delaware, Lehigh, Northampton and Montgomery counties modeled garments they made during the past year.

Twenty-four girls participated in the junior division, designed for girls under 14 years old.

To illustrate the fashion show theme "Happy Birthday America," 26 4-H members from Philadelphia modeled colonial costumes.

Prior to attending the regional program, the participants competed in the county dress revue program on July 21, at the E. Brandywine Fire Hall in Guthriesville.

-Land-grant institutions and the U.S. Department of Agriculture have conducted research that has played a tremendous part in nearly tripling farm production in the last 75 years. Bringing the results of research and technological improvements to American farmers is as important as the research itself.

Ag exports put U.S. trade balance in black

WASHINGTON, D C - U S agricultural exports reached an all-time high of $22 15 billion in fiscal year 1976, Secretary of Agriculture Earl L. Butz reported recently

This was a gain of 3 per cent from last year's record of $21 6 billion and marked the sixth straight year of record farm exports, dating to fiscal 1971, when $7 8 billion eclipsed the previous high of $6 8 billion reached in 1967.

"This is another remarkable export sales performance by American agriculture," Secretary Butz said. "For three years now our agricultural exports have been more than $21 billion, and in each of these years we have needed those foreign dollars to help pay the rising import bills for petroleum and other products."

"This year, despite a six per cent increase in agricultural imports to $10.1 billion, U.S. agricultural trade produced a record surplus of over $12 billion. That offset a nonagricultural trade deficit of $8 billion, and once again agriculture put the nation's total trade balance in the black — this time by $4 billion for the 12-month period."

The record export value came from an increase in volume of shipments of over 20 per cent, to about 103 million metric tons, which more than offset a decline of about 11 per cent in the unit value of export commodities.

Wheat exports were valued at $4.9 billion, virtually unchanged from last year, despite an increase in volume of 12 per cent to 31.5 million tons.

Feed grain exports rose in value to more than $5.6 billion from about $4.8 billion last year on a volume of 46.4 million tons, up from about 35 million tons last year. Within this total, corn exports were up 21 per cent in value to $4.6 billion and 39 per cent in volume to 39.7 million tons. Grain sorghum showed a 10 per cent gain to $678 million while barley and oats exports dropped almost 50 per cent to $84 million

Rice exports dropped in value from $1 billion to $540 8 million on a sharp reduction in price and a decline in volume of 31 per cent to 1 54 million tons

Exports of soybeans and products declined 3 per cent to $4 billion as a decline in unit values and oil volume more than offset a 40 per cent increase in soybean volume to 566 million bushels from 404 5 million last year. Soybean export value was just over $3 billion, up 4 per cent.

Cotton exports declined in volume from just over 4 million running bales last year to 3.4 million in FY 1976, and in value from just over $1 billion to $882 million.

Tobacco shipments dropped 6 per cent, to 600.9 million pounds, but value went up one per cent to $917 3 million.

Exports of livestock and meat products, sparked by value gains of more than double in pork exports and 90 per cent in beef and veal, increased by more than $250 million, reaching $1.7 billion.

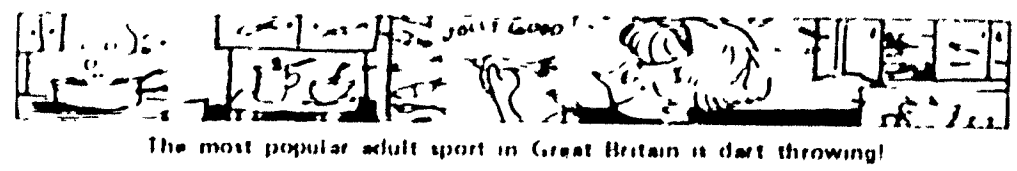
Fruits and vegetables that moved into export were valued at $1.41 billion compared with $1.12 billion in FY 1975, and sugar and tropical products shipments rose from a value of $355.1 million to $414.8 million.

Exports of poultry meat increased by 79 per cent to $135.2 million.

A hundred pounds of milk cost farmers on the average $8.06 to $8.93 CWT to produce in 1974, according to a new report by the USDA.

Milk price supports will remain at $8.13 CWT for manufacturing milk during the July-September quarter.

Practically all of the activity of the native Indians was organized around providing food for the tribe. They raised some crops, but mainly fished and hunted animals. The animal skins provided clothing and tents.



The most popular adult sport in Great Britain is dart throwing!

Six girls vie for poultry queen title

Marcia Rohrer

Nancy Wenger

Jane Overholser

Vicki Sue Sherick

Rose Leininger

Jane Marie Gregory

LANCASTER - Six Lancaster County girls have been chosen as candidates for the Lancaster County Poultry Queen Contest to be held on Friday, August 20 at 8 p.m. in the Farm and Home Center, Lancaster.

Judged partly on knowledge of the poultry industry and in part on poise and self-confidence, the queen will represent the county at the state pageant and at the Lancaster County Poultry Association's annual banquet. She will also have varied duties such as appearing in parades and just generally promoting the industry.

The candidates and their activities are as follows:

Jane Marie Gregory is the daughter of Mr. and Mrs. Robert E Gregory, Lititz R1. She is presently attending the Pennsylvania State University and is a sophomore in animal science. Active in 4-H for 10 years, she has belonged to the Broken Bit 4-H Horse and Pony Club, the Lancaster Co. 4-H Holstein Dairy Club, and the Brickerville Community 4-H Club, the Lancaster Co. 4-H County Council, and the PSU Campus 4-H Club. Jane is a graduate of Warwick High School where she was active in the marching band and student government. Her future plans include working in livestock management or a related field.

Seventeen-year-old Rose Leininger is a recent graduate of Cocalico High School who now resides with her parents, Vernon and Allegra Leininger, Denver R2. Active in music and acting while attending school, Rose participated in County Chorus for two years and District Chorus for one year. During her four years of high school, she participated in five musicals and seven plays. Her goal for the future is to become a professional actress or singer. She has been accepted at the American Academy of Dramatic Arts in New York City and will be starting classes there this September.

Jane Overholser, 37 Church St. Reamstown, is a 1971 graduate of Cocalico High School. Currently employed by Hess Brothers Farms, Inc., Ephrata R1, she holds a secretarial position. Jane's outside interests include being a member of Salem United Church of Christ, Reamstown, and the Reamstown First Company Ladies Auxiliary. She also enjoys knitting, sewing, cooking, reading, collecting antiques, and sports as hobbies

Marcia Rohrer, 17, is the daughter of Mr. and Mrs Jay H Rohrer The family lives on a 140 acre farm at Manheim R7. A senior at Manheim Central High School, Marcia is employed by the Elm Tree Acres dairy store as a cashier. Her hobbies include sewing, decorating cakes, and cooking She is a member of the Hempfield Church of the Brethren youth group

Vicki Sue Sherick, a junior majoring in nursing at Penn State, is the daughter of Mr and Mrs. Fred Sherick, Willow St R1.

She is a member of the Student Nurse Association and the University Concert choir. Her hobbies include singing, water-skiing, horseback riding, and sewing

Nancy Wenger is a graduate of Cocalico High School who now resides on a 107 acre farm at Stevens R1 with her parents, Mr. and Mrs. Noah Wenger. She participates in almost any outdoor activity including tennis, swimming, and bike riding. Nancy has also been active in the Lancaster County 4-H baby beef club for seven years Throughout these years, she had several prize winning steers, three of which were chosen to attend the Harrisburg State Farm Show. In school, she participated in many intramural sports In September Nancy plans to attend Delaware Valley College of Science and Agriculture to major in animal husbandry

First Northeastern poultry exposition planned

SPRINGFIELD, Mass. - The largest regional concentration of poultrymen and allied industrymen in New England since the days of the famous old Boston Poultry Show will be converging in this city for the first-ever Northeastern Poultry Exposition.

A half-dozen regional and state associations are cooperating heavily to give increased importance to the traditional 14-state Northeastern Poultry Producers Council (NEPPCO) exposition, the program and the activities here in the new $10 million Civic Center August 24 through 26.

Speakers and commercial exhibitors from throughout the nation will share the attention of poultry leaders and farmers with a full program of educational, social and visual attractions.

Northeast Egg Marketing Association (NEMA) officials are sharing sponsorship of the exposition this year with NEPPCO and the combined show has attracted special cooperation from the American Farm Bureau Federation and a number of state poultry associations.

AFBF president Allan Grant, of Visalla, Calif. a dynamic and out-spoken farm leader, will keynote the convention and is being feted by area Farm Bureau officials during his stay.

Beginning with Grant's call for action at the opening of the convention at noon on Tuesday, August 24, the series of seminars and talks are expected to attract widespread attention.

How-to-do-it better sessions will feature such speakers as Joe W. Claybaugh, DeKalb AgResearch consultant, and Herbert B. Gabriel, longtime head of the Great A&P Stores egg department.

Merchandising and promotion programs will also be conducted by such experts as Louis B. Raffel, executive vice president of the American Egg Board, and by Linda Fitzhugh, executive secretary of the North Carolina Egg Marketing Association.

Economic and feedgrain outlooks will be given by such speakers as Dr. Edward G. Boehne, chief economist of the Federal Reserve Bank of Philadelphia, and by John H. Frazier, Jr., a partner in Hennessy & Associates, Chicago.

Grassroots tips on profit-making will be voiced by other experts like Roland H. Coles, president of Coles Egg Farm, Inc., in Virginia and by Maurice J. Pickler, executive director of Eggmar, Raleigh, N.C.

Complete programs for women and young adults are planned. Social activities for everyone are scheduled throughout the exposition and include a "Spirit of '76' breakfast complete with cooking demonstrations and a film on Wednesday morning and leading up to a Thursday evening "Picnic on the Patio", an authentic New England clambake in a park-like atmosphere high up on the Marriott Motor Inn overlooking downtown Springfield.

Show registrations and full details are available at the NEPPCO office, 322 Oxford Valley Road, Fairless Hills, Pa. 19030, or by calling 215-547-0190.

States first Simmental sale planned

BIRD-IN-HAND - On Saturday, August 28, Beechdale Farms will host the Pennsylvania's first Simmental cattle sale. Approximately 50 females and two full-blood bulls will be offered at absolute auction to the highest bidders at the on-the-farm sale scheduled for 12:30 p.m. at Bird-In-Hand, (Lancaster County), Pa.

Guest consignors include Simmental Breeders Cardston Ltd., (SBL) of Alberta, Canada; Kingfield H. B. Simmentals of King City, Ontario, Canada; KBJ Ranches, Xenia, Ohio; Hidden Lane Farm, Stockton, New Jersey; Gene Folck of Springfield, Ohio. Sale offering will include half-bloods through purebreds.

One of America's pioneers in purebred Simmental, Beechdale Farms' Simmental herd was assembled from the best of what 53 different breeders had to offer in 33 different auction sales and 16 private treaty transactions in 27 different states and Canadian provinces.

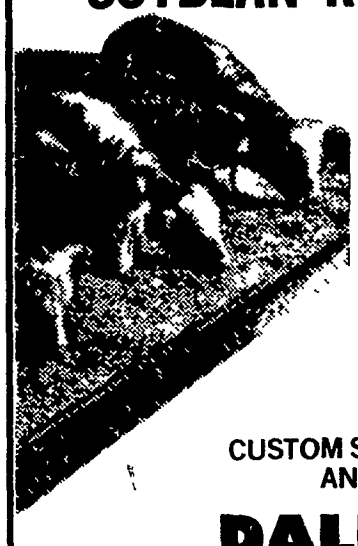
Visitors are urged to bring families and arrive several days early in order to tour the Amis countryside or visit nearby Valley Forge, Gettysburg, Philadelphia, and Hershey.

Pre-sale festivities include group tours to the above places and a Friday evening dinner party at a Pennsylvania Dutch restaurant.

Sale catalogs, tour itineraries, and motel reservations may be obtained by writing Beechdale Simmental Farms, Bird-In-Hand, Pa. 17505, or by calling toll-free 800-233-0252 outside Pennsylvania or 717-656-7700 within Pennsylvania.

Poultry producers not only marketed fewer chickens in 1975, but saved fewer for their own tables. Some 14 million chickens were consumed on farms where grown, down a million from 1974.

SOYBEAN ROASTING ON YOUR FARM



For peak feeding value have your soybeans roasted. (To kill toxic enzymes in raw soybeans.)

1. Roasted soybean (not just cooked), increases digestibility by 15 percent.
2 Increases weight gain for beef & hogs.
3. Increases butterfat in milk & egg production.
4. Improves animal health, reduces vet bill.
5 Eliminates hauling to the mill & back to farm.
6. Feed your own grown grain. (Not exchanged with others).
7 Beans remain whole. Store for months without losing any feeding value

Berks Co. PFA holds picnic

By JUDY MITCHELL
Berks Co Reporter

LEESPORT Berks County Pennsylvania Farmers Assoc President Bill Myers expressed a sentiment shared by most persons attending the Association s annual picnic last Sunday when he announced As farmers we need the rain, we just don t need it right now

In spite of the bad weather, an estimated 500 persons attended the picnic which went under cover at the Leesport Auction Grounds, and the Women's Committee program went on as planned

Following the chicken barbecue and covered dish feast, Committee members Mrs June Burgert Mrs Stanley Fox Mrs Robert Kopfer, Mrs Carl Miller Mrs Roger Wagner, and Mrs Martin Younker entertained the picnicers with song After several numbers, they were joined by special guest Sophie Glutz Buttum from New York City who played a tune on the harmonica Sophie, later dewigged, turned out to be none other than Harold Burgert of Fleetwood R2

Joan Hassler, winner in this year's county PFA talent contest, also performed at the piano during the entertainment program

A number of political figures attended the event as guests of the association, and following the entertainment Bill Myers introduced Senators Clarence Manbeck and Michael O Pake Representatives James Gallen and John Davies as well as several candidates who are seeking office in the coming elections

As a grand finale to the festivities, members of the Berks Co Women's Committee released 100 tagged balloons prepared as a public relations project by the farm women's group Mrs Kopfer explained that a tag bearing the name and address of a committee member was attached to each of the Bicentennial balloons with instructions for the finder to forward his or her address to that member Individuals who return a tag will be given information or articles which the Committee feels might be "useful for telling the farmer's story"

Members of the Berks Co PFA Women's Committee entertained the picnickers From left to right they are Mrs Roger Wagner, Oley R1, Mrs June Burgert, Fleetwood R2, Mrs Martin Younker, Fleetwood R2, Mrs Stanley Fox, Palm, Mrs Carl Miller, Kutztown R3, and Mrs Robert Kopfer, Fleetwood R2

Dairy princess wants a career in dairying

By DIETER KREIL

SPRUCE CREEK — A closely knit family is what Ruth Ann Behrer values the most about her life on a dairy farm. She likes the way of life so much, in fact, that she is preparing for a career as a herdsman. Aside from being actively engaged in farm work on her parents' 320 acre farm, near here, Miss Behrer is a junior at Penn State, majoring in animal industries.

Last month the 20-year old daughter of Mr. and Mrs. John C. Behrer was chosen to be Huntingdon County's dairy princess for 1976-77. The ceremony was held at the County Holstein Association's family picnic.

A graduate of Tyrone High School, Miss Behrer has lived on a farm all her life, and has been helping with chores since she was 10 years old. She recalls that feeding calves became her first meaningful task and that the teaching of responsibility is a part of life on the farm. In line with her

Ruth Ann Behrer

experiences at home, the new dairy princess has also amassed a commendable record in 4-H projects, and has attended the National 4-H Congress, the highest honor receivable in the 4-H program.

Miss Behrer is a working dairy princess, helping with chores whenever and wherever she's needed. She's experienced with field work and has taken charge of the afternoon milking on many occasions. The Behrers presently milk 70 Holsteins and are in the process of building a new free-stall barn for 150 head.

Having six dairy animals of her own, Miss Behrer particularly enjoys showing them and making some of the decisions involved with breeding. Questioned about her enthusiasm and interest for the dairy business, the blonde Huntingdon Countian answered, "I'm interested in dairying because that's all I've ever known and I love to work with cows." She has shown her animals at county, district and state levels and cites "Ivanhoe Star Performer," and "Bonus" as being her favorite bulls. "I choose bulls mostly to improve type because of my going to shows," she explained, "but if I were in the business I'd go more for milk production."

As dairy princess, Miss Behrer plans on going to supermarkets where she's hopeful of being allowed to give out free samples of milk. She has also scheduled appearances for all elementary schools in her county and is booked for appearances at some service clubs. With a radio talk show already behind her, she's now hoping to make a television appearance. In addition, she writes a weekly article for the Huntingdon Daily News once a month.

Sperry New Holland to expand

LEXINGTON, Neb. - Construction will begin immediately to increase the size of the Lexington, Nebr., Plant of Sperry New Holland by more than 60 per cent, it was announced recently by Theodore C. Jackson, the company's vice president for manufacturing, North America.

A total of 178,600 square feet of additional space will be provided; 169,000 for manufacturing operations and 9,600 for office activities. The present farm and industrial equipment production building at Lexington contains 212,000 square feet and the offices 18,000. A separate shipping building of 54,000 square feet will not be affected by the expansion move.

Expected completion date for the increased office space is December 1976, and for the plant addition, July 1977.

According to Jackson, the additions will enable the company to expand its production of the TRTM 70 combine. The TR 70, called the "breakthrough combine" was introduced in June 1975.

The Lexington plant was built primarily for the manufacture of this combine. Completed and dedicated in 1975, the plant already is nearing its planned capacity.

Today there are about four times as many farmworkers in the United States as there were Indians - yet these farmworkers feed 200 times as many Americans with an infinite variety of food, and there's enough left over to make us the world's largest agricultural exporter.

breathe good country air and have a good ole' time!

Kutztown Good-Time Arts & Music Festival country—folk—bluegrass
THE FAIRGROUNDS, KUTZTOWN, PA.

Take off for the country—our country—and get back to your roots. Lebanon Fair posts livestock results

LEBANON — Youngsters enrolled in 4-H and FFA livestock programs exhibited their animals here at the Lebanon Area Fair on Wednesday. Following are the results of the various shows:

4-H MARKET HOG SHOW

Class 1 — 1. Bonnie Arnold, 2. Rick Houser, 3. Elaine Houser.

Class 2 — 1. Robert Houser, 2. Robert Houser, 3. Lee Garrison.

Class 3 — 1. Michael Brjakovich, 2. Bonnie Arnold, 3. Todd Brjakovich.

Class 4 — 1. Jay Bomgardner, 2. Lee Garrison, 3. Tom Seaman.

Class 5 — 1. Bonnie Arnold, 2. Jay Bomgardner, 3. Bonnie Arnold.

Class 6 — 1. Ross Berger, 2. Tom Arnold, 3. Elaine Houser.

Class 7 — 1. Bonnie Arnold, 2. Jay Bomgardner, 3. Jodi Kreider.

Class 8 — 1. Bonnie Arnold, 2. Jay Bomgardner, 3. Jodi Kreider.

Class 9 — Bonnie Arnold, 2. Bonnie Arnold, 3. Daniel Seaman.

Class 10 — 1. Tom Seaman, 2. Tom Seaman, 3. Tom Arnold.

Class 11 — 1. Todd Brjakovich, 2. Mike Brjakovich, 3. Tom Arnold.

Class 12 — 1. Johnny Worm, 2. Elaine Houser, 3. Tom Arnold.

Class 13 — 1. Todd Brjakovich, 2. Jay Bomgardner, 3. Bonnie Arnold.

Class 14 — 1. Ed Houser, 2. Jay Bomgardner, 3. Tom Seaman.

Class 15 — 1. Tom Arnold, 2. Charles Aungst, 3. Ross Berger.

There were five entries in each of the 15 weight classes, making for a total of 75 market hogs entered in the show.

THE SHEEP SHOW

Julie Bow exhibited the champion pen of three market lambs, the champion market lamb, and reserve champion ewe.

Nicole Emrich had the champion ewe and ram. Capturing the reserve champion ram ribbon was Scott Eckenrode, while Irene Brown took off with the reserve champion market lamb.

4-H and FFA BEEF SHOW

Jay Bomgardner had the grand champion, with reserve honors going to Scott Eckenrode. Bomgardner also was presented with the grand champion banner in the Open Beef Show and reserve grand champion trophy for fitting. Following are the placings by classes:

Light Weight

1. Daniel Seaman, 2. Bryan Eberly, 3. Dorene Eberly, 4. Jed Hoffer, 5. Tom Arnold.

(Continued on Page 63)

Jay Bomgardner of Annville, R3 came up with the grand champion steer in both youth and open competition at the Lebanon Area Fair. His purebred Hereford was also the heavyweight champion. In addition to collecting laurels in the beef show, young Bomgardner also excelled in fitting, showmanship, and swine showing.

Lebanon Fair

Continued from Page 62

Medium Weight

1 Scott Eckenrode, 2 Tom Seaman, 3 Danita Layser, 4 Brett Eberly, 5 Patrick Gerdes

Heavy Weight

1 Jay Bomgardner, 2 Jeff Heisey, 3 Bonnie Arnold, 4 Paul Miller

Showmanship and Fitting

The champion showman and fitter was Jeff Heisey, with Tom Seaman placing second

Placing first in the division for contestants eight to 10 years young was Bryan Eberly Danny Seaman won first place in the contest for youngsters aged between 11 and 13 years, followed by Tom Arnold, Scott Eckenrode, Patrick Gerdes Dorene Eberly, and Danita Layser in that order In the division for 14 year olds and older, Jeff Heisey was first followed in order by Tom Seaman, Jay Bomgardner, Bonnie Arnold, Brett Eberly, Jed Hoffer, and Paul Miller

In the fitting contest Heisey was on top, with Jay Bomgardner taking reserve honors Bryan Eberly won the division for youngsters under 11 years old The middle age group was won by Daniel Seaman, followed in order by Danita Layser, Tom Arnold, Scott Eckenrode, Patrick Gerdes, and Dorene Eberly The class for 14 year olds and older was led by Heisey, followed in order by Jay Bomgardner, Bonnie Arnold, Brett Eberly, Jed Hoffer, and Paul Miller

OPEN MARKET BEEF SHOW

Jay Bomgardner and Scott Eckenrode repeated their feats from the youth show, again placing grand and reserve grand animals, respectively. Bomgardner exhibited a purebred Hereford while Eckenrode's entry was a slick Angus. The boys placed first respectively, in the heavyweight and medium weight divisions of the contest

In the lightweight contest, Danny Seaman's animal was placed above one paraded through the ring by Bryan Eberly. The medium weight contest was won by Eckenrode, followed in order by Tom Arnold, Tom Seaman, and Jay Bomgardner.

Tom Seaman, Grantville R1, guided this Murray Grey steer to second place in the medium weight class at the Lebanon Area Fair's beef show The relatively new breed is being introduced in this country from Australia and are described as being very gentle cattle to work with Seaman was reserve champion showman in the contest

Scott Eckenrode and this slick Black Angus steer checked in as reserve grand champion in the youth and open beef show at the Lebanon Area Fair. The 11 year old, who makes his home near Rexmont, is no newcomer to the show circuit, having had the grand champion at the 4-H Round-up last year.

Farm eggs sold for 52½ cents a dozen last year, almost a cent less than in 1974. But higher prices for broilers and chickens meant sales totaling more than $3 billion, as producers' gross income climbed 18 percent. Gross income from broilers along came to $2.9 billion, up 19 percent from 1974.

Computer use grows

UNIVERSITY PARK — Use of a computer to forecast the occurrence of tomato early blight, the chief defoliation disease of tomatoes in the northeastern states, will be among the plant disease experiments described during Ag Progress Days Aug. 25 and 26 at the Agricultural Research Center of The Pennsylvania State University. The 1525 acre research farm of Penn State is located nine miles west of the campus on route 45.

The goal of computer forecasting of tomato early blight is to spray only when conditions warrant it, stated Dr. S. P. Pennypacker and Dr. A. A. MacNab, plant pathologists with the Agricultural Experiment Station. Efficient and economical spraying with fungicides is made possible through such experiments, they added.

During Ag Progress Days the Penn State scientists will describe studies underway to improve computerized tomato blight forecasting, to use fewer sprays but to provide disease control equal to the typical seven to 10 day intervals used commonly today. Tomato early blight can reduce yields by 30 to 40 per cent. Ag Progress Days is funded partially by a grant from the Bicentennial Commission of Pennsylvania.

Behney and Miller take poultry show awards

LEBANON I'm really a dairy farmer you might say chickens are my sideline," chuckled Harold Miller with a grin on his face and a twinkle in his eye 'You'd have to say it's a sideline because it takes too much time for a hobby," he added

Miller is part of the team of Behney and Miller who practically swept up every grand champion, reserve champion, and best display award in the open poultry division at the Lebanon Fair on Monday

'This is the best we ever had here at Lebanon for a long time," Miller admitted But, the team has been busy taking other awards at such places as the Pa Farm Show, the York Poultry Show, the Ephrata Fair, the Manheim Fair, and in the three states of Maryland, Ohio, and New Jersey.

Harold Miller poses with his Champion Large Fowl, a Black Langshan Cock.

Ronald Behney, partner in Miller and Behney Poultry, exhibited this champion bantam at the Lebanon Area Fair this week.

They have also set a record at the National American Brahma meet for three consecutive years with the champion best light, best dark, and best buff Brahma.

On Monday, they took all top large fowl honors with a Black Langshan Cock as champion large foul, a Partridge Rock Hen as reserve champion large fowl, and a Light Brahma Cock as third best bird. Best display for large fowl also went to Behney and Miller for a Light Brahma.

Bantam

The Bantam awards were shared with other poultry men from the area. Although Behney and Miller took four of the six top awards, Melvin Bollinger, Lititz, took Reserve Champion Bantam with a Black Cochin Hen and Ray Becker took Third Best Bird with a Black Belgian Hen.

Behney and Miller's honors were: Champion Bantam with a Buff Brahma Pullet; Best Display with a Buff Brahma, Three Best Males with a trio of Partridge Rocks, and three best females with Buff Brahmas.

4-H POULTRY RESULTS

The Grand Champion poultry title went to a White Rock owned by Richard Paine.

Capon

One capon was showed by Susan Heilinger who took first, second, and third in class.

Broilers

In broilers, Gregory Hostetter took first place, Bruce Heilinger took second, and Jonathan Arnold took third.

Rick Paine, a 12-year old student at Annville Elementary School, exhibited this Plymouth Barred Rock rooster at the Lebanon Fair this week and walked off with the grand champion ribbon in the 4-H show.

Lebanon Co. Holstein Club field day held

LEBANON - The Lebanon County Holstein Club Field Day was recently held at Raola Farm owned by Raymond and Marlin Getz. The 100 acre farm is located one mile east of Eastern Lebanon County High School and has a dairy operation of 58 milking cows and 20 heifers. This registered Holstein herd averages 16,400 pounds of milk with 614 butterfat.

Peter Blodgett from Carnation Genetics was the guest speaker and judge for the evening. Three classes of registered Holsteins were judged. They were aged cows, intermediate calves, and four-year-olds.

Cash prizes were awarded to the youth winners. The men's and women's prizes were donated by Art Brandt of Agri-Service.

Winners in the 14 years and under bracket were: 1. Mike Kunkle 2. Mike Bare 3. Debbie Lentz. Honorable Mention went to Gary Mase.

Winners in the 15- to 18-year-old bracket were: 1. Patrick Arnold 2. Ray Moyer 3. Phyllis Sattazahn. Honorable Mention went to Jane Bomgardner.

Winners in the men's division were: 1. Jack Arnold 2. Bob Gregory 3. Robert Lentz. Honor Mention went to Ernest Hostetter.

The women's division winners were: 1. Karen Sellers 2. Pearl Sweinhart, and 3. Frances Musser with Honorable Mention going to Jeanette Brandt.

Master of Ceremonies for the evening was Dale Hoover, president of the Lebanon County Holstein Club. Planning for the evening was done by the Field Day Committee which consisted of Ronald Lentz, Edward Arnold, Glen Gingrich, David Brandt, and Tom Fair.

The winner in the calf raffle was Clair Esbenshade. The calf had been donated by Ralph Shirk & Sons of Fredericksburg. Refreshments were served to the approximately 250 persons who attended.

Lebanon Fair hosts FFA dairy shows

Jay Kreider with his first-place 4-year-old which went on to become grand champion of the FFA Holstein Show at the Lebanon Fair.

LEBANON - Barry Donmoyer came to the FFA Holstein show with just one entry and came up as junior champion of the show Dale Maulfair entered six of his Ayrshires in the FFA show and made a clean sweep when it came to picking up the championship ribbons In Guernsey FFA competition it was brothers Ken and Pat Arnold who won grand and reserve champion trophies, and in the Jersey show the lone exhibitor - Randy Behney - won first place. Grand champion Hostein exhibitor was Jay Kreider of Palmyra. Following are the top placings of the FFA shows for Holsteins, Ayrshires and Guernseys.

HOLSTEINS

Junior Calf

1. David Patches, Lebanon; 2. Gary Mase, Lebanon; 3. Art Swinehart, Fredericksburg; 4. David Kline, Myerstown.

Intermediate Calf

1. Ray Moyer, Lebanon; 2. Randy Behney, Myerstown; 3. Reid Hoover, Lebanon.

Senior Calf

1. Ellis Meyer, Annville; 2. Art Swinehart, 3. Steve Hitz, 4. James Wampler, Lebanon; 5. Randy Behney.

Junior Yearling

1. Kirby Horst, Newmanstown; 2. Dennis Wenger, Jonestown; 3. Eugene Hoffman, Jr., Newmanstown; 4. Art Swinehart, 5. Richard Krall, Lebanon.

Senior Yearling

1. Barry Donmoyer, 2. Thomas Fair, Lebanon; 3. Bryan Burkholder, Lebanon; 4. Dennis Wenger, 5. Richard Patches, Lebanon.

Two Year Olds

1. Scott Balsbaugh, Lebanon; 2. Shawn Hernley, 3. Alan Hostetter, Annville.

Three Year Olds

1. Scott Balsbaugh, 2. Ray Moyer, 3. Dennis Wenger, 4. Kirby Horst.

Four Year Olds

1. Jay Kreider, Palmyra; 2. Patrick Arnold, Schaefferstown.

Aged Cows

1. Gary Lentz, Lebanon; 2. Vincent Arnold, Schaefferstown; 3. Jay Kreider.

The Champions

Jay Kreider showed his aged cow, "Kreidell Promise Rose Lee," to senior and grand champion honors. She is a daughter of "Don Augur Mothermarthas Promis. Placing second to Kreider in both senior and grand championship divisions was Gary Lentz of Lebanon. Lentz' aged cow, a daughter of "Winterthur Ivanhoe Eden Select," had beaten Kreider's cow previously in

Take them from 50 to 125 lbs. in a hurry . . . with WAYNE Gro-Pork 280

To convert feed to pork efficiently, make sure your hogs have the right balance of proteins (amino acids), energy, vitamins and minerals.

Wayne Gro-Pork 280 is a 16% complete feed, that not only supplies this balance, but takes your hogs from 50 to 125 lbs. in a hurry. And besides promoting exceptionally fast growth, Gro-Pork 280 hogs are husky and meaty.

Use complete Wayne Gro-Pork 280 for:

- better feed efficiency
- better performance
- better convenience
- better profits

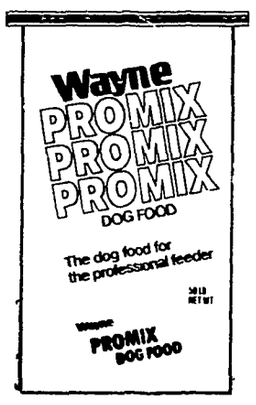
Isn't that what converting feed to pork is all about?

WAYNE FEEDS — WAYNE ANIMAL HEALTH AIDS

Hay or pasture can't go it alone. Wayne Front Runner Horse Krunch is the total balancer, high in taste appeal. This feed adds the extra energy that your horses don't get from hay or pasture alone. It's a clean, easy-to-handle feed. The grains are crimped or cracked.

Front Runner furnishes ample vitamins, minerals and protein. Pure cane molasses provide flavor that horses love.

WAYNE PRO–MIX



New, economical Wayne Pro-Mix, fed wet or dry, provides complete and balanced nutrition for your dog.

The WAYNE Better-Bilt Gilt

Your decision to upgrade the gilts in your hog operation is a sound investment in maximizing your profitability.

The heritage of Wayne Better-Bilt Gilts is that of the finest purebred stock from some of the top foundation breeding herds in the country.

Animals selected must meet established standards of performance and confirmation to qualify as Better-Bilt Gilts. Selection criteria are health, growth rate, litter size, muscling, soundness of feet and legs, roominess, underline and mothering ability.

Ask the Wayne Feeds dealers listed below about the advantages of the Wayne Better-Bilt Gilt program:

- top quality
- genetically superior
- scientifically bred
- strict health standards
- higher conception
- large litters
- maximum performance & profit

Wayne D-Odor #II

Liquid Waste Control

Wayne D-Odor II contains high grade bacteria in a high concentration to

- remove odors
- digest and liquefy solids
- reduce BOD (Biochemical Oxygen Demand)

The organisms used in compounding Wayne D-Odor II are harmless to all living things — cannot harm humans, livestock or poultry. Safe to use anywhere — ponds, lagoons, even hog, cattle and poultry manure pits.

Wayne D-Odor II — at your Wayne Feed dealer's.

Lebanon Fair

Dale Maulfair was once again the man to beat in Ayrshire competition at the Lebanon Fair, but no one succeeded. He had grand and reserve grand champion in the FFA show. Holding the reserve animal is his wife, Pat.

[Continued from Page 65]

the aged cow class, where Kreider's entry only placed third.

The junior and reserve junior champions belonged to Barry Donmoyer and David Patches, respectively. Donmoyer exhibited a senior yearling sired by "Howacres Stylemaster Prince," and Patches had a junior calf sired by "Haven Lane Criss Tong."

AYRSHIRES

A 6½-year old daughter of "Oak Ridge Flashy Klondike" was named grand champion of the FFA Ayrshire show. Owned by Dale Maulfair, Jonestown, the aged cow edged another Maulfair entry, "Maulfair Flashy Cindy," which took reserve honors. The young dairyman's Ayrshires, which consistently win Ayrshire shows at local, regional and state levels, dominated the Ayrshire show here.

GUERNSEYS and JERSEYS

Two junior calves owned by two brothers swept the Guernsey competition for awards. Winners were Ken and Pat Arnold. Capturing the blue ribbon for the Jersey breed was Randy Behney.

This parallel has been drawn by former American Farm Bureau President William Kuhfuss: "As an industry which has been subjected to many government controls during the past 40 years, farmers and ranchers know that increased production comes not from government edict, but from incentives created by consumer demand in the free market.

Support withdrawn

WASHINGTON, D C - Assistant Secretary of Agriculture Richard E Bell said today the U.S government no longer will support loans by international money-lending institutions to develop more palm oil production for international export trade purposes

This firms up an interim policy position tentatively established last March Mr Bell believes the U S position will effectively dry up funding from lending institutions which the U S supports This will cut the amount of palm oil that would be produced in absence of the U S action No exact estimates of the cut have been made

Palm oil imports into the U.S. are slowing, may total about a billion pounds this year. Government officials believe a tariff or direct limitations on palm oil imports would encourage palm oil producers to compete with U.S. soybean producers in the big European market. Such limitations would thereby be self-defeating, according to such views.

Friendly competition at Berks Co. 4-H fair

By JUDY MITCHELL
Berks Co Reporter

KUTZTOWN - 4-Hers from approximately 40 clubs got together for a day of fun and friendly competition at the annual Berks County 4-H Fair held at the Kutztown Fairgrounds on August 5

The Kutztown and Kempton clubs came out on top in the group competitions winning two awards each The Kutztown group took the Grand Champion awards for Project Display and Club Exhibits with their "Treasures from Trash" featuring attractive house decorations fashioned from such exotic items as an empty peanut butter jar and old worn-out shoes

The Kempton club, coached by Mr and Mrs Keer of Kempton, were named champions in the senior volleyball division, and first place winners in the Fun Carnival contest in which the various clubs competed with hand-crafted games of fun and skill

The Reading 4-H Club, coached by Paul Davis, were named champions in the junior volleyball division

A number of individual contests involving skill, talent, hard work, or just plain fun, were held throughout the day-long event which was attended by approximately 350 4-Hers and a considerable number of parents, leaders and friends

The fair was the first show for the newly formed Berks County Rabbit and Guinea Pig Club. The month-old club already numbers 26 members, and a total of 27 animals were entered in Thursday's competition.

The Grand Champion rabbit was owned by Jeff Sweigart of Sinking Springs, and blue ribbons in the pet division were awarded to Mark Zawada, Kempton, for his Commercial breed, and Jeff Sweigart of Sinking Springs for his New Zealand Whites.

The Grand Champion guinea pig was entered by Denise Lantz, Reading.

Pictured above are the members of the newly formed Rabbit and Guinea Pig Club with their entries in the 4-H Fair. Left to right, they are Tamara Blatt, age 11, Kutztown; Jodi Burkert, age 13, Shoemakersville; Leigh Zerbe, age 9, from Bernville; Jeffry Sweigart, age 12, Fritztown; David Ernst, 13, Sinking Springs R6; and Lyndon Shade, age 9, Shartlesville. Standing in back is LuAnn Shade, 13, Shartlesville.

Entries in the home-grown vegetable contest were judged for quality and arrangement with the following results:

Class A, Garden Basket Grand Champion, Eric Fisher, Robesonia; Class B, Market Basket, Angela

63 animals at Adams Co. 4-H Dairy Roundup

SOUTH MOUNTAIN - A total of 63 dairy animals were paraded before the judges at the Adams County 4-H Dairy Round-up held Friday, Aug. 6, at the South Mountain Fairgrounds. Alan Bair, County Agent for dairy in Lancaster County placed the animals on the basis of type. Blue, red, or white ribbons were awarded according to the Danish System of judging. Fitting and showmanship was judged by Mrs. Sallie Bair.

Forty-three Holsteins were shown. Curtis Rodgers, Gettysburg R6 showed the Junior Champion, a Senior calf. The Reserve Junior Champion was a Junior Calf shown by Joyce Zepp, New Oxford, R2. The Senior Champion and Grand Champion was an aged cow shown by Christine Gitt, Littlestown R2. The Reserve Senior Champion and Reserve Grand Champion honors were won by Robin Ridinger, Biglerville R2, with her three-year-old cow.

Placings by classes for Holsteins were as follows:

Junior Calf Class

What's New

RADIATOR SHUTTERS

A new shutterstat for regulating automatic raiator shutters on farm trucks, tractors and combines has been developed by Kysor of Cadillac, division of Kysor Industrial Corporation.

Designated the 36000, the new model is smaller and more compact than the shutterstat it replaces, which makes it easier to install. The 36000 shutterstat also features simplified construction, which helps to provide more trouble-free operation and a longer life.

Merola in first place

WOODSTOWN, N J - Joe Merola kept his first position in the Calf Roping last Saturday night This totals his Cowtown Rodeo winnings at $1,045.90, making him top money winner to date in the roping event. The Penns Grove, N.J. cowboy won the event in 14.2 seconds for $154.84.

The 600 pound animals used in the Steer Wrestling, not only get heavier but wiser as the season passes. As the educated steers came out of the shute they would halt briefly, throwing the cowboys timing off just enough to miss his horns. Out of 13 steer wrestlers only two brought their animals to the ground. Steve Dubrovsky made the fastest throw at 7.2 seconds for $201.88.

Lorraine Alexander of Newton, N.J. came back to win first in the Girl's Barrel Race at 18.27 seconds for $197.96.

The Saddle Bronc Riding competition was won by Wyatt Crotta of Bethany, Conn. The 18 year old cowboy also placed third in the Bull Riding, and fourth in the Calf Roping events. First money for Saddle Bronc Riding was $96.04 and Wyatt marked a 64.

Jack Mell, 1975 Cowtown Trophie Buckle winner made a mark of 62 to win the Bare Back Bronc Riding. Jack took home $135.24.

David Kirk was injured when he was thrown from the 2,000 pound bull, Impersonator. He was treated for a broken jaw at the Salem County Memorial Hospital and released. Mike Rawson won the event with a mark of 64 and made $252.84. Both Cowboys are from Nocogdoches, Tex.

A total of 2,897 persons were on hand to watch the 85 contestants vie for the $2,590.00 in prize money.

U.S. poultry producers had their ups and downs last year.

Up was gross income from sales of eggs, chickens, and broilers, which, for the year ended November 30, 1975, brought producers $5.8 billion, compared with $5.5 billion the year before. According to SRS's Crop Reporting Board, egg sales provided 48 percent of the total, broilers 50 percent, and other chickens, the remaining 2.

Food storage matters

UNIVERSITY PARK - Fruits and vegetables, the main sources of vitamin A and C in our diets, when canned under ideal conditions, retain from 60 to 70 per cent of vitamin C and about one-half vitamin B1. Vitamin A is only destroyed when foods are heated in the presence of air or as in home canning - raw packed and then heat sterilized.

Storage conditions also affect nutrient quality of home canned foods. Ideally, storage conditions should be cool, dry, dark and clean. Research has shown that if foods are stored at 45 degrees in a cool, dry, dark place, the nutrient losses are insignificant over a year's storage time. But of the temperature is 85 degrees for a year, nutrient losses are about 30 per cent greater for vitamin C and thiamin.

In addition, you can retain more nutrients in the foods if you store opened jars of canned foods in the refrigerator, heat foods rapidly in a small amount of liquid, use liquids in cooking and preparing other foods, and serve foods in an attractive way to stimulate family appetites.

MEADOW LANE FARM . . . VITAL LINK IN ABS SIRE DEVELOPMENT

The Dean Family of Meadow Lane Farm . . . Charles, Sr.; Mike; Cheryl; Bob and Tom.

The Dean family joined the ABS Associated Herd Program in 1970, soon after Charles "Tom" Dean, Jr. graduated from an ABS A.I. Management School. Tom, his brother Bob, and father operate their 1,000-acre dairy operation in partnership.

By randomly sampling young ABS Progeny Test sires in their herd, Meadow Lane Farm is helping develop high-Predicted Difference, Genetic Harvest sires for world dairymen.

"We enjoy sampling ABS Progeny Test sires. Since our first ABS daughters freshened late in 1974, our herd average has increased from 11,757M to 16,228M. The Progeny Test daughters are milking against herdmates sired by such top PD sires as 29 H1879 SEAMAN (+1,550M), 29 H1881 BOOTMAKER (+1,132M), and 29 H1883 R MAPLE (+573M). "Our ABS Progeny Test daughters are producing real well, and we have not culled one of our first eight yet," remarks Tom.

HERD IMPROVEMENT AT MEADOW LANE FARM

Bigger savings with big round bales start here

International® 241 Bigroll Baler

The many superior features of IH Bigroll Balers give you extra time, labor and quality-saving benefits included is the ability to make full 6-ft diameter bales with loose cores that permit "breathing," yet have extra-tight surfaces for maximum resistance to weathering And you also get dump-and-go convenience, which means you don't have to back up to eject in order to get all of the windrow when starting a new bale

- Exclusive lower belt tracking system lets belt float to tolerate loads, reduce wear
- Exclusive individually replaceable upper belts
- Exclusive twine guide positioning indicator for more convenient and twine-saving wrapping performance
- Exclusive vertical hitch adjustment to maintain level baler operation

Let's arrange a demonstration. Finance plans available.

J. Knebel speaks out on farm safety

CHICAGO, Ill — "In the interests of farmers, consumers and hungry people around the world, we must make certain that discouraging and unreasonable safety requirements are not imposed on U S farmers that will inhibit production of record quantities of food"

That was the message earlier this month from Under Secretary of Agriculture John A. Knebel, speaking to directors of the Farm and Industrial Equipment Institute, here.

"The production of food is all important," said the second-ranking U. S. official of Agriculture. "Policies and regulations, where necessary, should be devised to assist in production by safer, more sanitary and less costly methods.

"Implementing such plans and requirements is very difficult because most policies and regulations simultaneously add more costs to products. And, you know who pays the bigger, final cost — the consumer."

The Under Secretary said the Agriculture Department is monitoring proposed safety regulations for farmers because of the potential effects on production

"It is senseless to tell a farmer he has to install the latest safety gadget on his tractor when he is in the middle of planting his crops," said Knebel

"He cannot be expected to obtain a newly manufactured safety device tomorrow for an eight-year-old cornpicker which has to be especially fitted with the device.

"No one should expect him to spend hundreds, even thousands, of dollars overnight on protective equipment when his profits per bushel, pound and gallon are measured in pennies."

Under Secretary Knebel said safety standards, like environmental requirements, should be blended gradually into the agricultural industry. He said many, expensive requirements cannot be accomplished overnight and that the market-oriented policies of agriculture should be considered.

"We cannot on the one hand expect the farmer to plant fence-to-fence to meet the food needs of this country and the world, and on the other, ask that he slow down or stop his production long enough to install some new safety equipment that does not materially contribute to farm safety," he said

Knebel emphasized that USDA is taking a stronger role in farm safety efforts to provide better coordination with other federal departments which are promulgating proposed standards and regulations. He said this is being accomplished through a departmental Task Force on Safety; coordination of safety efforts through the Office of the Secretary; and recommendations of a National Advisory Committee on Safety in Agriculture.

"I'll be the first to say that safety efforts in agriculture need to be improved because of the high accident figures," Knebel said, "but agriculture does not deserve the designation of third most dangerous occupation.

"In 1974, the illness-injury rate for production agriculture was 9.1 occurrences per 100 full-time employees compared with an all-industries average of 10.4. Construction's rate was 18.3; manufacturing, 14.6; public utilities and transportation, 10 5 each; and mining, 10 2.

"Many farm accidents and fatalities are not associated with farm work. Agriculture is unique among industries because the farm is the work area, sometimes the recreation area and always the home area of the farm family.

"Accidents happen to farmers when they aren't working, just as they do to other people in other occupations, but they happen on the farm. Or, they happen to visitors on the farm, and these may be called farm accidents.

"These differentiations are not clear among the scanty statistics available about farm accidents. If these statistics were complete and could be separated, I would not be surprised if they would show that the farmer is really quite safety conscious."

The Under Secretary suggested that education, rather than regulation, was a preferable means to attain safety goals on farms. He pointed out that farmers, impressed by injuries and deaths caused by tractors rolling over, had voluntarily begun installing roll bars on their machines years before the proposed regulation.

"Another fact which impresses farmers is that 65 per cent of the victims of farm accidents are members of farm families," said Mr. Knebel. "Yet the regulations are drawn specifically to protect farm employees."

He said farmers will respond to safety ideas that make common sense, just as they have responded to the common sense of supply and demand economics and the open marketplace.

Expanding markets and greater freedom for farmers are paying off handsomely, as contrasted with conditions under controls, subsidies and government-owned reserves, said Knebel. He said new farm programs will depend upon legislation to be presented to Congress before next May 15.

Current programs for rice, wheat, feed grains and upland cotton expire with the 1976-77 crops, and legislation on these programs has to be prepared by Congressional committees, he said.

"The 1977 farm bill could be the most vital single piece of legislation enacted by the next Congress," said Knebel.

"Farmers must have freedom to decide what crops and animals to raise, how much land to cultivate and when and where to go to market. It is to his benefit, and to the benefit of consumers, for the farmer to have this vital freedom of choice."

LANDSAT I, which was launched in July 1972, and LANDSAT II (February 1975) circle the earth in a continuous polar orbit, covering the entire United States every 9 days. The two space vehicles transmit a wealth of data that's available to anyone who wants it.

PFA officer requests milk price hike

HARRISBURG — A spokesman for a general farm organization on Tuesday requested a milk price increase of 90-cents per hundredweight for farmers in Pennsylvania Milk Marketing Area 2, Zone 2. This marketing area covers 13 counties in northcentral Pennsylvania.

Richard E. Denison, manager, Farm Management and Business Analysis Service (FMBAService), urged the board to hike the Class I price paid to farmers to meet increasing cost. Presently, the Class I milk price is $10 30 per hundredweight.

Denison made the request in testimony delivered at a hearing held there by the Pennsylvania Milk Marketing Board.

FMBAService is a member service company of the Pennsylvania Farmers' Association.

The actual price increase would bring the farmers $11.20 per hundredweight of Class I milk, versus actual farmer cost of $10 15 per hundredweight

"Many times," Denison told the PMMB, "When various groups speak of farmers, they act as if some magical shroud surrounds these families. They have the feeling that economic factors affecting business, government and consumers do not affect farmers."

He explained that when taxes, labor costs and other costs go up, the dairyman suffers the same economic squeeze

"Farmers' utility bills show the same fuel adjustment clause as do ours," he remarked. "But, dairymen use five to seven times as much electricity as you and I do in our homes.

"To compensate milk producers for their costs and to provide them with a fair margin of profit, diary farmers need a Class I price return of $11.20," Denison testified.

A Schuylkill County farmer supported Denison's suggested Class I milk price of $11 20, but urged the PMMB to take into consideration young people getting established in the dairy business.

Carl W. Brown of Pine Grove said that "If the young are not able to enter or must leave the dairy industry for economic reasons, the consumer . can look forward . to exorbitant prices in the future."

Brown also pointed out the adverse weather conditions suffered by dairymen forcing them to purchase much of their feed requirements rather than growing it as is the tradition

Another dairyman, Mike Jarret of Lycoming County, cited production cost increases of 12 to 47 per cent ofr 1976

"I believe they (increased cost figures) are good indications of the inflationary prices a farmer must consider when making management decisions on his future farming practices," Jarret testified

"The milk producer of the past has looked at his profession as a way of life, I plan to make my decisions as a businessman.

The hearing covers milk prices in 13 counties, including Potter, Tioga, Bradford, Sullivan, Lycoming, Clinton, Uniln, Montour, Columbia, Northumberland, Snyder, Schuylkill, Carbon and a portion of Luzerne.

Potato grade standards proposed

WASHINGTON, D.C. - The U. S. Department of Agriculture (USDA) has proposed establishment of the first U.S. grade standards for potatoes used to make potato chips. If adopted, the standards would provide a uniform method of determining chipping quality of potatoes and a basis for establishing prices between potato growers and chip manufacturers.

The proposal would provide an optional requirement for determining fry color of the finished product, one of the most important factors in establishing prices for the raw potatoes. Officials of USDA's Agricultural Marketing Service (AMS) said contracts between growers and chip manufacturers are now based partly on "satisfactory chipping quality," but this term has no standard meaning.

The proposed standard would establish two grades - U.S. No. 1 and U.S. No. 2 - with minimum size requirements of 1-7/8 and 1-3/4 inches in diameter, respectively, unless otherwise specified. Tolerances for defective potatoes and objective methods of scoring defects would be provided.

AMS officials said the proposal is the result of two years of extensive studies and collaboration with representatives of potato growers and chip manufacturers. Although a substantial portion of the national potato crop is used by the potato chip industry, U.S. grade standards for raw products for processing currently do not include potatoes for chipping. In addition to the requirements for satisfactory chipping quality, chip manufacturers for years have used the requirements of the U.S. No. 1 grade for potatoes for fresh market in establishing purchase contracts with growers, with specifications for size and specific gravity (a measure of solids content which indicates the total amount of chips that can be obtained from the raw potatoes).

An optional requirement for specific gravity is provided in the proposal. In addition, an official USDA visual aid showing five color classifications of the finished product, with corresponding colorimeter indices, would be available for purchase.

Farmers slam OSHA on ACA Farm Line

WASHINGTON, D C - Farmers warn that government regulations are choking their operations and are bringing many of them to financial ruin This was the overwhelming opinion of hundreds of callers who responded to the Agriculture Council of America's Farm Line held recently.

A panel of top level spokesmen from Congress, federal agencies, and major food, agriculture and consumer groups took nearly 400 calls from all across the country on ACA's special telephone hook-up. This month's Farm Line asked for discussion on government regulation.

Reflecting the opinion of many of the callers, Robert Brown, a fruit grower from Albion, New York, said the "regulatory agencies are ignorant - with too much power. They are too far removed from practical experience with little understanding of the problems of farming."

The Occupational Safety Health Administration (OSHA) was particularly hit as a prime offender on "unintelligent" regulation. The proposed toilet standard for farm workers in the field was given as an example as well as the "Safety With Beef Cattle" booklet which cost about one half million dollars to put out and was later withdrawn.

Larry Bouret, Wyoming agriculture commissioner, summing up the concern of the majority of the callers said that the overall volume of federal regulations is conflicting and does not relate to the needs of agriculture. He complained that the "agencies imply to us how far we can go without breaking the law" instead of setting guidelines for "what's best for agriculture." He said that his board is against taking federal dollars because of these problems.

OSHA failed to send a representative for the panel even at the special urging of Representative Larry Pressler (R-SD) who took calls Wednesday Impressed with the great number of questions he received concerning OSHA, he was "amazed to see they did not respond to the invitation to participate in an open discussion with farmers"

Originally the invitations to the regulatory agencies and other administration officials to man this Farm Line came from Senator Carl Curtis (R-NE).

Heavy response from California and Oregon reflected the cannery strike in those areas and the helplessness these farmers feel as millions of dollars of produce rot "This crisis is strangling our local economy," said Clarice Ogle, a representative of Women for Agriculture in Independence, Ore.

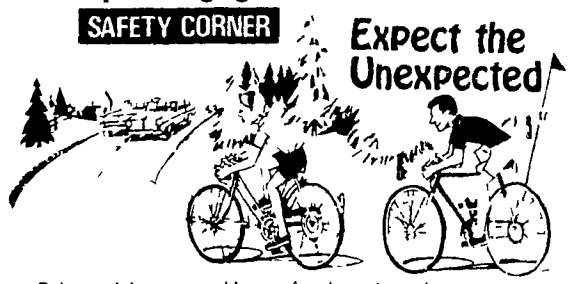
Panel members were Emmet Barker, Farm Industrial Equipment Institute; Barry Friedman, Antitrust and Trade Regulation, U.S. Chamber of Commerce; Bruce Gardner, Council of Economic Advisors; Aileen Gorman, National Consumer Congress; Howard Mattison, Institute of Food Technologists, Susan Smirnoff, Consumer Product Safety Commission; Robert Wayland, Environmental Protection Agency; George W. Koch, Grocery Manufacturer's Association; and Robert Liebenow, Corn Refiners Association. Also included were agricultural specialists from the congressional offices of Senator Carl Curtis (Neb.); Senator James McClure (Ida.); Senator Gaylord Nelson (Wis.; Representative Max Baucus (Mont.), Representative Tom Harkin (IA); Representative Joe Skubitz (Kan); and Representative Tom Railsback. Members from the Senate Agriculture Committee, USDA's Extension Service and Agricultural Marketing Service were also represented on the panel.

The information taken by the panelists will be compiled into a report. According to the preliminary look at the comments, it is hoped that the report will show the impact government regulations are having on those most directly affected.

As a non-profit, non-political, non-legislative organization, ACA does not advocate any positions of its own and operates the Farm Line strictly to provide a forum to discuss issues of major interest in agriculture. The Agriculture Council of America, formed in 1973, is made up of about 1000 individual farmers and 750 companies and organizations nationwide. Its purpose is to improve communication between farmers and consumers.

A panel of experts including top spokesmen from Congress, the administration and leading industry and consumer groups discuss the topic of "government regulation" with farmers from all across the country over the Agriculture Council of America's "Farm Line". Nearly 400 people called ACA's toll-free telephone hook-up to express dissatisfaction with federal standards and guidelines, especially those of the Occupational Safety and Health Administration. ACA plans to release a special report on the results of this two-day program in the near future.

SAFETY CORNER



Riding a bike on a public road is hazardous but expecting the unusual can avoid many accidents For example expect

- Doors of parked cars to open in your path (Allow 3 ft or more space when passing)
- Cars to cut in front of you and make a right turn at the next corner (Slow down and avoid a cut off)

CAN
IM-PRUV-ALL
SILAGE MAKE YOU
MONEY?

Since silage is superior to dry feeds in TDN per acre, the farmer can expect higher dollar yields from his silage. The increased TDN in silage means the farmer can feed more cattle with the same crop. He can produce more beef, more milk, and of course more dollars. But there are some dangers. Not all silage is the same. The farmer who wants to make sure that he makes more money with silage must make excellent silage. To insure consistent silage, he NEEDS our fermentation formulas.

Peaches year round — canned or frozen

UNIVERSITY PARK - Everyone enjoys home canned or frozen peaches as an addition to any meal. Peaches are fairly easy to can or freeze and your family will appreciate the effort when they enjoy this out-of-season treat next winter.

This year because of weather conditions, local peaches are running about 2 weeks early. You should check immediately with your favorite fruit grower to find out when the variety you want is ready. Some varieties have already become ripe and are no longer available.

Start by selecting the right variety. Better varieties will require only light syrup packs to achieve best flavor, color and texture.

The better varieties for canning or freezing include Trigem, Redhaven, Redskin, and Sunhigh. The Loring is a good variety for freezing, because it doesn't loose its color as quickly when defrosted. If you prefer white, freestone varieties; Champion, Raritan Rose, Summerose, White Hale, Laterose, and Belle of Georgia make good canned peaches. To find out when you can get each variety call your favorite fruit market.

Peaches should be ripe but not overly ripe. You may not be able to preserve the entire basket of peaches you buy at one time. Examine the peaches daily and can or freeze only those which have lost their background greenish color, and yield a little when squeezed gently.

Peaches should always be processed in the boiling water bath. The open kettle methods or oven canning is not recommended as safe and the changes of spoilage is greatly increased.

CANNING PEACHES

The peaches may be packed raw or hot in the jars before processing. Most people prefer to use the hot pack because you get a fuller pack, peaches are not as apt to float, and they retain the color better.

Raw Pack

Wash Dip in boiling water ½ to 1 minute, then in cold water. Slip off skins, cut in halves or slices and remove pits To prevent darkeing, add to water with two tablespoons each of salt and vinegar per gallon. Drain just before packing. Pack in jars to ½ inch of top. Add boiling sirup to ½ inch of top. Remove air with a dull knife. Adjust lids according to package directions. Process in boiling waer bath. Pints 25 minutes; quarts 30 minutes.

Hot Pack

Prepare as for raw pack. Heat to boiling in hot syrup. For a thin syrup use two cups of sugar to 4 cups of water. If fruit is very juicy, heat with just sugar instead of syrup. About 1 to 2 cups of sugar would be needed for each 5 quarts of peaches. Heat slowly until sugar is dissolved and fruit is boiling hot through.

Pack hot peaches into jars to ½ inch of top. Add boiling sirup to ½ inch of top. Remove air with dull knife. Adjust lids according to package directions. Process in boiling water bath; pints 20 minutes; quarts 25 minutes.

FREEZING PEACHES

Wash peaches, and pare with a stainless steel knife. Do not use the boiling water dip when freezing peaches. Slice peaches directly into sirup or mix at once with dry sugar.

Syrup Pack

Use a 35 or 40 percent syrup. For better quality add ½ teaspoon ascorbic acid (vitamin C) for each quart of sirup. If ascorbic acid isn't available use a commercial anti-darkening product.

Put peaches directly into cold syrup in container - starting with ½ cup syrup to a pint container. Press fruit down and add syrup to cover, leaving ½ inch headspace. Place crumpled freezer paper or plastic wrap on top of peaches to hold them under the syrup Seal and freeze

Sugar Pack

For each quart of peaches add ½ to two-thirds cups sugar and mix well To retain color, dissolve ¼ teaspoon ascorbic acid in ¼ cup water and sprinkle over fruit before adding sugar. Pack into containers, place crumpled freezer paper on top of peaches, seal, and freeze.

Peaches may be canned or frozen without sugar, but sugar helps retain the color, shape, texture and flavor. Unsweetened frozen peaches should be covered with water containing one teaspoon ascorbic acid to each quart of water. Another method is to make a puree from some of the peaches, dissolve one teaspoon ascorbic acid in each quart of puree. Pour puree over peaches and freeze.

To can peaches without sugar, just use water in place of the sirup. Process the same as peaches with syrup.

If you would like to dry fruits, contact the extension office for a leaflet on drying fruits and vegetables.

If you have questions on food preservation or would like a canning or freezing booklet contact the County Extension Office.

Efficiency and high per-capita production are prime elements in reaching a high standard of living. Of great importance is a competitive business environment in which supply and demand are primary determinants of market price, directing the considered use of productive resources and distribution of output.

We've come a long way since that day when someone snapped the first land area photograph from a balloon:

Aerial photographs for soil and crop surveys ... aircraft-mounted thermal scanners to detect forest fires ... aerial infrared photography to identify crops.

Labor efficiency theme of PFA farm tour

By JUDY MITCHELL
Berks Co. Reporter

HAMBURG — Pennsylvania Farmer Association members from all over the state arrived at the Hamburg Field House on August 3 to take part in a special farm management tour offered by the Farm Management and Business Analysis Service of the PFA

"Labor Efficiency" was the theme of the tour, and approximately 300 persons took advantage of the opportunity to inspect the operations of three Berks County farmers who, according to the FMBA Service, "are getting the most from their labor dollars"

Upon arrival at each of the farms, the visitors were introduced to their host by Gary Rothermel, account supervisor with the FMBA Service After a briefing on the highlights of the operation, tour participants were free to inspect them at their leisure, and prior to departure, time was provided for them to present their host with questions regarding his operation

The first farm visited was the "hog factory" of Herbert Schick, Kutztown R2 The Schick farm is a family operation involving Herbert, his wife, Anna Marie, and his son, Otto Although the Schick's are not directly involved in crop growing, they have installed a 19,000 bushel storage facility as a feed cost control measure, and by working full-time with the hog operation, managed to produce 167,123 pounds of pork per man in 1975 Features of interest at the Schick's 175-sow farrow-to-finish operation were the manure lagoon system and an automatic mill for feeding the hogs, and as an added bonus, guests received pork recipe booklets courtesy of the Pa Pork Producers Association

After returning to the Hamburg Field House for a buffet luncheon, tour participants set off for a visit to the Leroy C Zweizig dairy farm in Shoemakersville which included inspection of a three-year-old free stall barn equipped with automatic forage feeding from two upright silos, and a recently constructed three-acre pond which has turned a swampy meadow on the Zweizig property into land useful for recreation or pasture Zweizig operates his 135-head dairy operation supported with 600 acres of crops and feeds out about 80 head of dairy beef with the help of his family and one full-time employee, averaging 150 acres and 35 milk cows per man

The last farm on the agenda was that of Roy O. Christman, Hamburg R1. The Christman operation includes a 375-head dairy herd, 200 dairy beef, 100 head of hogs and 2300 acres of cropland. Roy is the general manager of the family farm operation, while his son Ronald is in charge of machinery, son Barry is responsible for the dairy operation, and Christman's wife, Gloria, serves as record keeper Christman has become noted throughout the county as the man who quite remarkably manages to farm his 2300 acres with only four tractors, and the FMBA gives the Christman's a "high" rating for labor efficiency (10 men) which averages 230 acres and 30 cows per man Points of interest at the Christman farm were the carousel milking parlor, a liquid manure handling system with a recently constructed lagoon to catch runoff, a self-propelled forage harvester, and other large-scale machinery

Tour arrangements were made by Berks County Farm Management Committee members Lawrence Kieffer, Bethel; Donald Landis, Myerstown; Ernest Miller, Hamburg R2; Chester Noll, Oley R1; Bert Schantz, Alburtis R1; Robert Seidel, Hamburg R2; Roger Wagner, Oley; and directed by Gary L. Rothermel.

Young's employees get awards

Gerald Hess, right, nutritionist and vice president of Young's, Inc., congratulates Cassel Mummau of Mount Joy for 10 years of service to the Blair County firm. Looking on are Russell Brown and Charles Gladden a feed programmer from Forest Hill, Md. Brown, president of the company which manufactures livestock supplements, was cited for 25 years of service while Gladden was honored for 15 years of employment. Hess just recently began his 10th year with Young's, which is headquartered at Roaring Spring.

National plowing contest set for Aug. 25-26

UNIVERSITY PARK - The nation's best plowmen who have that special touch in "properly primping" Mother Earth will compete in the National Plowing Contest August 25-26 on land adjoining the Rock Springs Agricultural Research Center of The Pennsylvania State University

The national plowing matches will be held as part of the 1976 Agricultural Progress Days located nine miles west of State College on Route 45 Competing will be plowmen from the Midwest and Pennsylvania, all state winners

According to N Henry Wooding, Penn State Extension agricultural engineer, the national contour division is scheduled for 1 p m on August 25 The large plow division will be held at 10 a m and the small plow matches at 12 30 p m , both on August 26

For more than two centuries, plowing matches have helped dramatize agricultural achievements The first contests were held in the 1700's in the British Isles It was 1946 when the first national plowing matches received national recognition when 8000 persons visited the plowing site in Iowa

Since then, the country's best plowmen competed for national awards in contests staged in Ohio, Missouri, Minnesota, Wisonsin, Illinois, North Dakota, and South Dakota In 1957 the National and World Plowing Contests were held in Peebles, Ohio, and were viewed by 250,000 persons

In 1968, the National Plowing Contest was held at the Milton Hershey School Farms in Hershey

Each contestant will plow approximately one acre of land, and judging will be based on straightness and uniformity of plowing, quality of the tillage surface, and prominent depressions between furrow slices

The National Plowing Contest is partially funded by a grant from the Bicentennial Commission of Pennsylvania and is sponsored by the State Plowing Contest Committee Inc

Speakers say Charolais offer much to industry

MEMPHIS, Tenn. - Charolais breeders stand in good position to reemphasize their performance leadership and impact upon the beef industry, provided they maintain breeding programs that will offer the cattleman a means of breeding back into the beef line desirable commercial values of calf yield, weaning weight, feed conversion and beefiness.

This was the overlying message to some 400 breeders of the high-performing cattle at their second annual planning conference in Memphis July 30 and 31. Speakers numbered 18 and covered virtually every phase of merchandising, some occasionally taking Charolais breeders to task for failure to recognize deficiencies in breeding, production and promotion programs.

"There are many distinct markets for seedstock, each requiring special considerations in both production and merchandising," declared Dr. Max E. Brunk, marketing professor of Cornell University, as he set the theme as conference keynoter.

Breeders heard Kenneth Monfort of Colorado tell that Charolais people happen to be 'way ahead in producing the right kind of product for the market than their competitors. But cautioned that markets will not greatly improve for any breeder until the overall industry market becomes stabilized.

Dr. Zerle Carpenter from Texas A&M University added emphasis to Monforts remarks when he said, "Charolais have that unique ability to produce more yield grade two cattle, with a few three's, after a reasonable time on feed, with 60 to 70 per cent grading choice.

Future beef markets came under the scrutiny of C. G. Scruggs, editorial director of **Progressive Farmer** magazine, widely distributed through the south. "The possibility of selling more good American beef overseas is an exciting possibility," he declared. "We need to turn our exports around by converting bulky grains to beef and exporting beef protein."

Scruggs said future markets for beef will see more reconstitution or shaping of beef to provide the consumer with the kind of beef desired. Machines will pull muscle fibers apart, flake and reshape the muscle to size needed.

Tom Duesler, a vice president of Oscar Mayer & Co., told of changing eating habits of the nation's populations, predicting even more changes in the future, all involving fast food outlets.

Other speakers on the program included a number of Charolais breeders, each telling how they accomplished a merchandising goal in specific markets, and other industry leaders.

The State Civil Service Commission is not the principal hiring agency for state employes. The Commission accepts applications, develops and administers civil service tests, establishes lists of qualified persons who pass the tests, and certifies names of eligible candidates to various state agencies who interview and select their own employes.

Beef Industry Council clues in food service

CHICAGO, Ill - To meet merchandising and menu planning needs of the foodservice industry, the Beef Industry Council of the National Live Stock and Meat Board has produced a new full-color beef chart and menu planning guide.

The new chart has been specifically designed for the foodservice industry.

Twenty-two major beef cuts are illustrated in full color, showing their locations in the carcass. The bottom section of the chart offers a menu buying guide which can be used to plan purchases and keep track of entree costs. The chart is printed on heavy varnished paper stock, permitting grease pencil markings to be easily erased.

The cuts shown are those most often used by the foodservice industry and they have been coded according to the Institutional Meat Purchase Specifications used by the US Dept. of Agriculture and the National Association of Meat Purveyors.

It's an important addition to merchandising aids designed to help keep beef at the top of the market in one of the fastest growing segments of the American economy. The National Restaurant Assn. says the $1 out of every $3 spent on food purchases goes for food away from the home; by 1980, it's expected to escalate to one out of every two food doolars. Within the restaurant protion of the foodservice industry, nearly 60 per cent use beef in the building or promoting of their business and chain.

Its title, "Beef Up America," is an appropriate reminder to the people who feed Americans away from home that Americans love beef. They eat more beef than any other meat. And it's not surprising that when they eat in the office cafeteria, fast food chain or exclusive restaurant - more likely than not they'll choose beef.

The "Beef Up America" beef cut chart and menu planning guide was officially introduced at the National Restaurant Assn. show in Chicago this past May. Copies and price information can be obtained by writing the Foodservice Department, National Live Stock and Meat Board, 444 N. Michigan Ave, Chicago, IL 60611

Nearly a fifth of farm families did custom work in 1970, but that supplied less than six percent of total off-farm income. Some 10 percent of the families reported a nonfarm business or professional practice, and a similar number realized earnings from renting nonfarm property and from other sources.

Unique orchards opened

UNIVERSITY PARK — Some of the most unique experimental orchards in the nation will be on display August 25 and 26 during Ag Progress Days at the Agricultural Research Center of The Pennsylvania State University, nine miles west of the campus on route 45. Grown for labor-saving harvesting of apples, the "orchards of the future" feature three tree designs known as trellis, slender spindle, and hoop skirt. The trellis features trees in a solid hedgerow and is designed for over-row mechanical harvesting The trees are grown on wires

All three of the experimental designs are cultured under the direction of Dr. Loren D Tukey, professor of pomology. Dr. Tukey says the slender spindle is a popular European design The hoop skirt is a slight modification of the slender spindle. As the name implies, it is a little wider than the spindle tree. Both tree forms require some type of support, such as a tall stake. Dwarf trees are used for all three tree forms.

Pork Producers Council studies test procedures

DES MOINES, Iowa - The National Pork Producers Council's Swine Health Committee recently activated at its initial meeting a survey of state diagnostic laboratories to determine the Aujeszky Disease (Pseudorabies) serum neutralization testing capabilities and procedures availalbe in this country. The results will help to determine future recommendations of the committee.

The test is considered an accurate indication of whether or not a hog has the disease or has been exposed to it. Most experts agree that extensive use of the test could help control the spread of the fatal swine disease.

The committee was formed at the American Pork Congress by pork producers attending NPPC's annual meeting. Its major emphasis this year will be Aujeszky Disease which has caused severe losses for pork producers in the Midwest.

"The committee recognizes this is a serious disease and we support research money being allocated to it in proportion to industry losses," Chairman Rick Maloney, NPPC director, said "However, due to its low incidence, eradication at this time may be possible and should be taken into consideration when anyone is providing funds for the disease."

The committee went on record opposing at this time the importation of a vaccine for the disease into the country or the use of a vaccine However, the committee supports the licensing and production of a serum which would reduce death loses

Maloney said the committee encourages all states to study imposing appropriate quarantines on active and confirmed outbreaks of the disease to protect other producers and also to protect the affected producer

Lamb price drop causing concern

DENVER, Colo. - Lamb has taken what may be its biggest price drop in history, from a high of more than 60 cents eight weeks ago to about 41 cents or less currently being quoted for live lambs in some markets.

Floyd Myers Marsh of Williams, Calif., president of the National Wool Growers Association, said the decline is drastic considering the apparent low supply of lamb on the market.

Marsh said the steep plunge of the lamb price goes even beyond the normal decline in periods of heavy marketing, yet there presently is not a large supply of lambs on hand. Most lambs coming to market at this time are from Idaho and Texas. This movement, coupled with the warm month of August, may have caused a back up in the supply temporarily, Marsh declared. Some packers, he added, are hoping to recoup some of their margins after they purchased lambs for their feedlots when lamb prices were higher a few weeks ago.

The high price of lamb, which went as high as 70 cents in some instances, did not benefit very many producers, Marsh said, but the lower price now is going to hurt a good many sheepmen who get caught in the game of catch-up. The higher retail prices of a few weeks ago also turned off the consumer to lamb for a time, and now he must be encouraged to come back and purchase lamb at more reasonable retail prices.

This is a serious problem in the livestock industry, Marsh added, with many producers trying individually to market their products with but a few buyers.

New Holland honored

NEW HOLLAND — Sperry New Holland has received the Freedoms Foundation Valley Forge Honor Certificate for the company's "Keeping Faith With the Farmer" advertising campaign.

This campaign was a series of full-color advertisements pointing out the historic significance of farming in the founding of America. It is the second time Sperry New Holland has been so honored by the Freedoms Foundation.

The series, which also was a first place winner in the Eastern Chapter of the National Agricultural Marketing Association competition, was nominated for the Freedoms Foundation honor by Mrs. Ruth Stoffel, a farm wife of Kewaskum, Wisconsin. Sperry New Holland president Kenneth F. Thompson received the award from Congressman Edwin Eshleman.

The Freedoms Foundation is a nonpartisan organization that encourages the support of fundamental freedoms through awards and educational programs. Selection of this year's awards was made by an independent jury made up of justices from state Supreme Courts and officers of various patriotic and veterans organizations as well as service clubs

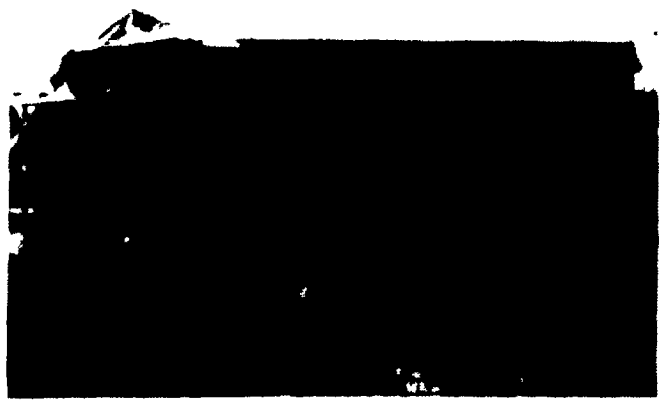
What's New . . .



AUTOMATIC TARPER

New Fenton's Tarper from Meade Manufacturing, Inc., is completely automatic and effectively covers everything from grain and gravel to small animals and tools for safe, easy transportation

According to the manufacturer, the Fenton's Tarper was designed by a custom harvester to prevent loss of grain. The electric controls are installed in the cab of the truck so the truck can be tarped or untarped while in motion. Special features for harvesters include easy combine header loading by sliding the combine header in the back of the truck.

The Fenton's Tarper is made from heavy-duty, vinyl-coated nylon with electronically sealed seams. It will not tear, split or burn and is moisture tight. There are no louvers to bend out of shape and no channels or tracks to catch grain. Truck end gates can be removed without removing tarper.

The tarper is available in lengths from 12 to 40 feet with a thirteen inch center clearance and it can be easily installed and removed. The tarper is available without electronic controls for manual operation.

Price list and further information are available from Jim Luder, General Manager, Meade Manufacturing, Inc., Box 710, Meade, Kansas, 67864.

CALF NURSERY

A newly designed calf nursery has been added to the expanding line of livestock confinement buildings and related accessories manufactured by the Ag Best Corp. of Nappanee, . Indiana. Incorporated into the new calf nursery design is a special new-born pen for separate isolation as well as two growing pens and a series of individual stalls on each side of the unit. Each pen has a removable head gate with a hinged section at the top to permit positive entry for the buckets. These gates are hinged dually and swing either way.

The pit construction of the new unit has a 30 inch depth which will give a 20 percent higher holding capacity. Staged ventilation, from minimum to maximum, is easily attained without the use of complicated devices. A rheostat controls the variable speed fans and the air inlet is adjusted by turning a winch that allows a positive adjustment to 1-16 of an inch, permitting zone heating or cooling adjustment as desired within the unit

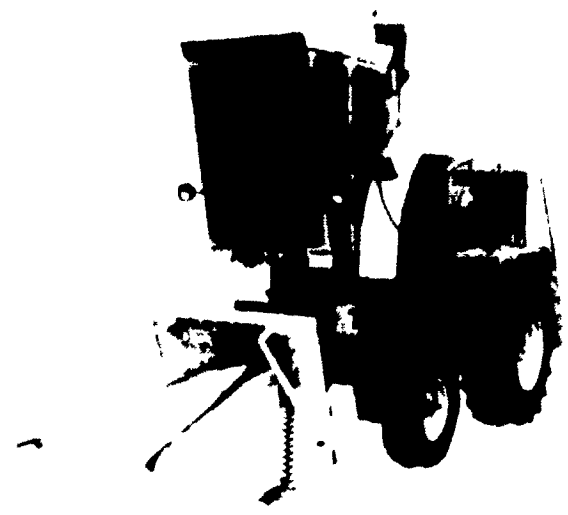
Exterior walls of pre-painted galvanized steel and interior walls of fiber-glass sheeting greatly facilitate cleaning and sanitizing of the buildings Because of the controlled facilities, calf rearing is simplified and calf mortality rate greatly reduced

Self-Propelled Forage Harvester

Field Queen, Division of Hesston Corporation, has taken its standard self-propelled forage harvester - and added many new features designed for extra operator convenience and even greater capacity.

A new **Command Post** cab features all-tinted glass, excellent visibility, convenient controls, adjustable steering column and rubber mounting with sound insulation. The cab is standard and air conditioning and heater options are available. A new hydraulically controlled 350 degrees rotation truck spout directs forage to right, left or rear and an optional swinging draw bar simplifies towing of trailing wagons.

A big 210 horse-power industrial Caterpillar diesel, with 70-gallon fuel tank, provides plenty of power to the Model 7600's big capacity cutting assembly and hydrostatic ground drive The hydrostat lets you adjust ground speed to field conditions while maintaining optimum engine and cutter performance. A longer wheelbase, with 3.1 weight ratio, puts more weight over the rear drive wheels for greater traction, extra stability and a smoother ride. Front wheel power steering is natural and precise. And the cutting assembly drive has been rearranged for easier serviceability.



The Model 7600 also features Field Queen's exclusive Componentized Construction. Major mechanisms, like the cutter assembly, cutter assemly drive, feed roll drive and blower are easily replaced or repaired. This unique concept allowing easy replacement of the cutter assembly gives the "heart" of a new harvester at a fraction of the cost involved in replacing other types of cutters on the market.

The cutter assembly itself is designed for high capacity. Six 23-inch knives are angled across the 22-inch wide cylinder for extra length. The zero clearance cutting cylinder assures a uniform cut all across the shear bar. Four aggressive, positive action feed rolls carry a smooth crop flow to the precision engineered cutting cylinder An optional hydraulic rebevel grinder is available with the Model 760 to let your rebevel knives right in the field for maximum cutting efficiency

A wide assortment of attachments gives the Model 7600 year-round versatility Headers include two- and three-row low profile corn heads, six-foot windrow pickup, 12-foot direct cut head, two-, three- and four-row snapper heads, an A C Gleaner grain head and a Stover Attachment. A unique Loader Attachment gives extra duty from the Model 7600. It moves payloads up to 3,500 pounds with lift capability to 21-feet high

Another new feature that provides extra duty between harvests is Field Queen's mechanical PTO option

Cathy Brubaker wins state dress revue

UNIVERSITY PARK - Cathy Brubaker, 345 Running Pump Road, Lancaster, was selected the State 4-H Dress Revue winner from among the 35 contestants at The Pennsylvania State University, August 11

The Dress Revue was held at the University Auditorium on the University Park Campus in conjunction with State 4-H Achievement Days.

Seventeen-year-old Cathy is the daughter of Mr. and Mrs Glenn S. Brubaker, Lancaster. She modeled an unlined wrap jacket and six-gore shirt of brushed blue denim, topstitched in white. A long-sleeved, loose-fitting plaid shirt gathered into a one-piece yoke, and matching denim handbag completed her ensemble.

Cathy was selected the winner by a panel of three professional judges and the other 34 participatns. Entrants were judged on garment construction, modeling, and how well the garments suited them. Each regional winner selected one of four categories in which to be judged - school outfits, spectator and active sports, street attire, and formal and informal party dress Cathy was entered in the street attire category

A 4-H member for nine years, Cathy is a member of the Landisville Sewing Club and served that club as president, vice president, secretary and news reporter She presently serves as co-president of the Lancaster County 4-H Council

A 1976 graduate of Hempfield High School, Landisville, Cathy enjoys sewing and sports activities.

As winner of the Pennsyvlania contest, Cathy will represent the state in the National 4-H Dress Revue during National 4-H Congress in Chicago, November 28-December 2.

National sponsor of the dress revue program and donor of the expense paid trip to the Congress is the Simplicity Pattern Company, New York City. The State Dress Revue is sponsored by the Cooperative Extension Service at Penn State.

Cathy Brubaker

Livestock pulling contests set for Eastern States expo

WEST SPRINGFIELD, MASS. — Livestock Pulling Contests, one of the popular attractions of the Eastern States Exposition Livestock Show, Sept. 15-26, are again planned for this year. Top competitors throughout New England are registering for this year's competition.

Pulling contests involve teams of horses, oxen, or ponies pulling a specific load in a continuous forward movement of six feet.

Horse pulls are scheduled for September 15 and 16, ponies on September 20, and oxen September 22 and 23.

The contests briefly take spectators back to the days of early America, before the advent of machines, when draft animals did the work of clearing and tilling the land.

The Eastern States Exposition Livestock Show is part of the Eastern States Exposition in West Springfield, Mass., and is the largest of its kind in the East, annually featuring the best of cattle, sheep, swine and goats from the region.

NH film wins award

NEW HOLLAND - A motion picture produced by Sperry New Holland has been named to receive an Award of Creative Excellence by the U.S. Industrial Film Festival. "Agri-Newsreel 1976" captured the award in the agricultural category of the competition.

Agri-Newsreels are produced annually by the company as part of the public relations department film program. The newsreels provide information on new and unusual farming throughout North America. The film was written and directed by Donald L. Collins, press relations supervisor and was photographed by Aldin Brown, senior photographer.

Included in the film are stories on a variety of new equipment introduced by Sperry New Holland last year; research on new alfalfa varieties in western states and a look at the importance of the honey bee to farmers and research being done to help increase the bee's effectiveness in the pollination process.

Also included are segments on Canadian farming practices in the Atlantic provinces and a special partsman course at an Alberta college. A special program for boys and girls run by the Alabama Sheriff's Association is also covered. The film ends with a tribute to farmers, created as part of the company's Bicentennial tribute to American agriculture.

THE HOWS AND WHYS OF PERFECT MERINGUE

When making a tall and tender meringue, the bowl and beaters you use must be free of any grease or oil The tiniest speck of fatty substance causes greater volume loss.

Beaten egg whites reach maximum volume when whites are at room temperature.

The early addition of cream of tarter stabilizes the egg whites The cell walls become stronger, permitting them to hold more air without breaking down. If cream of tarter is old or not available, subsitute 1 teaspoon of fresh squeezed lemon juice for ¼ teaspoon cream of tarter. Contrary to popular belief, salt actually lowers the stability of egg whites.

The amount of beating before and after adding the sugar is a key factor in creating a successful meringue. Beating whites only to the "soft peak" stage before AND after adding sugar can help prevent such common meringue problems as beading, weeping, slipping and dryness. The key here is "soft peak." The term "stiff but not dry," commonly used in many recipes is one stage beyond "soft peak" and will not give a tender perfect meringue.

Practice makes perfect. It won't take long to know the "just right" stages for adding sugar and beating.

CAUTIONS ABOUT MAIL-ORDER INSURANCE

If you have received medical insurance information in the mail make sure you check thoroughly before you buy A careful reading should tell you what coverage you'll get and what you won't get

Look for obvious things the company may have omitted - for example, how much you have to pay for the premium Read the fine print in the policy. Check the way they define terms. This has a lot of bearing on the kind of coverage you'll get. For instance, some mail order policies define the word "hospital" in such a way that most hospitals don't qualify to give the treatment the policy will cover.

Try to compare the coverage the policy offers to the actual hospital costs you are likely to be charged. Some policies offer you $20 a day. At current hospital costs, their coverage may not be very helpful.

Take a look at the tone of the insurance company's letter. Are they trying to frighten you into buying? Some companies make a special effort to send their letters to women, claiming women need hospitalization more often than men. Other companies send their letters to middle-aged and older people, claiming they need medical care more often. Don't buy because of scare tactics.

Check with the Pennsylvania Department of Insurance to determine if the company is licensed to do business and on the reliability of the company. The Pennsylvania Department of Insurance has four offices in the state with consumer services. Check with the following office which is closest to you: Insurance Department, Room 406 Finance Building, Commonwealth & North Streets, Harrisburg, Pa 17120, (717) 787-2317

Ad position filled

DeFOREST, Wis - James H Clark has assumed the position of director of advertising and public relations for American Breeders Service (ABS), here Prior to his appointment, effective July 1, Clark was general manager of ABS of Canada Ltd, Calgary, Alberta

Clark was born and raised on a livestock and grain farm at Brandon, Manitoba and served three years in the Royal Canadian Air Force Upon receiving an agricultural degree from the University of Manitoba, he joined the Manitoba Department of Agriculture serving as fieldman, assistant livesotck commissioner and then livestock commissioner and director of livestock.

James H. Clark

Clark joined ABS in 1960 as district sales manager in Canada In 1965 he was appointed ABS Regional Sales Manager in Billings, Montana, with sales and marketing responsibilities for western Canada, Montana, Wyoming and North Dakota He was named General Manager of ABS of Canada Ltd in 1974, with overall management responsibilities for facilities, bulls, distribution and marketing

---

-The growth of American agriculture has led to the development of a massive agribusiness complex It serves farmers with a steady stream of credit, chemicals, machinery, seeds, feeds, and other economic "inputs" that help make the individual farmer more productive.

Use dehumidifier to best efficiency

YORK - To do the best job of drying out moist basement air, a dehumidifier needs help Its efficiency depends upon where you place it. Before setting up your dehumidifier, check the owner's manual for suggestions of placement, urges Joan Lamberson, York County Extension home economist.

In an open basement, place the dehumidifier over a drain in the center of a room rather than against a wall. In a basement divided into rooms, place the unit near an open doorway, a drain and the center of a room. Or, you may get better results if you use two smaller units, each with a smaller capacity than one large model.

To improve air circulation, use a large fan, leave doors to rooms in the area open, but shut all windows and doors leading upstairs or outside.

If your dehumidifier has a humidistat, turn it to "drier" or "extra dry" during the first days of operation. This will remove moisture from furnishings as well as from the air. After the area dries, readjust the humidistat to your comfort level.

To eliminate possible electrical shock if water should be spilled, turn off the machine and disconnect the plug before emptying the water pan or bucket. And make sure the cord, floor, and your hands are dry before reconnecting the appliance.

HOW TO USE A DEHUMIDIFIER FOR BEST EFFICIENCY

Dehumidifiers need little care or upkeep. But it's important to regularly dust the grill with a soft brush or vacuum cleaner dusting attachment. Wipe the cabinet with a damp cloth. And to discourage the growth of mold, mildew and bacteria, scrub the drip pan with a mild detergent and a sponge or cloth. Before cleaning always disconnect the plug.

At least once-a-season, remove all dust and lint from the cooling coils with a soft brush. Lubricate the casters with a few drops of oil, then run the casters over newspaper to catch any oil drippings.

Corn production may be entering a new era if this tassel seed hybrid passes the stress tests, and you might have to eat sweet corn like grapes. It's a long way down the road, but corn researchers at DeKalb AgResearch, Inc., believe they can boost corn yields by 250 to 300 per cent over current levels by moving the grain production site from ear to tassel. Then, possibly no more corn on the cob.

Sealcrete can paint your farm buildings quickly and inexpensively.....

COWAMP agricultural area map approved

HARRISBURG - The tudy Advisory Committee hich is a public committee hat is reviewing Penn-lvania's Comprehensive ater Quality Management lan (COWAMP) met hursday night and en-orsed the effort of gricultural representatives ho have worked together ith COWAMP staff to roduce a map of sensitive gricultural areas

Several months ago the ommittee felt that con-ideration of agricultural areas in COWAMP should not be limited to areas with the best soils classification which was what had been proposed Many of the productive orchards and dairy lands are on the lower class soils Therefore, at a previous meeting they recommended that the agricultural representatives in each of the nine counties attempt to produce a map of agriculturally sensitive areas The county meetings were held in May and June and the map that resulted was approved at Thursday night's meeting This is an example of the way in which the public is influencing the formation of the Comprehensive Water Quality Management Plan (COWAMP) so that it reflects the needs of the region

Gideon Yachin, representing Adams County, questioned whether the purpose of mapping agricultural areas is to discourage development and whether the map will be used for evaluation of non-point pollution sources of pollution Terry Rightnour of Gannett, Fleming, Corddry, and Carpenter, Inc, the consultant to DER for COWAMP explained that placing sewer lines near an agricultural area can induce development in that area. COWAMP will point out conflicts between sewer lines and agricultural areas He added that the placement of sewers alone will not determine where development will occur but it can be used as one tool to help implement local land use planning. He stated that the sensitive agricultural areas map will not be used to evaluate non-point source pollution. Eugene Hoffman from the Lebanon County Farmers Association pointed out that non-point sources of pollution are not limited to storm water runoff from farms but also include storm water runoff from urban areas.

The COWAMP consultant also gave a presentation on its proposed revisions to the Department of Environmental Resources stream standards Stream standards were adopted in 1973 for every stream in Pennsylvania In nearly all cases the stream standards will meet the Federal goal of having every stream fishable and swimable by 1983 Many industrial and community waste treatment plants may be required to upgrade so the stream standards can be met Persons who would like to receive additional information on COWAMP or become active members of the committee can write to COWAMP, Box 2063, Harrisburg, Pa 17120

The committee will meet next on September 30 at 7 00 p m at the Holiday East Motor Hotel, Rt 283 and the Pennsylvania Turnpike to further discuss and comment on the stream standards The public is encouraged to attend this meeting.

Vacuum pressure fluctuations may induce mastitis, study shows

RALEIGH, N C - Pressure fluctuations in vacuum lines of milking machines can induce mastitis by causing air to rush against the cow's teats The rush of air can carry milk containing mastitis bacteria into the teat canal, says Dr. Paul D. Thompson of USDA's Agricultural Research Service.

Dr. Thompson subjected 12 Holstein cows to milking routines in which he varied fluctuations in vacuum pressure. Two teats of each cow were subjected to an abrupt vacuum loss after milk flow had ended. Air let into the long milk tube at its connection to the milker bucket caused a back-rush of air. This tube was contaminated with large amounts of mastitis bacteria. The other two teats were used as controls and the short milk tubes to those teat cups were clamped before the teat cups were removed. Clamping the short milk tubes prevented a back-rush of air from the long milk tube towards the control teats Only five per cent of the control teats became infected with mastitis while 22 per cent of the teats subjected to vacuum fluctuations became infected.

Based on this and other research he has conducted on mastitis, Dr. Thompson makes the following recommendations to dairymen to help control mastitis infections:

Selected milking machines that do not have vacuum fluctuations; that have cups which stay on the cow and do not slip off easily; and that have large milk lines and large capacity claw bowls so that milk flows freely.

Shut off the vacuum at the short milk tube before removing individual teat cups; shut off the vacuum at the long milk tube before removing milking unit

Dr. Thompson reported his research before the 71st Annual Meeting of the American Dairy Science Association.

Operate machines with low milk lines or use receiver jars.

Buy machines from a company with a good service record in the local area; keeping machines in top working order is important.

Use all the corn silage you cut - and make more money with Beacon Silage Pre-Serv

Nearly 2,000 farmers in the Northeast have treated more than 300,000 tons of hay this year, and they used only 2 pounds of Pre-Serv per ton to get better hay. Most of them will use Beacon Silage Pre-Serv on corn silage too, for these reasons:

It's Profitable

Pre-Serv prevents heat build-up, controls oxidation, and greatly reduces spoilage and shrinkage. So don't waste money by throwing away spoiled silage. You'll get up to 30% more feeding value -- essential protein, carbohydrates and vitamins per ton when you use Beacon Silage Pre-Serv.

It's Convenient

You can harvest and treat corn silage at 60-65% moisture. Apply it wet with an applicator, or sprinkled dry over each load. You save labor because there's less lumping and bridging in the silo.

It's Economical

A ton of silage requires only ½ pound of dry Pre-Serv, or 1 pound of liquid Pre-Serv. Getting the most feed value out of your silage with Beacon Pre-Serv is part of what we call **No Nonsense Feeding**

Wendy Shaw has top dairy cow

Allentown 4-H and FFA results tallied

By JUDY MITCHELL
Berks Co Reporter

ALLENTOWN — By the end of the three days of dairy competition at the Allentown Fair this past week, Berks County's Wendy Shaw had led her four-year-old Holstein, Doll, to a sweeping victory that included six champion blues and the title of Supreme Champion Dairy Cow.

A six-year veteran showman, Wendy took the top spots in both showing and fitting in the 4-H events on Monday. That same day, Doll took grand champion in both the 4-H and FFA black-and-white contests, as well as the 4-H grand champion blue over all breeds. On Tuesday, Wendy and Doll came back for first place in the open contest for the Holstein breed, and by Wednesday afternoon, Doll was judged the champion dairy cow of all breeds shown.

Although unable to find words to express how it felt to be a big winner, Wendy did say she would be in Kutztown next week to try and "do it again."

Another top winner in the Allentown dairy competition was Eddie Henley of Cochranville, Chester County, who showed the champion and reserve champion in the FFA Ayrshire breed contest and the grand champion in the Ayrshire open. Eddie was also champion showman and fitter in the FFA dairy show.

Sam Yoder is pictured with his four-year-old animal that won Grand Champion in the 4-H Milking Shorthorns contest.

In other 4-H events, William C. Henley of Cochranville showed the grand and reserve champions in the Ayrshire breed; Daryl Urmy, Coopersburg R1, showed the grand and reserve Brown Swiss champions and was himself reserve champion in showing and fitting; Denise K. Andrien of West Chester had the grand champion Guernsey; Bruce Heller, Downington, exhibited the grand champion Jersey and was junior reserve champion showman and fitter; and Samuel Yoder of Shoemakersville showed the grand champion Milking Shorthorn.

In the 4-H junior showing and fitting events, Patricia Dreisbach of Hamburg was the champion fitter, and Brian Dietrich of New Tripoli was the junior champion showman.

(Continued on Page 87)

Mildred Seeds is shown with her Jersey aged cow that took Grand Champion in the open contest for that breed.

Wendy Shaw of Oley won four Grand Champion ribbons with her Holstein, Doll. The animal won Grand Champion 4-H Holstein breed, 4-H Grand Champion over all breeds, Grand Champion Holstein in the FFA contest; and the Grand Champion Holstein in the open contest. Wendy was also champion fitter and showman in the senior division of the 4-H competition. To top all the other awards, Doll also was named Supreme Champion Cow.

Other winners in the FFA dairy contests were David Nolan of Birchrunville who showed the grand and reserve champions of the Brown Swiss breed, and Lester Barton of Macungie who had the grand champion Guernsey. Susan Wilde of Coopersburg R2 showed the only Jersey, and Nedra J Yoder of Shoemakersville the only Milking Shorthorn, in the FFA contests.

David Ketner, Hamburg, exhibited the Brown Swiss named Supreme Champion Bull over all breeds and an eight-year-old Swiss cow that took grand champion in the open contest for that breed. Both animals are owned by Dr Robert O. Snelling of Buttonwood Farms, Birchrunville.

Bruce Heller is shown with his three-year-old Jersey that took Grand Champion in the 4-H contest for that breed. Heller was also reserve champion fitter and showman in the junior division of the 4-H contests.

The Henley brothers, William with his two-year-old Ayrshire who took Grand Champion in that 4-H breed contest, and Eddie, whose eight-year-old took Grand Champion in the FFA Ayrshire breed and also Grand Champion in the Ayrshire open are pictured with their animals. The Henleys are from Cochranville.

In other open contests, Winnie Miller from Tamaqua R3 showed the grand champion Guernsey; and Mildred Seeds, Top 'O Hills Farm, Downington, entered the grand champion of the Jersey breed.

The results of the swine, sheep, and goat competitions were as follows.

SWINE

Grand Champion Boar - a Duroc owned by Leslie Lazarus, Whitehall; Grand Champion Sow - Landrace breed showed by Cheryl Wessner, New Tripoli; Grand Champion Barrow - a Hampshire exhibited by Todd Bennecoff, Kutztown.

Champions in Breed Categories

Hampshire Boar - Terry Bennecoff, Kutztown, who also had champion sow and barrow in this breed; Chesterwhite, Boar - Dennis Grumbine, Myerstown, who also had champion sow and barrow in this breed; York, Boar - Calvin Lazarus, Whitehall, Sow - Grant Lazarus, Germansville, Barrow - Grant Lazarus, Germansville; Duroc, Boar - Calvin Lazarus, also sow and barrow in this breed; Berkshire, Boar - Terry Bennecoff, Kutztown, Sow - Dennis Grumbine, Barrow - Terry Bennecoff.

Poland China, Boar, sow and barrow - Elsie Hower, Catawissa; Spotted Poland China, Boar - Leslie Lazarus, Whitehall, Sow - Michelle Bankert, Red Lion, Barrow - Michele Bankert, Red Lion; Landrace, Boar - Harlan Wessner, New Tripoli, also champ barrow, Sow - Cheryl Wessner, New Tripoli.

SHEEP

Grand Champion Ram - entered by Erdenheim Farms, Lafayette Hills, exhibited by Al Huff; Grand Chamipon Ewe - Same as above only exhibited by Carlton Huff.

GOATS

Grand Champion - Best Doe in Show, was an Alpine named Princess owned by the Stoneback Family from Oxford, Chester County.

Champions in breeds

Alpine - Princess above; La Mancha - Tia showed by Scott Walker, Oxford; Nubian - Sunset, entered by the Putcher Family, Flemington, N.J.; Saanen - Gigi, Blakeley Family, Rising Sun, Md.; Toggenburg - Lady Fair, Ann Miller from Furlong, Pa.; Recorded Grade - Tina, Tom Osala, Rising Sun, Md.

Winnie Miller, Tamaqua R3, had the Grand Champion Guernsey in the Guernsey open contest.

Price index higher

HARRISBURG — The July 15 Index of Prices Received by Pennsylvania farmers decreased one per cent from the previous month but was seven per cent above a year earlier, according to the Crop Reporting Service.

Lower prices for hay, apples, meat animals, and poultry more than offset slightly higher prices for milk, feed, and food grains. The purchasing power of prices received was one percentage point below June but remained the same as a year ago.

Nationally, the Index of Prices Received was unchanged from June but three per cent above a year ago. Higher prices for most crops, especially soybeans, and dairy products were offset by lower prices for meat animals. The purchasing power at the U.S. level was the same as last month but four percentage points below a year ago.

Egg promo available

PARK RIDGE, Ill. - A 25-minute presentation describing the new American Egg Board is now available for egg industry meetings.

It explains AEB's programs for advertising, consumer education and research. It also highlights proposed programs made possible by national check-off funds.

The multi-media presentation was created in support of the strong communications program recommended by members of the American Egg Board to inform the industry of AEB activities.

It includes slides, 16mm film of the three "Incredible Edible Egg' TV commercials and a sound tape of one of the radio commercials.

The presentation may be made by Board members and alternates. Requests may be directed through AEB at 205 Touhy Ave., Park Ridge, IL 60068. Telephone 312-696-1390.

The Champions

Joyce Moyer and her first-place aged cow, "Arbelane Triumph Jewel," was chosen for senior and grand champion in the show A 7 year old daughter of "Skokie Frasea Jewel," the stylish Holstein cow recaptured the championship banner from her daughter, who was grand champion in 1975 "Jewel" had previously won the most prestigious title in two Lebanon Area Fair shows before that. The banner this year made it four in a row for owner Joyce, a pretty 16 year old brunette from Lebanon

The reserve senior and reserve grand championship honors were taken by Barbara Sattazahn and Dale Weaver, respectively.

Weaver and his junior calf had earlier placed first in the class competition, and then went on to become junior champion and finally reserve grand. He exhibited a daughter of "Lime Rock Bootmaker King." Barbara Sattazahn showed the

[Continued on Page 89]

Sixteen year old Joyce Moyer exhibited her fourth consecutive grand champion at the Lebanon Fair's 4-H Holstein Show this week. This particular cow had won the event twice previously, although last year it was won by her daughter, which placed third in this year's show.

Gary Mase of South Annville and Patti Heilinger of Newmanstown cleaned up in Brown Swiss competition at the Lebanon Fair. Mase, 14, had the grand champion, while 11-year-old Miss Heilinger picked up the reserve banner.

Brothers Pat, left, and Ken Arnold of Schaefferstown made it a clean sweep in the Guernsey 4-H show by showing these calves all the way up to grand and reserve grand champions.

Jane Bomgardner and Dean Moyer were the top dairy judges for 4-H and FFA, respectively. The contest was a part of the many activities staged at the 1976 Lebanon Area Fair.

Champion and reserve champion Jerseys in 4-H competition were shown by Sue Bomberger and William Hoffman.

Lebanon Area Fair 4-H Dairy Show

reserve champion, a 4 year old daughter of "Simpson Farm Tidy Gent." The reserve junior champion was Carl Weaver with a "Lime Rock Welsadale Nelson" daughter

AYRSHIRES

As with the FFA show, the Ayrshire contest was dominated by the Maulfairs of Jonestown Brenda and Diane took all of the championship honors. In the FFA contest it was Dale Maulfair, brother of the two, who began farming in partnership with his father a year ago Elaine Maulfair took first place in the junior calf and 3-year old classes, while Diane took the top ribbons for dam and daughter pairs, aged cow, 3-year olds, junior yearling, and intermediate calf. A third sister, Brenda, came away with the honors in two-year old and senior calf contests The senior yearling contest was won by Sharon Hernley of Cochranville

The grand champion of the show was Brenda's "Maulfair Acres Harry Gail," a 2 year old daughter of "Meredith Harry." Her senior calf entry, sired by "Oak Ridges Flashy Classic," went on to be the reserve grand champion Reserve senior champion was a 3 year old daughter of "Oak Ridge Flashy Klondike," which was shown by Diane Reserve junior honors went to Diane also

BROWN SWISS

Three exhibitors shared in the glory when it came to accepting the most coveted blue ribbons in this contest Gary Mase of Lebanon took the grand and senior championships with his "Margie Aleric Jessie," a 4 year old daughter of "Rolling Meadows Alaric" Taking the junior champion and reserve grand banners was Patti Heilinger of Newmanstown, and in the reserve junior champion slot it was Franklin Hoffman, also of Newsmantown

GUERNSEYS

Dale Smith and two of his cows took four of the top places in the contest His two year old, "Lebanon Valley Fortune Vira," was both senior and grand champion

Carl Weaver of Myerstown doubled as grand champion for showing and fitting in 4-H dairy show competition In addition, the Lebanon Countian had the first-place junior yearling and reserve junior champion at the Lebanon Fair

The Ayrshire shows in Lebanon County are usually dominated by the Maulfairs of Jonestown. This year's 4-H show at the Lebanon Area Fair was no exception as Diane, left, and Brenda Maulfair took grand and reserve grand championship honors with these animals.

Lancaster Farming Photos by Dieter Krieg

Another of his animals — this one a three year old sired by "Welcome Flashs Hillirex," was awarded the reserve honors in both contests. His brother, David Smith, also of Annville, took the reserve junior championship banner, placing second to Patti Heilinger, who exhibited a junior yearling sired by "E. E. Lilason Joe."

JERSEYS

Susan Bomberger and Bill Hoffman faced each other in the Jersey show, with each taking an equal number of championship trophies. Sue won the ribbons for senior, grand, and reserve junior champions, while Bill walked off with honors for junior, reserve senior and reserve grand champions. Miss Bomberger's grand champion was a four year old daughter of "Eastwood Surprise Milkboy."

Top judges chosen

LEBANON - In the dairy judging contest held here at the Lebanon Area Fair this week, Jane Bomgardner topped a field of five in the 4-H division, and Dean Moyer accomplished an identical feat in the FFA category.

Miss Bomgardner was followed, in order, by Gary Masem, Kirby Horst, Shawn Hernley, and David Bomgardner. In the FFA contest, the runner-up was Reid Hoover, followed by Ronald Brubaker, Art Swinehart, and Allen Hostetter.

In the 4-H veal contest, Robert Martin checked in for first place, followed by Melody Bomgardner, Jonathan Arnold and Cindy Bomgardner.

Dale Smith of Annville exhibited the grand and reserve grand champion Guernseys in the 4-H Dairy Show at the Lebanon Fair this week.

Lebanon County's dairy princess for 1976, Rose Marie Brandt, congratulates the top exhibitors in the 4-H Holstein show at the Lebanon Fair. Sixteen year old Joyce Moyer, center, showed the grand champion, while Dale Weaver, foreground, exhibited the reserve grand champion. Joyce, who has shown four grand champions in as many years, is shown with last year's grand champion, a daughter of the cow being held by her brother, right. The winning animal this year has three grand champion banners to her credit.

Barb Sattazahn, Lebanon, was reserve champion showman at the 4-H dairy shows held on Tuesday at the Lebanon Area Fair.

40 nations to participate in World Agricultural Education Conference

ALLXANDRIA Va U S Secretary of Agriculture Earl L Butz will be one of the featured speakers at the First World Conference in Agricultural Education for Youth and Adult Leaders to be held this fall in conjunction with the 1976 National Convention of the Future Farmers of America in Kansas City, Mo Butz will address a joint session of conference participants and FFA members on Friday, November 12

Hosted as a Bicentennial activity of the Future Farmers of America, the First World Conference in Agricultural Education will be held in conjunction with the 1976 National FFA Convention More than 150 agricultural youth and their adult leaders from 22 nations are expected to attend the five-day program.

The Conference is being made possible through a financial grant to the National FFA Foundation, Inc., from Massey-Ferguson Inc., Des Moines, Iowa, a leading manufacturer of farm machinery and the largest company in Massey-Ferguson Limited's worldwide group of companies. The Conference program will feature seminars on agricultural education for teachers, administrators, and youth leaders, as well as the First International Agricultural Olympics competition

Invitations to the Conference were extended to 40 nations under the joint signatures of U S Secretary of Agriculture Earl Butz and U S Secretry of Health, Education, and Welfare David Mathews To date, 22 countries have accepted the invitation Countries that plan to send delegations include Australia, Austria, Brazil, Canada, Chile, China (Twaiwan), Colombia, Iran, Ireland, Japan, Mexico, New Zealand, Nicaragua, Panama, Poland, Romania, Switzerland, United Kingdom (Northern Ireland, England and Scotland), USSR, and West Germany.

A highlight of the week's activities will be participation by agricultural students in the First Agricultural Olympics. The competition will bring agricultural students from around the world together in tests of agricultural knowledge and skills. Contests to be included in the Olympics competition include dairy and livestock judging, tractor and machinery operations, agricultural mechanics, horticulture, and poultry and egg judging

Planning for the Conference has been under way for nearly two years, according to Lennie Gamage, FFA program specialist for International Programs A planning committee made up of representatives from participating nations met in Kansas City during the 1975 National FFA Convention to plan the program and set guidelines for the Olympic competition

Participating countries have been invited to prepare exhibits which will be on display at the convention site during the meeting A multi media presentation entitled "Rural Youth Organizations Around the World" is also being planned The presentation will show contributions youth organizations make in the development of young people and agriculture

Major topics of the seminar portion of the World Conference are expected to center on the world agricultural situation and prospects for beginning farmers, systems of agricultural education in use throughout the world, and the role of youth organizaions in rural development

Grant calls foul on consumer groups

BROOKINGS, S.D. — The selective blindness of so-called "consumer protection" groups "who remain oddly silent when labor strikes leave thousands of tons of fresh fruit to rot on the ground," has been scored by a national farm leader.

Allan Grant, president of the 2,500,000 member-family American Farm Bureau Federation, speaking before a Citizenship Seminar here, said that many consumer-protection groups are "little more than fronts for organized labor.

"They do not reflect consumer views or offer true consumer protection. Rather, they reflect the aims of organized labor and serve its causes by their conveniently controlled tunnel vision, and strange silence, whenever food price-boosting actions are made by labor.

Allan Grant

"Their credibility is destroyed by consistent failure to investigate, or to make public disclosure, of the lion's share of the growing food marketing spread taken by labor," Grant said."

The loss of thousands of tons of ripe fruit and vegetables due to the Teamster strike at processing plants in California, Grant said, will touch off another round of retail food price hikes for peaches, apricots, pears and tomatoes in the months ahead.

The farm leader added that labor already accounts for 51 per cent of all farm food marketing costs, with packaging the next largest cost area at 12 per cent, followed by transportation at eight per cent. He said "it is no coincidence" that some of the professional consumer advocacy groups and federations have labor unions as members and sponsors.

"When have you ever seen a report from a consumer 'protection' group — by any name — pointing out the increased living costs to all consumers caused by union featherbedding, make-work rules, or excessive wage demands without increased productivity?" Grant asked.

"This convenient blindness extends to inflation which robs the poor, those on fixed incomes and retired people," Grant said. He noted that many consumer advocates strongly support expanded programs of deficit government spending, which he called the prime cause of inflation and high living costs.

"Why, in all of the so-called accountability projects aimed at others, have we not heard of one aimed at the actions of labor monopoly, or big government? Instead, fingers are pointed elsewhere — at farmers, or industry," Grant said.

Three ABC sires cited

LANCASTER — Atlantic placed three bulls among the top 10 Holstein Honor List Sires based on high milk or fat records by daughters in 1975, according to the June 25 issue of Holstein-Friesian "World" magazine.

The sixth-highest bull was 15H103 Ivanhoe Star, followed by 15H96 Performer in the No. 7 position, and 15H62 Apollo, tenth. Osborndale Ivanhoe continues to be far ahead of all others as the leading lifetime Honor List Sire. All of these bulls have several sons or grandsons currently in various stages of development in the Atlantic stud.

In the rating of Honor List Herds, two that are predominately Atlantic-bred placed high. Willow Maple Farm in Lebanon County was third in the 25-49 records category, and Sinking Springs Farm, York County, placed fourth in the 50-74 lactations group.

Lewis on Dean's List

Kenneth Scott Lewis, son of Mr. and Mrs. George Lewis of 606 Stony Battery Rd., Landisville, has been named to the Dean's List at Delaware Valley College. This announcement was made by Dr. Clinton R. Blackmon, Dean of the College, who pointed out that this high academic recognition is given to members of the sophomore class who achieve a semester academic average of at least 3.3.

ATTENTION: Dairyman

For a healthy start at pennies a day

Feed Milk Replacer No. 22

Good dairymen know the importance of getting newborn calves off to a healthy start and getting mother back in the string. That's why Vigortone developed Milk Replacer No. 22. This easy-to-mix product contains high levels of important vitamins, minerals, antibiotics and milk proteins. Your calves will do better, and you'll save money because you can market all of the whole milk you get.

New 18% Calf Starter Formula

After calves are settled on Milk Replacer No. 22, introduce Vigortone's 18% calf starter formula. This highly fortified ration is built around Kalf Ayd No. 23 — a potent blend of vitamins, minerals, trace elements and antibiotics. By using your own grain, you can grind and mix this 18% ration and enjoy big savings over the cost of a commerical starter.

A 14% growing ration for heifers

Vigortone also has a 14% growing ration for heifers that can be introduced at 15 weeks of age. This special ration can be built at a substantial savings and should be fed at specific levels until maturing heifers are ready to go into the production line.

Check with your Vigortone serviceman for all the details on Vigortone's new life-cycle feeding programs for dairy. You'll soon learn why more dairymen are feeding Vigortone — especially now.

Water quality stressed at farm tours

By JUDY MITCHELL
Berks Co Reporter

LEESPORT More than 30 persons from at least seven different counties set out by charter bus from the Ag Center on July 29 for a tour of eight western Berks County farms to get a first hand look at modern farming techniques and their relationship to water quality

The all-day tour was organized by the Delaware Valley Regional Planning Commission in conjunction with the Berks County Conservation District, and most tour members were individuals either professionally involved with or serving as citizen advisors for COWAMP 208 Among those organizations and agencies represented were the Agricultural Stabilization Conservation Service, Soil Conservation Service, Susquehanna River Basin Commission, U.S Geological Survey Team, the Philadelphia Health Department, Hershey Foods, Inc., and the League of Women Voters.

According to Harry Schaffer, Resource development agent with the Cooperative Extension Service, host farmers were selected as representing some of the best farm management practices for handling nitrogen moving to ground water and sediment moving to streams A number of Berks County farmers traveled with the group, and the visitors were invited to present them with any questions they might have relative to farming or farm conservation

At the Harold Heck farm in Wernersville R1, the first farm on the agenda, tour members were familiarized with the contour crop farming practiced by most county farmers today, as well as the practice of sodding end rows and the use of diversion ditches and side waterways, all of which aim at controlling erosion.

No-till corn planting was one of the newest conservation methods viewed, the result of which was best illustrated at one of the

Another stop on the Berks County Soil Conservation Tour was at the Roy Christman farm, where a lagoon and standard irrigation system were featured.

Harold and Wayne Lesner farms where fields of tall corn grow on land which, prior to this year, had not been farmed for 17 years. The no-till operation, as explained by Harold, involved spraying for weeds, fertilizing, and then planting with the no-till planter which differs from a standard corn planter only by a series of disks which make the furrows.

Earlier in the trip, Harry Schaffer had explained to the tourists that farmers are not implementing farm conservation methods because they are "good joes" but because it is in their best interest to do so. Accordingly, Lesher pointed out that the no-till method, in addition to its effectiveness in helping control erosion, is economically practical as well. Even considering additional spraying costs, he said, no-till planting is less costly than the traditional method of preparing the ground which requires a great deal more man and machine power.

Methods of handling livestock waste was another important item on the tour agenda and stops were made to several dairy farms, a swine, and a beef operation.

Underground liquid storage pits hold livestock waste at the Lesher's jug operation, as well as at the Richard Gelsinger and Lester Gelsinger farms. Lester demonstrated the removal process at his farm which included pumping the waste from the pit to a honey wagon, followed by a two-man operation of spreading and chiselling in the field.

Lagoon systems were offered for inspection at the Roy Christman, Donald Duncan, and Mark Wolfskill farms; and the day, which had begun with heavy rains and lingered still and humid, helped emphasize the absence of flies and odors at the lagoon and outlet sites, particularly at the Wolfskill farm where the visitors were able to examine the system at close range.

Although not the easiest or most economical to operate,

Get organized before canning

Getting organized for home canning has definite advantages. When you have all your equipment ready to go - and that includes new lids - and have needed ingredients on hand, your canning operation will be much easier.

But even more important is managing your time and the amount of foods you should can at any one time It might seem that running your canning operation similar to a commercial processor, a speedy streamlined operation, would be the most efficient method But you can overestimate how much you can proceason any one day

No matter how much food you have to process, only wash and prepare the amount you can get into one canner load at a time It won't pay in the long run to have great amounts of foods washed, cut, being heated, waiting to be canned To retain the most nutrients, foods should be processed as quickly as possible Unnecessary or prolonged heating also causes nutrient loss and may affect the texture of the food, such as increasing the separation of tomato juice

When processing canned foods you have to count the length of processing plus the time you need to fill jars, wipe sealing edges and apply lids. If using a boiling water bath canner, you also have to count the time needed for the water to return to a rolling boil. When using a pressure canner, exhaust and cooling time can add as much as an hour to the actual processing times. For example, when directions for canning whole kernel corn in quarts call for processing 85 minutes you can assume that one canner load will require a total time of 145 minutes or two hours and 25 minutes

To insure the most efficient home canning operation have necessary equipment and supplies on hand, have countertops clean for more working space, plan other activities so as not to interfere with canning - including simple meals, know the capacity of your canner and how long the total heat process will take

Handy reminders for sewers

Tips on Sewing Quilted Fabrics

Quilted fabrics work well in vests, jackets, jumpers, hats and handbags When working with quilted fabrics, remember to choose a pattern design that is simple

When cutting pattern pieces, do not place them on a fold Their bulkiness can cause distortion Transfer pattern markings to the fabric with tailor's tacks then connect tack marks with chalk — instead of using a tracing wheel and carbon paper

Quilted garments tend to be bulky But in some areas, bulk can be reduced Clip darts and press open Remove excess batting by pulling it away from the fabric cover Treat seams by cutting batting and lining close to the seam line, then pulling them away from outer fabric Zigzag seams to prevent raveling Or, if the garment is unlined, bind seams with bias tape Press open all seams

Make facings from unquilted fabrics. If companion fabrics aren't available, pull batting and lining away from excess quilted fabric and use it as facing material. Use decorative trims, such as fold-over braid in place of facings.

Mark hems carefully. Machine stitch ¼ inch from the fold within seam allowance. Then remove quilt batting from hem allowance.

Machine buttonholes are best for quilted fabrics. When inserting a zipper, remove batting from seam allowances.

Prevent Fabric Puckers When Sewing

All woven fabrics will pucker more on the lengthwise grain because there is less fabric stretch in this direction. Knit fabrics will pucker more in the direction of least stretch, usually lengthwise. There will be least pucker on a bias seam, slightly more in the crosswise direction, and most on lengthwise grain.

Thread should be compatible with fabric and with expected performance

Adjust sewing machine the more loose the tension the less pucker there will be

Use as light a pressure as will feed fabric through machine

Make Your Own Shower Curtain

Shower curtains can be made of any fabric If you use a fabric other than vinyl, use a separate vinyl liner Be as creative as you want in adding rick rack, ball fringe, or other decorations

A standard size shower curtain requires 4½ yards of fabric, 36 inches wide and two yards of iron-on tape 1½ inches wide A twin size sheet will also make a shower curtain

Cut the 4½ yard length of fabric to make two pieces of equal length — 2¼ yards each Sew selvages together to make one-quarter inch hems along the outer edge Reinforce top of the curtain by applying the iron-on tape to the wrong side of the fabric about one-quarter inch from cut edge. Make a regular 1½ inch hem with the tape turned in. Make a three or four inch hem at bottom.

Make eyelets or buttonholes for the curtain hooks through the top hem. Shower curtain hooks usually come in boxes of 12, so if you want 12 eyelets, follow this procedure: Measure the total width of the curtain at the top and subtract two inches. Divide by 11 and you have the distance needed between holes. Make the first hole one inch from the side hem and then continue to mark the other holes.

You can buy eyelet makers in fabric stores or notion departments or make vertical buttonholes on the sewing machine. If your curtain is wider than the standard size, use extra hooks so it will hang properly.

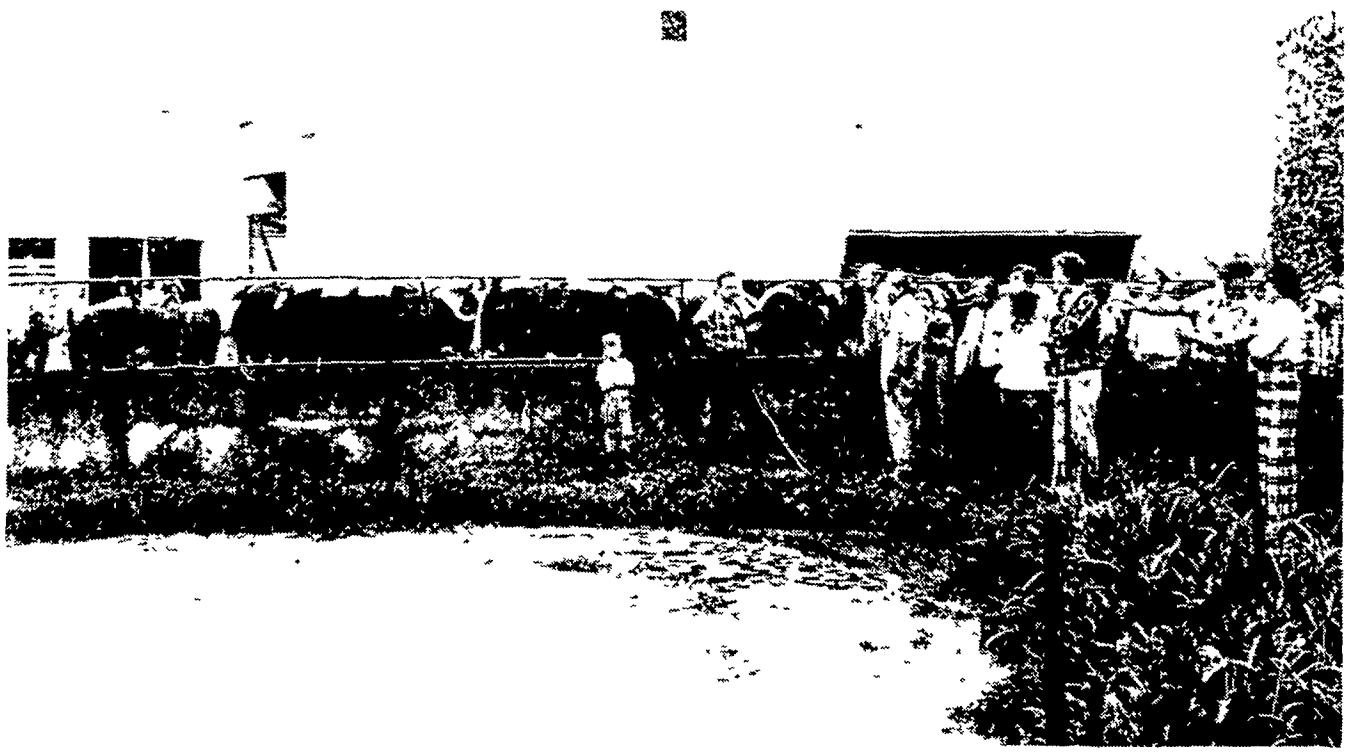
This is the discharge point of the lagoon water flow in one of Mark Wolfskill's corn fields The area is insect and odor free

Visitors to the Harold Lesher farm were given a report on the no-till methods of planting corn.



Mark Wolfskill's lagoon system was one of the stops on a conservation tour held in Berks County recently. Water containing no more than five per cent of the animals' solid wastes runs from the lagoon to an outlet located in a corn field.

Water

(Continued from Page 92)

according to Robert Manbeck, his spray irrigation system adequately handles his problem of approximately 500 gallons of milkhouse waste dairy which has no place to go but up. He demonstrated the system which sprays about two-thirds of an acre at a time with no signs of erosion to date.

A variety of tractors and implements were on display at a number of the farms visited and their cost, and other farm operation costs as well, were readily provided by the host farmers. Overall, the tour provided an impressive example of the effort being made by a number of county farmers to do their part in preserving water quality and at the same time meet their ever-increasing operating costs.

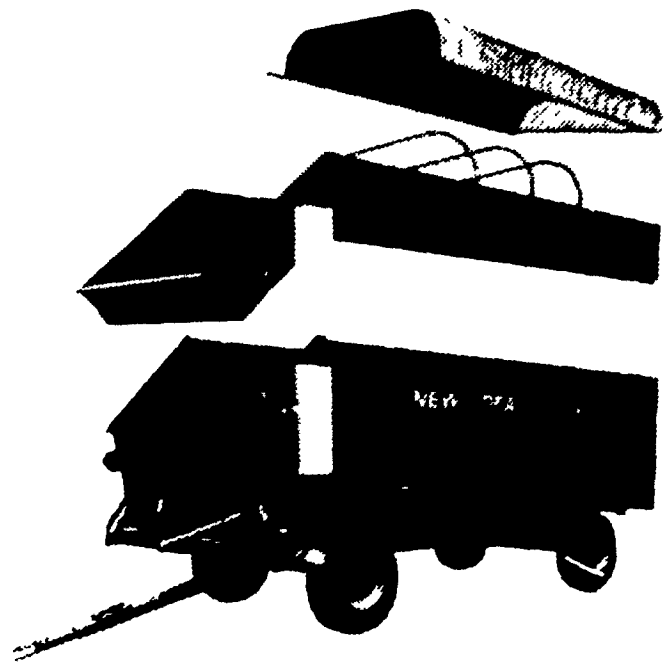
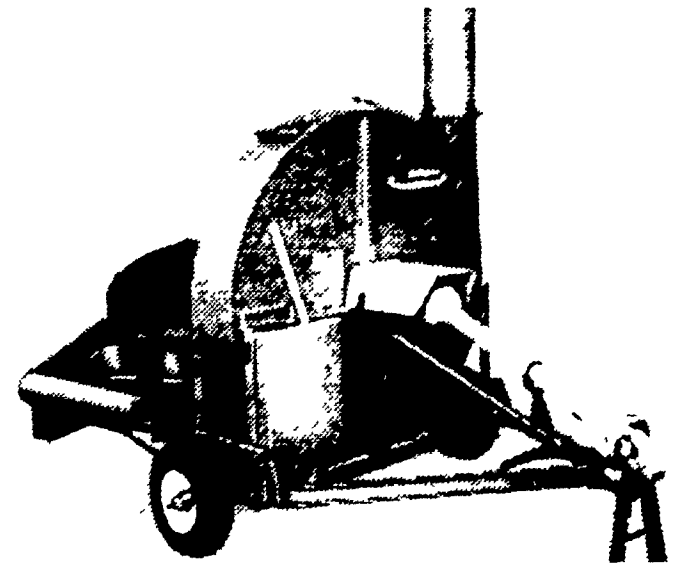
New Idea's Forage Boxes



Two rugged boxes built to last.

New Idea's two big forage boxes—the 14-ft. and the 16-ft —are both built to get the job done fast. Both are available with 2 or 3 beaters, and galvanized roof. The 16" diameter beaters have staggered teeth, to give a waterfall effect, delivering a more uniform feed to the cross auger. The 16" diameter cross auger means you get smooth, positive unloading without chains, slats, bearings, or idlers. In all, these attractively priced boxes are built to bring your crops in—fast.

New Idea's Forage Blowers



Gives you a quick lift

Blows silage, haylage, or grain to the top of the highest silos at the rate of up to 100 tons an hour Six big 54-inch fan blades discharge the material at a speed of more than 125 feet per second! That's why we say it'll give you a quick lift

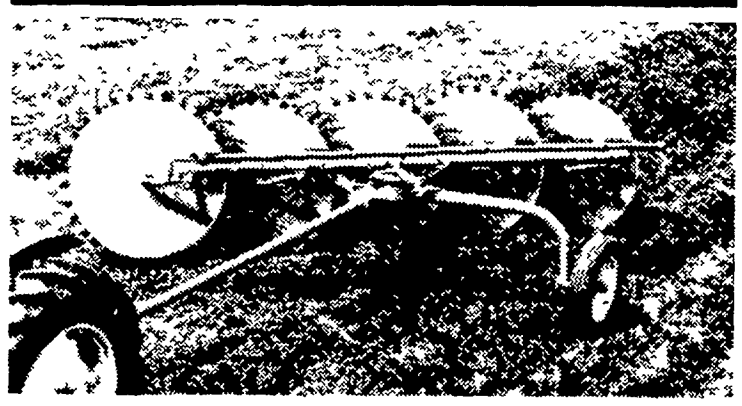
It has New Idea Quality throughout Easy to transport Easy to set up position and use Matching the hopper height to the forage box is simple And, rugged heavy-duty construction keeps this forage blower on the job years longer

Can we give you a quick lift? Ask us for more information.

AVCO NEW IDEA FARM EQUIPMENT

We make your job a little easier.

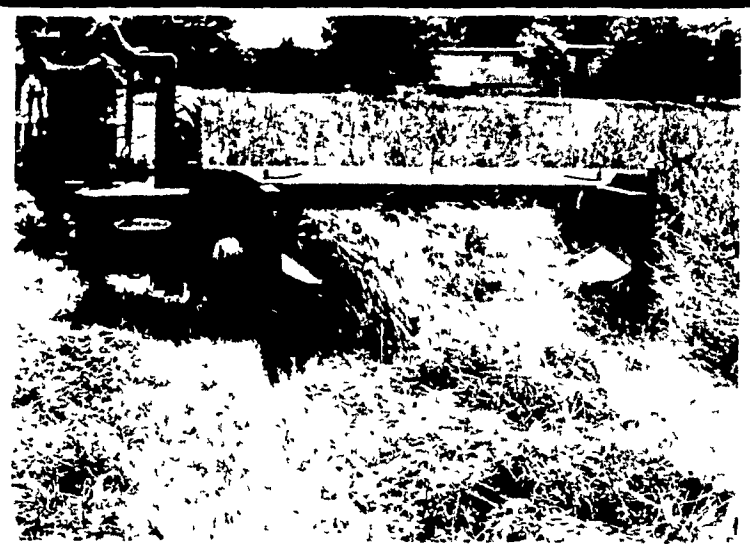
New Idea's Wheel Rake



The quick 'n clean hay machine

Use the Avco New Idea Speed Wheel Rake over any terrain — smooth, uneven, hilly or contoured — and it gets the hay other rakes miss . . . and gets it fast. Raking wheels feature independent spring counter-balancing so teeth follow ground contour. Gentle action builds big fluffy windrows without shattering valuable leaves. You can use the basic 5-wheel rake (8'4" width) for the first cutting, then add 6th or 7th wheel for later cuttings Stop in and see this low cost rake for yourself!

New Idea's NEW 9-foot Cut/ditioner



New 9-footer does even more for less money

Now there's a bigger non-stop, plug-free, economical "Hay Thing" from New Idea. Because it's plug-free, this new 9-foot Cut/ditioner will do more work than a mower-conditioner. Not only will it make high quality hay in windrows or swaths - it'll also ted, trim pastures, windrow stalks and more. Try it yourself.

"The hydrodynamics of meteorology presents without doubt the most complicated series of interrelated problems not only that we know of but that we can imagine."

— John von Neumann, mathematician —

WEATHER REPORT

By DIETER KRIEG

Powered by some 240 trillion atomic horsepower from the sun per day, the Earth's weather churns and spins constantly. This vast amount of energy sucks up more than 1000-billion tons of sea water per day and it spawns some 50,000 thunderstorms — each one having the equivalent power of a 1-megaton hydrogen bomb. All told, the Earth's daily thunderstorms release energy equal to explosions from billions of tons of TNT. Is it any wonder then that an occasional storm comes along? With its awesome powers, and ability to give and take life, weather is the single most important ingredient necessary to sustain life. Following is the first in a series of stories on this force.

A lot is cooking in the atmosphere

By DIETER KRIEG

The weather has historically been the subject of many jokes even though it's seldom anything to really make fun of

What farmer hasn't seen leaves of corn curled tightly and pointed straight for the sky in a prayer-like manner in desperation for rain? Who hasn't seen cracks in the Earth, as the soil opens itself up for want of moisture? And who hasn't experienced the ravaging devastating effects of a sudden downpour?

From drought to downpour, and hail to haze, the weather is a subject which is often joked about in spite of its deadly serious nature Aside from volcanic activity, which has thankfully subsided in most areas, the powers represented by air movements are the most mighty on Earth The awesome force in just one thunderstorm is hard to imagine

The weather is so powerful and so vital that studying it and making forecasts has been a part of civilization since earliest times From simple observances to sophisticated techniques using computers and satellites, man has always kept an eye on the atmospheric conditions around him

A few facts on the facing page tell of the remarkable power which is ever-present in the Earth's atmosphere The figures boggle the mind, and the facts themselves are hard to comprehend - especially when the air and warm sun seem so gentle But that's not always the case

Observing the weather — and even attempting to control it — costs the world's citizens vast sums of money annually, and to do a really complete job of it is thought to be impossible Nevertheless, dramatic advances have been made during the 'satellite and computer era," and there's even talk going on about harnessing the weather for use in warfare That is nothing to joke about

Neither is the natural distruction left behind by storms humorous By conservative estimates, weather hazards cost the United States more than 1200 lives and upwards of $12 billion annually Damage to crops from just hailstorms alone is estimated to reach $300 million per year, which explains why several nations are experimenting relentlessly with ways to prevent them The Soviet Union has reportedly found methods to reduce the force of hail storms They've set up batteries of anti aircraft guns and rockets near their prime agricultural fields and fire away when a storm is developing, as though they're trying to down an armada of warplanes Similar preventive measures have taken place in Australia too In either case, the ammunition and rockets contain silver iodide crystals which explode at pre-determined altitudes, thus "seeding" the clouds and causing precipitation before the storm was in fact ready for it Russians claim they have reduced hail damage by approximately 85 per cent in this way

In the United States, similar efforts have been conducted for several years, guided primarily through the National Center for Atmospheric Research in Boulder, Colo.

The science of forecasting weather is almost as phenomenal as the weather itself Although we often poke fun at the men who draw up forecasts, they're generally remarkably accurate. But we often take much of it for granted, not realizing the complexities involved. The fantastic advancements which have been made in science over the years can perhaps best be summed up by man having landed on the moon and sent explorer vehicles to Mars. That too is impossible for the general citizenry to comprehend and appreciate fully, but from any angle these happenings represent a terrific amount of achievement.

It was satellites and computers which really opened things up for meteorologists. Suddenly they had eyes thousands of miles above Earth, and machines which could interpret billions of bits of information in just minutes. The evolution of these devices and a number of others has enabled responsible agencies to issue warnings as to where a storm might occur — thus avoiding even greater losses to life and property than occur anyway.

In 1969, for example, cameras far out in space detected the makings of a storm in the Atlantic Ocean. Almost instantly, a vast network of meteorological stations focused on the developing brew — which turned out to be the most intense storm to hit North America in modern times. Hurricane "Camille" sped to shore a few days later with winds exceeding 200 miles an hour and tides measuring 24 feet above normal sea levels. Although property damage approached $1.5 billion, comparatively few lives were lost a blessing which is credited to the early warnings which could be issued on the basis of pictures beamed to Earth from outer space and cooperating ground and sea stations in the path of the storm An estimated 50,000 might have died in that storm, officials point out, had it not been for hasty evacuation efforts As it turned out, less than 350 were reported dead or missing

By contrast, a half million citizens of East Pakistan succumbed to the angry lashes of a tropical storm in November of 1970 Satellite pictures showed the developing storm to scientists, and warnings were issued, but with the majority of people died because of having no contact with the news media. The resulting disaster went down as one of the worst of the Twentieth Century.

It is practically impossible to imagine the volume of air and magnitude of forces which shape our weather. But consider The Earth's atmosphere is approximately 20 miles deep and contains 5.6 million - billion tons of air. That calculates out to roughly 1.5 million tons of air for every person on the planet. Add to this "brew" the relentless power of our atomic sun, and things really begin to cook. An estimated 240 trillion horsepower of solar energy are absorbed by Earth in a single day, scientists say. Fantastic air movements are created by heating in the equatorial regions and cooling in northern areas. Every day these air currents scoop up an estimated 1000 billion tons of sea water per day — and it eventually comes down somewhere in various amounts, depending on countless of factors involved. During Hurricane Camille, for example, 27 inches of rain fell in eight hours in some parts of Virginia.

Understandably, all of this is a never-ending cycle. And that's how it must be if life is to sustain. Without rain there would be no grass — no food — no life. Sunlight and solar energy are equally essential, and in fact, not even rain would develop if the "solar furnace" 293 million miles away were to shut off. Snow offers protective covers to winter crops; winds bring in these various forms of precipitation and carry with them pollen from plants and for a long time aided man in traveling around the globe.

To be continued next week.

Broiler production dips

HARRISBURG — Broiler production in Pennsylvania for the week ending July 31 dipped from the previous week but remained higher than last year's rate, according to the Crop Reporting Service.

Placements of broiler chicks for the week were almost 1,587,000, 11 per cent below the previous week but eight per cent above the corresponding week a year earlier. Average placements during the past ten weeks were 17 per cent above a year earlier.

In the 21 key poultry producing states, placements were 65,262,000, about the same as the previous week but 12 per cent more than the same week a year earlier. Average placements during the past ten weeks were 12 percent above a year ago.

Crafts

Tinsel painting: a revived art for anyone from children to artists

By JOANNE SPAHR

LANCASTER - The tinsel painting sparkles and glints in the light and captivates the eye with its jewel like beauty From a distance the features on the design such as the birds and grapes have an oriental look about them and seem to be set on velvet Above all, tinsel painting looks incomprehensible and too difficult for an average person to do

"Oh, but it's not," assures Mrs Beatrice Hoffman, artist and tinsel painting demonstrator "I've seen children do it with a pattern they took from a coloring book." She further clarifies, however, that as with any craft, tinsel painting can be as intricate as you choose to make it

Mrs. Hoffman of Lancaster, who demonstrates her craft at Donegal Mills, among several places, is an artist of long standing, so her pieces are exquisite.

"I try to follow the traditional patterns and practices," she explains with conviction," because if you are going to demonstrate at historical places, you have to be as authentic as possible."

In simplified terms, this craft entails drawing a line design onto glass, coloring in the design with transparent enamels, blacking out the rest of the outer areas with opaque enamel, then backing the whole thing with crushed aluminum foil. Although this perhaps sounds unattractive, the result is the gorgeous, jeweled-effect design described above.

This craft, like tole painting and reverse glass painting, is an old art which is in the process of being revived today. Mrs. Hoffman attributes its revival to more leisure time and an interest in history because of the Bicentennial.

And, tinsel painting does have a unique, if not somewhat obscure history. It came from England, and is believed to have its roots in Chinese art, since the English were exposed to a similar-looking Chinese art made from Mother of Pearl. Although the ingenious English didn't have easy access to Mother of Pearl, they simulated its effect by using the tinsel from their tea to back the painted glass.

From England it came to America as a memory art, and was revived intermittantly throughout history as women needed to fill in extra time. For example, Mrs. Hoffman says it was revived during the Civil War when the men were off fighting for their country and women needed something to occupy their time.

Today, it is simply a decorative way to spend leisure time.

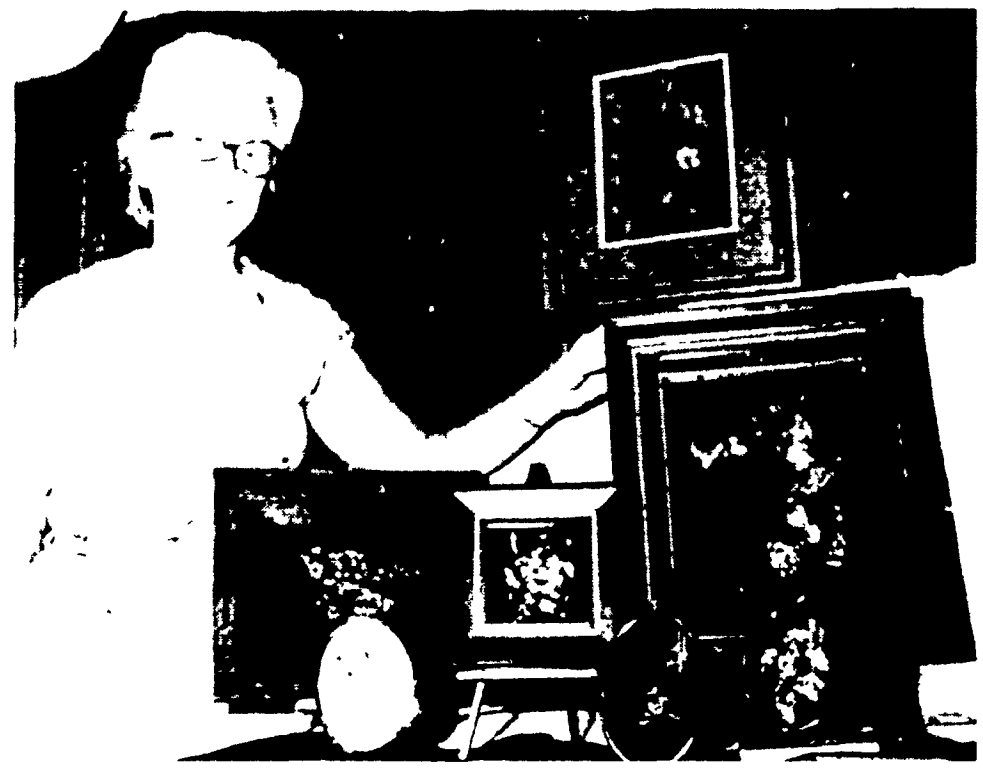
Procedure

To begin the craft, buy a frame with the glass already in it. Then, pick a simple pattern from a card, or design book, and put it on a piece of transfer paper. As you do this, alter the pattern to fit the glass and frame size.

Then, before beginning to trace the design, clean the glass thoroughly with cleanser. When this step is completed, lightly go over the side which is to be drawn on with cleaning fluid This will take away all remaining vestiges of oil From this point on, the cleaned side of the glass should not be touched

After cleaning, powder the

[Continued on Page 99]



Mrs. Beatrice Hoffman poses with a few of her exquisite tinsel painting collection. Many of her artworks are framed in antique frames.

After painting in the background with an opaque enamel, the next step in tinsel painting is to fill in the design with transparent colored enamel Here, Mrs Hoffman fills in the grapes with a light purple color

Tinsel painting

(Continued from Page 98

glass with talcum and shake off all possible dust

Then, lay the glass over the pattern to be traced and draw it on the glass with a crow quill pen and good waterproof ink, never touching the glass with the hands

To make this step easier, Mrs Hoffman suggests attaching the two corners of the design to the glass with masking tape

Let the ink dry for about an hour After it is dry, use black enamel or cream colored enamel for traditional effects, or any color enamel to match your decor, and paint all around the pattern This background should be solid with no light showing through If it does, those spots will have to be covered again

Let this enamel background dry - about three hours, and when it is no longer tacky, color in the remaining design with transparent enamel

According to Mrs. Hoffman, there are only three transparent oils available - Indian Yellow, Alizaron Crimson, and Prussian Blue. These three colors can be mixed to give any variation desired.

"The color mixing is where creativity shows up," says the experienced demonstrator. "No two people could ever come up with the same design because the colors will always be different."

After the paint dries, back the whole thing with a piece of crushed aluminum foil which has been more-or-less straightened out, and place in a frame.

For those who want more information on the craft or wish to see it demonstrated, Mrs. Hoffman displays her work and how to do it at the Pennsylvania Farm Museum of Landis Valley, Donegal Mills, St. Peter's Village, the Lancaster General Hospital, and various craft shows around Lancaster County.

One of the first steps in the craft of tinsel painting is to transfer the chosen design from paper to glass To do this, the artist lays the glass over the design and traces it Mrs. Hoffman stresses, however, never to touch the glass while working on it To aid in this and to make the job easier, she rests her hand on a piece of paper towel The tools she is using here are a crow quill pen and waterproof ink

FARMERSVILLE AUCTION

TUESDAY, AUGUST 17, 1976

6 P.M.

In Farmersville, 3 miles East of Brownstown, Lancaster County, PA.

Traditional living room suite in velvet; set of 1974 encyclopedias; set of World War II books; lots of paperback books; mahogany bedroom suite with twin beds; mahogany dining room suite; swivel and platform rockers; recliner; sliding glass door bookcase; wicker rocker and chair; breakfast set; Maytag wringer washer, like new; wagon wheel light; oval china closet; modern Walnut bedroom suite; pine end and coffee tables; Early American living room suite; metal 4-drawer filing cabinet; avocado Sunbeam mixer; Harvest Gold Sunbeam blender; Corning electric coffee pot; crockpot; Tupperware; 64-pc. Peaches

ANNAPOLIS, Md. - The weird weather patterns we have seen this year could catch people who can and freeze peaches off guard because the peaches are coming in two weeks ahead of normal.

That's the word passed from the orchards. Growers have advised the Maryland Department of Agriculture that their crops are ripening much ahead of normal and they are concerned because many people who can and freeze peaches are so accustomed to regular season times that some of them could miss the peaches they seek.

The early ripening problem is the second difficulty for peach growers. Freezing weather and hail storms in April and May, cut the 1976 crop in Maryland by some 10 million pounds from last year according to the Maryland-Delaware Crop Reporting Service.

So, the word on peaches is: move quickly and don't be caught with an empty basket.

Pickle preservation pointers detailed

UNIVERSITY PARK - Homemade pickles probably cause more problems than any other home canned products. There are several major reasons for this.

Starting with slicing cucumbers rather than pickling cucumbers is one major reason. There are two distinct types of cucumbers: a slicing variety for fresh slices and salads and a pickling variety. Slicing varieties do not make good pickle products. Use a pickling cucumber such as SMR58 or Wisconsin SMR varieties.

Harvest pickling cucumbers when they reach the size required for making the style pickles you desire. Use only bright green cucumbers. Avoid a slightly yellowed cucumber. Process all cucumbers the same day of harvest. Before processing, scrub cucumbers with a vegetable brush, then rinse. Be sure all dirt is removed. In addition, remove and discard ⅛ inch slices from both ends before making pickle products. If this is not done, you may get soft or slippery pickles.

Using an old fashioned pickle recipe is another major cause of poor pickles. Such recipes were very unscientific in the way they were written. They might call for enough salt to float an egg. Directions like this are very difficult to interpret in today's world. Also, old fashioned recipes often depended on homemade vinegar. The strength of homemade vinegar was really unknown and thus, it is nearly impossible to duplicate today with vinegar or a standard acetic acid content.

Many of these old-fashioned pickles were stored in a brine solution, under conditions of temperature not available in most homes today. Or the pickles were put in jars and sealed without heat treatment of any kind.

It's easy to understand why there were problems with these old-fashioned pickles. For good pickles at home, start with a modern recipe which will give you quality pickles without spoilage.

There are two major kinds of pickles today - slow process pickles and quick method pickles.

The slow process pickles depend on the salt to prevent spoilage while lactic acid is produced by natural fermentation of sugar in cucumbers. If this method is used, the strength of the brine in which the cucumbers are soaked is extremely important. If the brine is too strong it inhibits the growth of the bacteria that produce lactic acid and poorly flavored, shriveled pickles result. If the brine is too weak, putrifactive bacteria instead of the desirable bacteria, gow and the pickles are slippery and do not taste good. During fermentation, a scum forms on top of the brine. It must be removed so it doesn't interfere with the fermentation process. The cucumbers must be kept covered with the brine during the fermentation period and kept at a temperature between 60 & 70 degrees F. At the end of the fermentation period, more vinegar may be needed and also sugar and spices may be added as designated by the recipe. When completed the jars of pickles should be processed a short time in a boiling water bath.

In the quick method, the vinegar is used as a substitute to produce the acid flavor, so the taste is different from slow-process pickles. Be sure to use a modern recipe and standard vinegar, and process them in the boiling water bath to get quality pickles.

If you would like to learn more about pickles, plan to attend the workshop on pickle making sponsored by the: Extension Service. It will be held August 11, 1976, 10:00 a.m. to 12:00 noon at the 4-H Center. You must register in advance by calling the Extension Office at 848-3301, ext. 276. The workshop is free to the public.

Common causes of poor quality pickles

Shriveled pickles can be caused by too much salt, sugar, or vinegar at the start of the pickling process. Overcooking or over-processing may also cause shriveling.

Hollow Pickles can be caused by poorly developed cucumbers, holding cucumbers too long before pickling, too rapid fermentation, or too strong or too weak a brine during fermentation.

Soft or Slippery Pickles may be caused by too little salt or acid, cucumbers not covered with vinegar when they were packed, cucumbers not thoroughly washed or not having the stem and blossom end removed, a seal that is not airtight, or insufficient heat treatment.

Dark Pickles may be caused by using ground spices, too much spice, iodized salt, over-cooking, minerals in the water, especially iron; or use of iron utensils.

Farmers briefed on no-till and multiflora rose

Taking part in the no till corn meeting held recently in Berks County were, left to right, Bill Hinton, James Haldeman, Bill McClellan, and Albert Trexler

By JUDY MITCHELL
Berks County Correspondent

KEMPTON - Bill Hinton of Fleetwood R2 shared his formula for planting a successful no-till corn crop on land that had been in sod for three years with other Berks and Lehigh County farmers at a No-Till Corn and Weed Control Meeting held at the Al Trexler farm, near here, on August 10

Trexler, who is the executive assistant for the Berks County Conservation District, noted that prior to the three years the hillside farmland sat idle, it was in small grains, and for conservation purposes he did not want it that way year after year. Corn was what the farmer wanted, but he didn't want the land tilled. So no-till came to mind.

Although Hinton has been planting no-till corn at his Fleetwood farm for five or six years now (initially undertaken to control weeds in his crownvetch), the acreage at the Trexler farm seemed another matter "Every kind of grass was here," he told the farmers gathered at the edge of a field of tall corn

Hinton's procedure, which "went by the book" according to County Agent Jim Haldeman, began with soil tests taken in the Fall followed by the application of two to 2½ tons of lime per acre in accordance with those tests The fertilizer applied prior to planting was a 0-60-60 combination spray (60 phosphate and 60 pot ash). Hinton aimed high in planting, he said, because of the hills, shooting for 18,000 plants per acre. Alongside the rows he added 200 pounds per acre of 10-20-10 fertilizer.

(Continued on Page 101)

CHAROLAIS SALE

CLAUDE GRIM SONS, INC.

SATURDAY, AUGUST 21, 1976

12.30 P M

Two miles north of Abbottstown on Route 194 Turn right on Jacobs Mill Road and follow arrows

LOTS:

Four purebred half French charolais bulls 12-15 months old; out of grandson of Avignon

38 registered ¾ & ⅞ Charolais cows. Some with calf at side all pasture bred to son of Avignon, grandson of Avignon, and son of Barnabas.

12 ¾ & ⅞ not registered. Pastured bred to same bull

35 Charolais cross steers 200 to 500 pounds

All cattle TB and blood tested.

Farmers briefed on

(Continued from Page 100)

One thing about no-till Hinton cautioned, "you have to get rid of the insects." For that purpose Isotex was applied to the seeds (also effective against pheasant problems), and seven pounds of furadan per acre was applied at planting time.

Hinton used 35 to 40 gallons of nitrogen (33 percent Nitan) per acre (giving him about 140 units of N per acre) to which he added his herbicides: one quart Paraquat, two quarts Aatrex 4l (comparable to 2½ pounds Atrazine), two pounds Princep, and one quart Toxaphene. A pint of Bavel was added for application to fields where there was alfalfa growing.

A standard sprayer, Hinton pointed out, just won't handle the gallonage needed to do the job, so he purchased a John Blue sprayer which holds enough spray to treat about 10 acres.

According to the Fleetwood farmer, the John Blue could stand some alterations for maximum performance on the kinds of hills he worked on the Kempton farm, but in his opinion, a standard no-till planter would not serve to handle the planting at all, and he rebuilt it to accommodate the alopex before attempting planting.

The most serious problem Hinton encountered was the mice which took most of his first and some of his second plantings in some fields. He advised heavy disking ahead of time if you know the mice are there, but Dr. Bill McClellan, Penn State Extension agronomist who was on hand to answer the farmers' questions, had an alternate suggestion.

McClellan felt that the late application of the weed control materials may have been against Hinton in handling the mice and advised applying the herbicides while the field is barren, which he feels will cause the mice to leave before the corn is planted.

McClellan applauded Hinton's initial step of testing and applying lime, pointing out that lime is "the first step in weed control." Although in McClellan's judgment, Hinton's weed control was quite acceptable, he expressed his preference for applying the herbicides before planting and then coming back later with Banvel to get any weeds that survived the main program when they have reached six to eight inches in height.

Trexler, who says he believes in no-till and in applying lots of nutrients to it, pointed out that although there is probably no class one or two soil on his property, "I think this corn is as good as you will find on any class one or two land. You can see the evidence of good management here," he added.

Following time for inspection of the corn crop which appeared uniform even on the furthest hills, the group met in another area of the Trexler farm for instruction on the use of Tordon 10K pellets now available for controlling multiflora rose.

McClellan advised the farmers present that Tordon 10K "is probably the hottest herbicide you have ever used" and cannot even be purchased without certification that the purchaser has been instructed in its use. The product is highly soluble and should not be used on slopes where it can wash into ponds, streams, or into areas where trees or plants gorw. McClellan further cautioned that the material remains in the soil for about three years, adding that if cows are permitted to graze in a treated area, the Tordon will go through the animal and come out through the urine and the manure (but not the milk) which cannot then be used for fertilizer. He recommends staying at least 100 yards from water sources, shade trees, and desireable plant growth when applying the herbicide. McClellan further suggested that the practicality of using Tordon 10K would most likely depend on the severity of the problem with multiflora rose as it is only available in 55 pound cans, and a little bit goes a long way.

A demonstration of the efficiency of the Tordon 10K pellets was given at the Mark Balthaser farm in the Bernville area on August 9, where it had been applied 10 days prior to that meeting. According to County Agent Haldeman, during that period some of the multiflora rose bushes had been completely killed and others were turning yellow. The Berks County Agricultural Stabilization Conservation Service, the agent said, expects to have cost sharing available for use of Tordon 10K in 1977, and information on obtaining certification for its use may be obtained by calling the Extension Service office in Leesport.

PUBLIC SALE
REAL ESTATE
HOUSEHOLD GOODS
ANTIQUES & TOOLS
Of Nelson P. Webb Sr. Estate
THURSDAY AFTERNOON & EVENING
AUGUST 19, 1976
Beginning at 3:30 P.M.

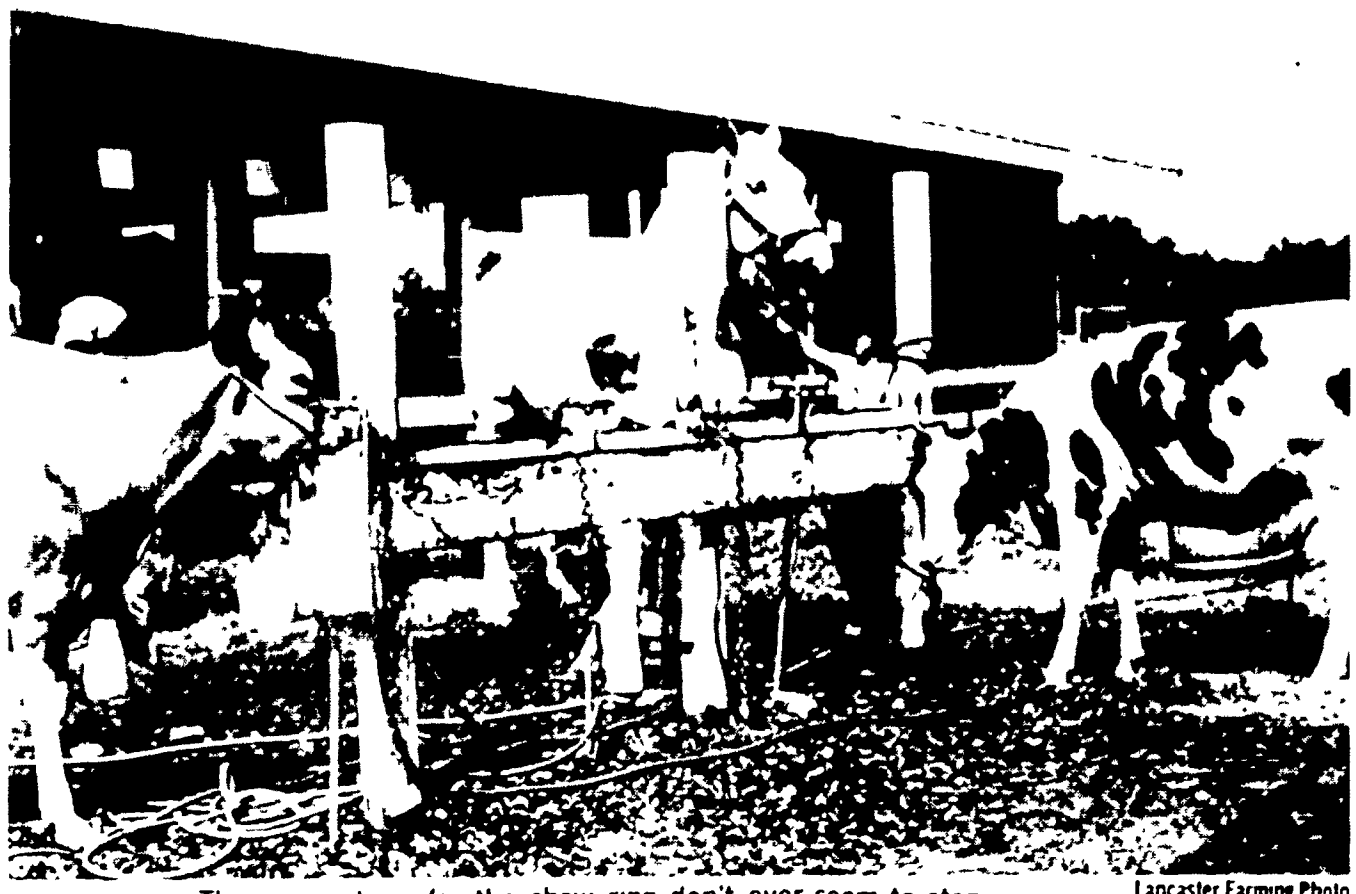
TRY A CLASSIFIED AD!



The preparations for the show ring don't ever seem to stop

Lancaster Farming Photo by Dieter Krieg

Soybean pusher seen

LEXINGTON, Ill An experimental foliar fertilizer that promises to push U S soybean yields beyond current levels as early as next year was unveiled last month by Allied Chemical Corporation, as the company launched a massive field test program in 15 top soybean producing states

Allied's Don Johnson, manger of Agronomic Services, said the new product, known as Folian, will be a significant breakthrough in soybean production if current commerical-scale testing demonstrates yield increases consistent with prior research He spoke at Myers, Inc , a local fertilizer dealer, where the first tank car of the foliar material was unloaded and applied on nearby fields

Favorable test results this year would mean that Folian will be commercially available for 1977 "Our research with similar experimental compounds indicates that yield increases in excess of 20 percent from a single foliar treatment may be possible with Folian," Johnson stated "Tests also show that the compound could increase soybean oil content by approximately 13 percent, an important economic bonus "

TRY A CLASSIFIED

The poorer an individual is the more likely he is to have a diet that is low on the nutritional scale. He probably eats many starches. Poor people in the Orient eat rice. The people in the poorer sections of Europe eat potatoes and turnips. Poor people in South America eat cornmeal.

FREEZING FOOD IN QUANTITY

The cubic foot capacity of your freezer is the starting point for figuring out the amount you can freeze at one time Put in no more than two or three pounds of warm food per cubic foot of freezer space For example, a 15-cubic foot freezer should not have more than 45 pounds of unfrozen food added in a day A lesser amount is better

Freeze food soon after it is packed Keep packages in the refrigerator until several are ready to be put in the freezer Each time the freezer door is opened much of the cold air escapes For faster freezing, place packages against freezer plate or coils

Rectangular or square-shaped containers are usually preferred for freezing because they stack easily and fit compactly side-by-side

Use baskets, shelves, dividers, racks and other accessories to organize packages. The freezer will hold more if packages are arranged neatly.

COMPARE PRICE
AND
VALUE OF YOUR PRESENT MILK REPLACER
WITH
NEW FORMULA PURINA NURSE-GRO®

PROTEIN.....NOT LESS THAN 22.0%

FAT.....NOT LESS THAN 10.0%

FIBER.....NOT MORE THAN 0.5%

ADVANTAGES

- INSTANT FLASH MIXING
- HIGHEST QUALITY DIGESTIBLE PROTEIN
- HIGH ANTIBIOTIC LEVEL TO FIGHT BACTERIAL SCOURS
- HIGH DIGESTIBLE FAT LEVEL TO IMPROVE WEIGHT GAIN
- LOW COST — ONLY $14.95 FOR 50 LB. BAG.
  EACH 50 LB. BAG FEEDS 2 CALVES.

THE PURINA DIFFERENCE: CHECK YOUR INGREDIENT TAG!!

PURINA DOES NOT USE SOY FLOUR TO MAKE ITS MILK REPLACERS.

SOY FLOUR IS AN INEXPENSIVE PROTEIN SOURCE USED IN MANY MILK REPLACERS, HOWEVER IT IS NOT READILY DIGESTIBLE BY THE YOUNG CALF. USING INGREDIENTS NOT EASILY DIGESTIBLE OR THAT CONTAIN TOO MUCH FIBER CAN CAUSE DIGESTIVE UPSETS IN YOUNG CALVES WHICH CAN LEAD TO CALF SCOURS.
